

Create a crosstab that shows SUM(NumberSurvived) by Sex (on Rows) and FamilyAboard (on Columns)

```
graph LR; A[New sheet] --> B[Add [Sex] to Rows]; B --> C[Add [FamilyAboard] to Columns]; C --> D[Add [Number Survived] to Text];
```

```

graph LR
    A[New canvas] --> B[New Rows block with  
[Sex]]
    B --> C[New Inline block with  
[Number Survived]]
    C --> D[New Columns block  
with [FamilyAboard]]
  
```

TASK 1B (Titanic dataset)

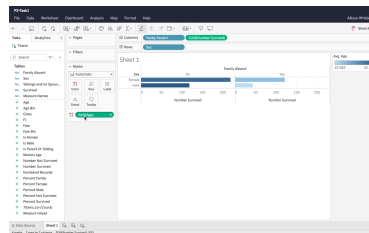

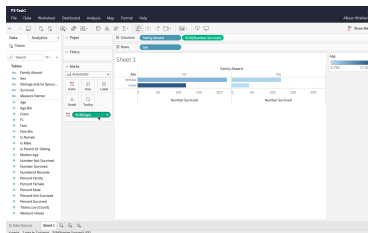

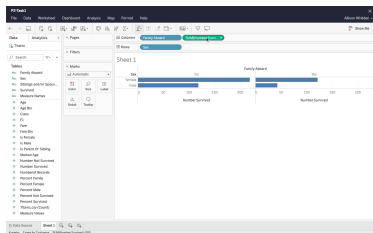

Now switch to show bar charts for number of survived
with Avg(Age) on color

Tableau

Move [Number
Survived] to Columns

Add [Age] to Color

Change aggregation for
[Age] to AVG

Blocks

Change [Number
Survived] to X-axis

Add [Age] to Inline Block

Change aggregation for
[Age] to MEAN
