Task Discovery: Finding the Tasks that Neural Networks Generalize on
Supplementary Material

`https://taskdiscovery.epfl.ch`

Abstract

The supplementary material contains the following assets:

- `overview.mp4` — a short **overview video** of the work.
- `supmat_taskviz` — a directory which contains visuals of all tasks from different task networks.
- `task-discovery-viz` — a directory which contains videos visualizing the dynamic of meta-optimization for unregulated and SSL regulated discoveries.
- `code` — a directory which contains the code used to run the experiments. See `README.md` for more details.

36th Conference on Neural Information Processing Systems (NeurIPS 2022).
