

Confusion matrix for the 'Predicted label' variable. The matrix shows counts for combinations of predicted and actual labels. The x-axis is 'Predicted label' with categories 00, 01, 10, 12, 14, 20, 21, 23, 24, 32, 41, 42, 44. The y-axis is 'Actual label' with categories 00, 01, 10, 12, 14, 20, 21, 23, 24, 32, 41, 42, 44. Dark red squares indicate high counts, while light yellow squares indicate low counts.
