

ObjectNet Captions HUMANr Examples

Below are examples of captions created by humans and models for ObjectNet images, along with their corresponding HUMANr scores. The first column contains human-generated captions and the second column contains captions from either machine models or a second human. The HUMANr score in the third column indicates which caption best matched the image, as determined by another human rater. A score of -1 favors the first caption, a score of 1 favors the second caption, and a score of 0 indicates a tie. Green highlights the preferred captions, and grey indicates the less preferred caption. Both captions are green if equally preferred.
