Hosting, Maintenance and Licensing
For AutoWS-Bench-101

Hosting

- Hosting platform for datasets: **Google Drive**; hosting platform for code: **GitHub**
- GitHub URL: https://github.com/Sala-Group/AutoWS-Bench-101

The datasets are downloaded automatically from Google Drive using our code. In the near future, we plan to move all of the datasets to a longer-term Google Drive --- the download links in our code on GitHub will be updated to reflect this.

Maintenance and Long-Term Preservation

We believe that these platforms are long-lasting, and would maintain service indefinitely. There is no cost from using GitHub. Once we migrate the dataset to the shared drive, data preservation is also cost-free as it is sponsored by UW-Madison.

Licensing

All datasets that we have been modified for our purposes have inherited the license from their source.
