

Figure 1: 3D hand object reconstruction results from Hasson et al. CVPR 2019 and Ye et al. CVPR 2022.

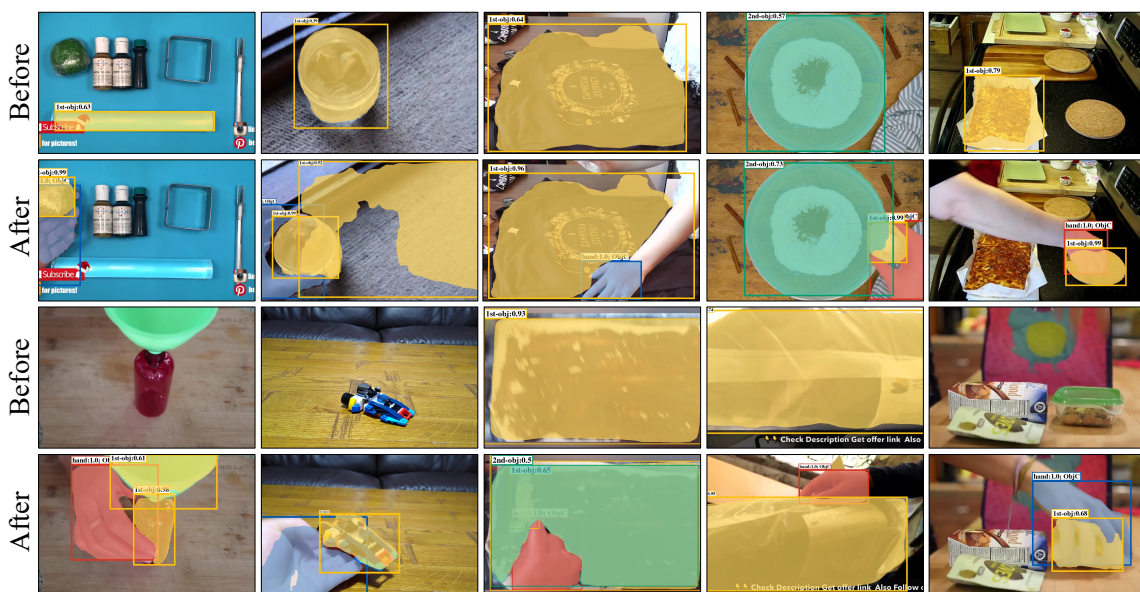

Figure 2: Implicit object relation. **Before** shows predictions when only objects exist. **After** shows predictions when hands approach and interact with objects.

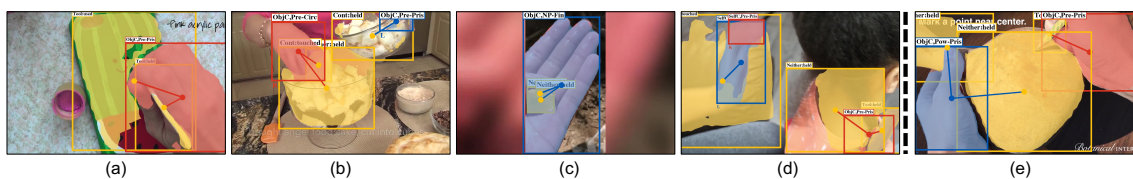

Figure 3: Examples for hand and multiple objects interactions.

Figure 4: Qualitative results on SAM dataset. Row 1 is selected results and row 2 is random.
