

## Reference Report

No enlarged lymph nodes in pathological size and appearance were detected in the mediastinum and hilar regions. No mass or infiltrative lesion was detected in both lungs. There are millimetric nonspecific nodules in both lungs.

## Reference Report

Pericardial effusion-thickening was not observed. Heart size increased. Atherosclerotic wall calcifications were observed in the thoracic-abdominal aorta and coronary arteries. Mitral valve and aortic valve are calcified.

Non-Overlapping Normal Findings

## Generated Report

When examined in the lung parenchyma window; A 6 mm nonspecific nodule is observed in the superior lower lobe of the right lung. Aeration of both lung parenchyma is normal and no infiltrative lesion is detected in the lung parenchyma.

## Generated Report

Heart size increased. Pericardial effusion-thickening was not observed.
