GaussianAvatar-Editor: Photorealistic Animatable Gaussian Head Avatar Editor

Supplementary Material

7. Qualitative Results Gallery

For better visualization, we refer the reader to the video in the supplementary, including:

Our results. We provide more qualitative results in the video, including:

- Different edit prompts, shows edited results of different text prompts of the same avatar;
- Different avatars, shows edited results of the same text prompt of different avatars;
- Novel view, shows novel view rendering results of edited avatars;
- Novel pose, that animate the edited avatars using the source actor's video.

Our ablation studies. To make our GaussianAvatar-Editor self-contained, we also provide qualitative results to our ablation studies WABE in the video.

Comparisons with baselines. We provide more qualitative results with baselines from three takes in the video, including novel view rendering, self-reenactment, and cross-identy reenactment.
