

(a) CIFAR-10

Figure 1: Similar to Figs 6 and 7 in the original manuscript, when picking  $S'_{low}$  to be ProbCover, and  $S'_{high}$  to be CoreSet, with CIFAR-10. we see that the same phenomenon holds – SelectAL does the same AL strategy picks for every different budget. This result suggests that SelectAL is not dependent on specific strategies for  $S'_{low}$  and  $S'_{high}$ , and can work with a variety of AL strategies.
