

This file contains videos, each comprising three motion sequences generated by MoMask, BAMM, and MATE, respectively. The corresponding textual description is provided in the filename of each video. The generated motions are analyzed as follows.

1. A person tiptoes backward .	
MoMask	The person slightly tiptoes but does not move backward.
BAMM	The person neither tiptoes nor moves backward.
MATE	Correct
2. A person walks forward, increases his pace , and then leaps in the air.	
MoMask	The person neither obviously increases pace nor leaps, but instead walks upstairs.
BAMM	The person leaps and runs without starting with walking or increasing the pace.
MATE	Correct.
3. A person walks forward a few steps, turns around mid-step , places their hands on the ground and begins to crawl forward on their hands and knees.	
MoMask	The person neither walks forward nor turns around mid-step.
BAMM	The person neither walks forward nor turns around mid-step.
MATE	Correct.
4. He steps forward and picks something from a shelf, then turns, walks back, turns around, and returns it .	
MoMask	The person returns something before turning around, and does not return it to its original location.
BAMM	The person returns something before turning around, and does not return it to its original location.
MATE	Correct.
5. A person walks quickly in a counterclockwise circle.	
MoMask	The person does not walk noticeably quickly.
BAMM	The person walks in a clockwise circle, and not at a noticeably fast pace.
MATE	Correct. The person walks obviously faster than in the other two motions.
