

Target Audience: Students from Reception to Year 3

Expected Read/Watch/Listen Time: Approximately 3 hours of in-class time when used alongside lecture material.

Description: This workbook is designed as a learning aid for young students in Reception to Year 3, supporting an introductory course on Artificial Intelligence (AI). It blends simple theoretical discussions with engaging practical exercises to help students build foundational skills in computational thinking and AI literacy. Each practical classroom activity is paired with a corresponding worksheet to reinforce learning outcomes. The content is age-appropriate, interactive, and aimed at sparking curiosity in emerging technologies from an early age.
