1. We fix some typo errors in section 6.2, we improve the presentation of formulations.
2. To address questions regarding uncertainty and calibration error, we refine our presentation to emphasize uncertainty, while treating calibration error as complementary evidence.
3. For the binary assumption of the moral concepts, we add more motivations and evidence to support our claim in section 2.
4. We add some discussion in section 7.
5. We remove the math formulation to the convergence of concept but add some more explanation about the empirical observations.
