

SCOPE OF THE JOURNAL

The *IEEE Transactions on Software Engineering (TSE)* is published bimonthly. We are interested in well-defined theoretical results and empirical studies that have potential impact on the construction, analysis, or management of software. The scope of this Transactions ranges from the mechanisms through the development of principles to the application of those principles to specific environments. Specific topic areas include: a) development and maintenance methods and models, e.g., techniques and principles for the specification, design, and implementation of software systems, including notations and process models; b) assessment methods, e.g., software tests and validation, reliability models, test and diagnosis procedures, software redundancy and design for error control, and the measurements and evaluation of various aspects of the process and product; c) software project management, e.g., productivity factors, cost models, schedule and organizational issues, standards; d) tools and environments, e.g., specific tools, integrated tool environments including the associated architectures, databases, and parallel and distributed processing issues; e) system issues, e.g., hardware-software trade-off; and f) state-of-the-art surveys that provide a synthesis and comprehensive review of the historical development of one particular area of interest.

SUBMISSION OF MANUSCRIPTS FOR PEER REVIEW

The information below is a summary of our guidelines detailed at the *TSE* author center, www.computer.org/mc/tse/author.htm. All authors are responsible for understanding these guidelines before submitting their manuscript.

Manuscript Central

The IEEE Computer Society is now employing a secure, Web-based manuscript submission and peer-review tracking system called Manuscript Central. To submit a manuscript, please visit <http://cs-ieee.manuscriptcentral.com>. The site contains detailed instructions on usage and submission requirements.

TSE Manuscript Specifications

- Regular papers—14 double-column pages, using the IEEE CS template*
- Short papers—8 double-column pages, using the IEEE CS template*

*These page limits include references and reasonably-sized figures.

A double-column page is defined as an 7.875" x 10.75" page with 9.5-point type and 12-point vertical spacing, Margins should be one inch all around (for top, bottom, right, and left).

Templates for submitting manuscripts can be downloaded from the *TSE* author center.

Online First Publication Model

Please be advised that as of 1 January 2007, the IEEE Computer Society will move to an online first publication model which means that accepted papers will be posted online shortly after all publication materials are received. Author PDF will be stamped as a "Preprint" and sent to the IEEE for posting in Xplore. After the paper has been edited and proofs reviewed, it will then be restamped as a "Rapid Post," indicating that the paper is complete with the exception of pagination. Authors that do not wish to participate in this program should notify the Transactions Assistant upon acceptance of the paper.

Supplemental Material

Supplemental material can include relevant proofs, code, experimental data, short movies, appendices, animations, audio, etc.

All supplemental material will undergo the peer review process along with the paper.

Supplemental material will be published on our Digital Library with the electronic version of the paper, where it can be accessed for free, and a pointer to the supplemental material will be included in the printed version.

For information on submitting final publication materials, please visit www.computer.org/author/transguide/electronicsub.html.

SUBMISSION POLICIES

Submissions to *TSE* must represent original material. Papers are accepted for review with the understanding that the same work has been neither submitted to, nor published in, another journal.

Concurrent submission to these Transactions and other publications is viewed as a serious breach of ethics and, if detected, will result in immediate rejection of the submission.

However, papers previously published in conference proceedings, digests, preprints, or records are eligible for consideration provided that the papers have undergone substantial revision and that the author informs the Transactions Assistant and editor-in-chief at the time of submission. A version of the previously published work will need to be sent to our office, and a brief description of the differences will need to be provided.

COPYRIGHT INFORMATION

The author is responsible for obtaining copyright releases and corporate and security clearances prior to submitting material for consideration.

Please refer to the IEEE policies (www.ieee.org/about/whatis/policies/p6-4.xml) on authorship (section A), duplication publication, and self-plagiarism (section B(f) and (h)) to ensure that your paper meets all criteria for submission.

It is the IEEE's policy (Policy 6.16) to assume that all clearances are granted when a paper is submitted.

For more information about our copyright policies, please visit www.computer.org/copyright.htm.

MANDATORY OVERLENGTH PAGE CHARGES

There is no length limit on regular papers for *TSE*. However, it is highly recommended that papers not exceed 14 journal pages, judged by using the two-column IEEE CS author submission template. Papers that exceed this recommended length might suffer from delays in editorial review or publication. Accepted papers that exceed 14 journal pages will be charged mandatory page charges on the excess pages unless there is clear evidence and support from the reviewers and Associate Editor or approval by the EIC that the content justifies the length of the paper.

Independent of any voluntary page charges, the IEEE Computer Society assesses the authors of accepted papers that exceed the regular paper length limit a fee called Mandatory Overlength Page Charge (MOPC). The regular paper page length limit is defined at 14 formatted pages, including references and author biographies. Any pages or fraction thereof exceeding this limit are charged \$200 per page.

Authors will be notified of any assessed charges when galley proofs are sent for review. Payment must be sent at the time galley proofs are approved by the author.

The IEEE Computer Society's policy on page limits as described here is strictly enforced.

Ordering Reprints

Information about purchasing reprints can be found at www.computer.org/author/reprint.htm.

For additional information or to inquire about the status of a paper awaiting production, please visit the IEEE Computer Society Web site or contact the *TSE* Transactions Assistant.
