

Task Report

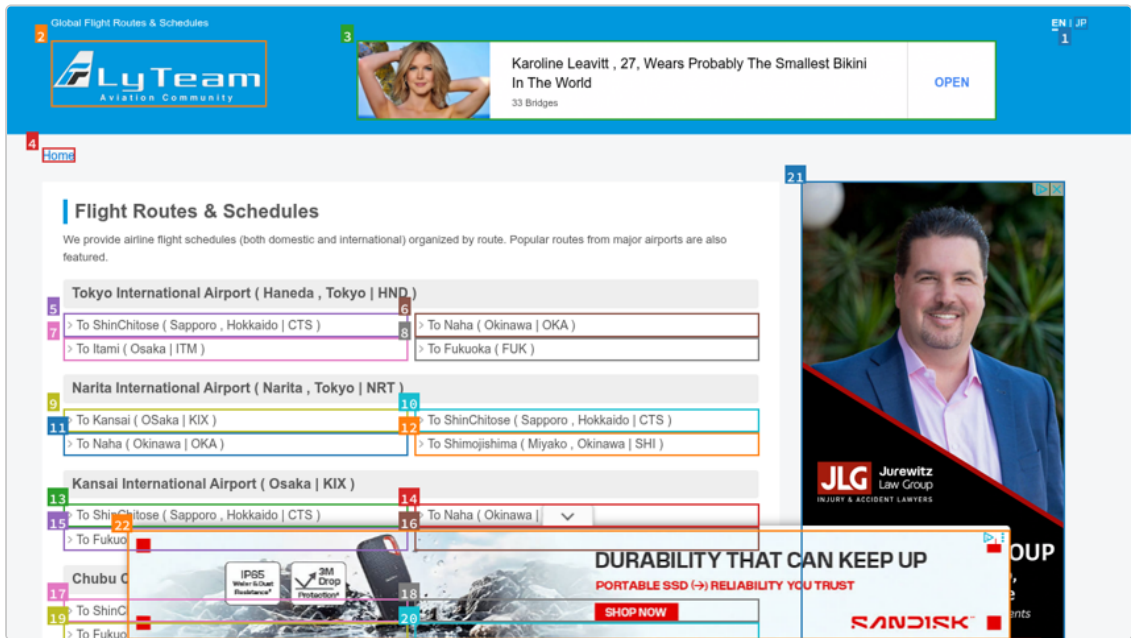

Session ID: travel_tasks_travel_V1_new_992

Task Description: Extract the departure times for all flights departing from Tokyo on a specific day

Total Rounds: 7

Step 1 (2025-10-09T00:07:42.460076)

Screenshots:

Response:

To extract the departure times for flights departing from Tokyo on a specific day, I need to first select a destination from the list of flight routes.

This will likely lead me to a page with detailed flight schedules, including departure times.

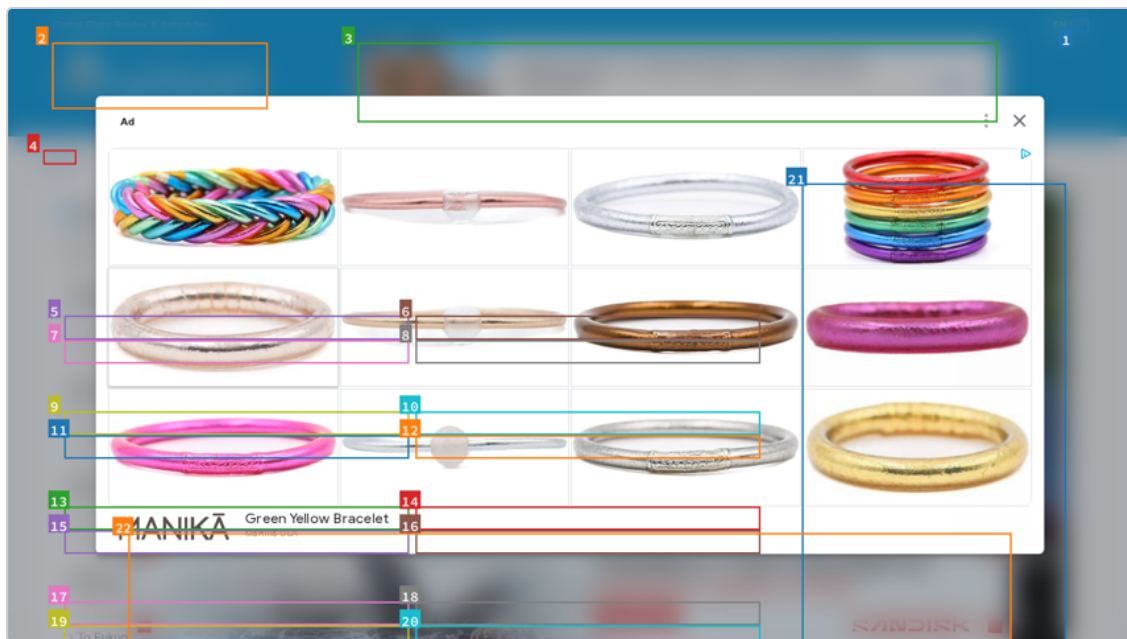

****Reasoning:**** The current page shows flight routes organized by departure airports. To proceed, I should click on one of the destinations under "Tokyo International Airport" to view the flight schedules for that route.

****Action:**** Click on a destination link under "Tokyo International Airport" to view detailed flight schedules.

```
```json
{
 "name": "click",
 "arguments": {
 "element_id": "7",
 "description": "To ShinChitose (Sapporo , Hokkaido | CTS)",
 "reasoning": "Clicking this link will likely lead to a page with detailed flight schedules for flights departing from Tokyo to ShinChitose."
 }
}
```
```

Step 2 (2025-10-09T00:07:57.044907)

Screenshots:

Response:

To extract the departure times for flights departing from Tokyo, I need to navigate to the relevant section of the webpage that displays flight schedules. The current ad overlay might be obstructing the view of the flight information. I will start by closing the ad to access the underlying content.

****Action:****

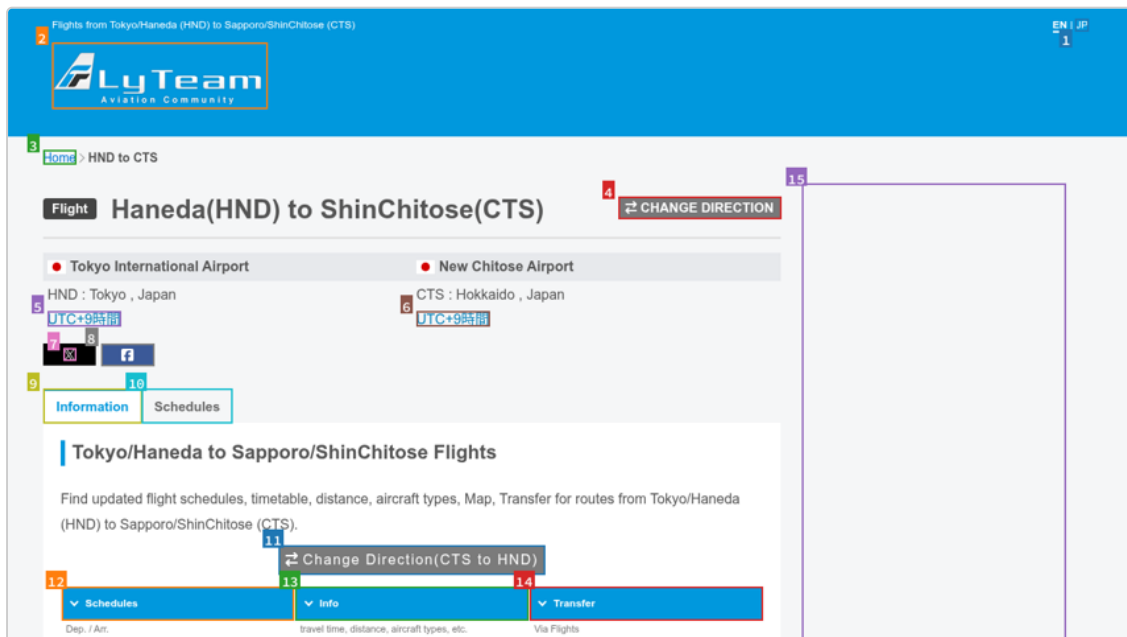

```json

```
{
 "name": "click",
 "arguments": {
 "element_id": "1",
 "description": "Close button of the ad",
 "reasoning": "Closing the ad will reveal the underlying flight schedule information"
 }
}
```

```
}
...
```

### Step 3 (2025-10-09T00:08:10.727339)

#### Screenshots:

#### Response:

To extract the departure times for flights departing from Tokyo on a specific day, I need to navigate to the "Schedules" tab, as it is likely to contain the flight schedule information.

**\*\*Reasoning:\*\*** The "Schedules" tab is the most relevant section for finding flight departure times. Clicking on it should display the schedule details.

```
```json  
{  
  "name": "click",
```

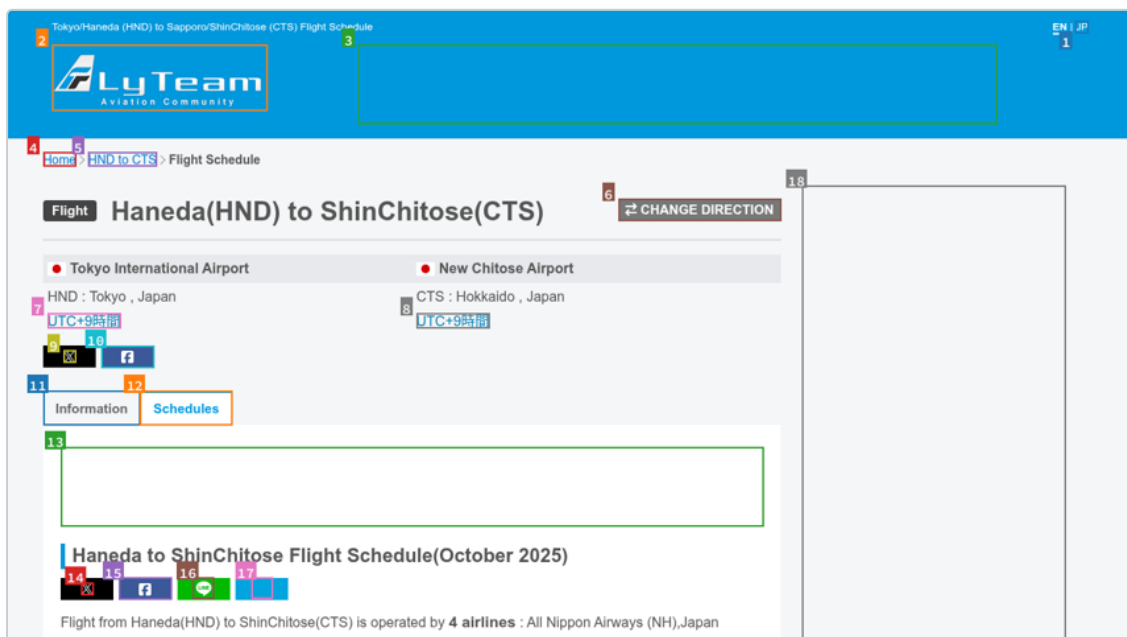

```

"arguments": {
  "element_id": "14",
  "description": "Schedules tab",
  "reasoning": "To view flight schedules and extract departure times"
}
}
...

```

Step 4 (2025-10-09T00:08:21.620032)

Screenshots:

Response:

To extract the departure times for all flights departing from Tokyo on a specific day, I need to interact with the "Schedules" tab, as it likely contains the flight schedule information. Since the task specifies a specific day, I will need to scroll or navigate to find the relevant schedule details.

****Reasoning:****

1. The "Schedules" tab (element 12) is highlighted, indicating it is the section where flight schedules are displayed.
2. The current view does not show detailed flight schedules, so I need to scroll down to find the specific departure times.

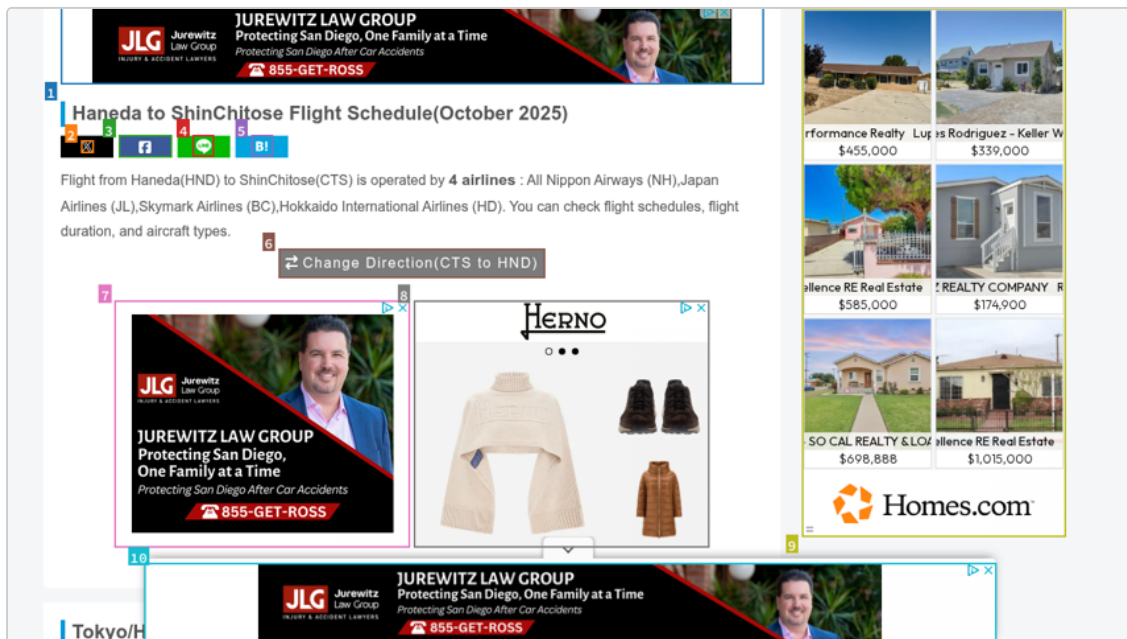

****Action:****

I will scroll down to locate the flight schedules for the specified day.

```
```json
{
 "name": "scroll",
 "arguments": {
 "direction": "down",
 "reasoning": "To find the detailed flight schedules for the specified day"
 }
}
```
```

Step 5 (2025-10-09T00:08:31.763243)

Screenshots:

Response:

To extract the departure times for flights departing from Tokyo on a specific day, I need to interact with the page to find the relevant flight schedule information. Since the current page shows general information about airlines operating between Haneda and ShinChitose, I will need to scroll or click to find the detailed flight schedule.

Reasoning:

1. The current page does not display detailed flight schedules, only general information about airlines.
2. I need to scroll down to see if the flight schedule is further down the page.
3. If scrolling does not reveal the schedule, I will need to click on a relevant link or button to access the detailed schedule.

Action:

I will scroll down the page to look for the flight schedule details.

```
```json
{
 "name": "scroll",
 "arguments": {
 "direction": "down",
 "reasoning": "I need to scroll down to find the detailed flight schedule for flights departing from Tokyo."
 }
}
```
```

Step 6 (2025-10-09T00:08:47.735299)

Screenshots:

The collage contains several screenshots:

- Top Left:** A banner for "Protecting San Diego, One Family at a Time" with the phone number 855-GET-ROSS.
- Top Center:** An image of three coats hanging on a rack.
- Top Right:** Real estate listings from Homes.com, including properties in Alvarado, Performance, and Juan Car with prices like \$455,000 and \$339,000.
- Center:** A flight schedule page titled "Tokyo/Haneda (HND) to Sapporo/ShinChitose (CTS) Flight Schedule". It shows a calendar for October 2025 and a table of flight options. The table includes columns for Flight Number, Airline, Departure, Arrival, Flight, and Airfare. The first row shows flight NH987 from All Nippon Airways.
- Bottom Left:** A legal advertisement for "JUREWITZ LAW GROUP" with the phone number 855-GET-ROSS.
- Bottom Right:** A small image of a person's face.

Response:

To extract the departure times for all flights departing from Tokyo on a specific day, I need to interact with the flight schedule table. Since the current view does not show the detailed flight information, I will scroll down

to reveal more content.

```
**Action:**
```json
{
 "name": "scroll",
 "arguments": {
 "direction": "down",
 "reasoning": "I need to scroll down to view the detailed flight schedule
and extract departure times."
 }
}
```
```

Step 7 (2025-10-09T00:09:01.845761)

Response:

To extract the departure times for all flights departing from Tokyo on a specific day, I need to identify the flights listed in the table and note their departure times. The table already provides this information, so I don't need to perform any additional actions like searching or scrolling. I will directly analyze the table and extract the departure times.

****Reasoning:**** The table already contains the required information, so no further actions are necessary. I can directly read the departure times from the table.

```
```json
{
 "name": "stop",
 "arguments": {
 "answer": "The departure times for flights departing from Tokyo are as follows:\n- NH987: 06:20\n- JL501: 06:35, 06:30, 06:25\n- BC703: 06:45\n- HD11: 06:55, 06:50",
 "reasoning": "The departure times are clearly listed in the table for each flight. No further actions are needed to extract this information."
 }
}
```
```
