Professional Summary

Seasoned software developer with a decade of experience delivering enterprise-scale applications and backend services. Strong background in system architecture, DevOps, and mentoring teams to success. Focused on clean, maintainable code and user-first design.

Work Experience

Staff Software Engineer | Vertica Systems | Boston, MA | Mar 2019 - Present

- Designed and deployed scalable event-driven architectures in AWS using Lambda and DynamoDB.
- Spearheaded transition to Infrastructure as Code using Terraform.
- Reduced build times by 55% with Docker optimization and parallel CI builds.

Software Engineer | CloudNova | New York, NY | Jun 2014 - Feb 2019

- Built secure REST APIs and data pipelines with Python and PostgreSQL.
- Introduced rigorous testing standards and linting, reducing bugs by 30%.
- Collaborated closely with product owners to prioritize tech debt reduction.

Education

M.S. in Software Engineering | Columbia University | 2012 - 2014

B.S. in Computer Science | University of Michigan | 2008 - 2012
