LLMs In Your Workflow

By Brian Drake, Ruoxin Wang, Jinan Zou

After a thorough review this is an industry agnostic 15 minute professional development presentation around utilising Large Language Models, covering concepts such as:

- Understand the want for AI, specifically LLMs, in the workplace
- Understand what an LLM is
- Understand what tasks LLMs are appropriate for
- Have the tools for better prompt engineering
- Conceptualise that different LLMs are better at different things
- Reduce the likelihood of data leakage when using LLMs
