ABSTRACT

Selecting high-quality pre-training data is important for creating capable language models, but existing methods rely on simple heuristics. We introduce QuRating, a method for selecting pre-training data that captures the abstract qualities of texts which humans intuitively perceive. In this paper, we investigate four qualities—*writing style*, *required expertise*, *facts & trivia*, and *educational value*. We find that LLMs are able to discern these qualities and observe that they are better at making pairwise judgments of texts than at rating the quality of a text directly. We train a QuRater model to learn scalar ratings from pairwise judgments, and use it to annotate a 260B training corpus with quality ratings for each of the four criteria. In our experiments, we select 30B tokens according to the different quality ratings and train 1.3B-parameter language models on the selected data. We find that it is important to balance quality and diversity, as selecting only the highest-rated documents leads to mixed results. When we sample using quality ratings as logits over documents, our models achieve lower perplexity and consistently stronger in-context learning performance than baselines. Beyond data selection, we use the quality ratings to construct a training curriculum which improves performance without changing the training dataset. We extensively analyze the quality ratings and discuss their characteristics, biases, and wider implications.¹

1 INTRODUCTION

There is increasing evidence that choosing the right training data is essential for producing state-of-the-art large language models (LLMs) (Brown et al., 2020; Chowdhery et al., 2023; Rae et al., 2021). Researchers have found that model performance can be improved by deduplicating training data (Lee et al., 2022; Abbas et al., 2023), finding the right balance of domains (Touvron et al., 2023a; Xie et al., 2023a), or selecting data that resembles a high-quality corpus (Brown et al., 2020; Chowdhery et al., 2023; Xie et al., 2023b). However, the ideal properties of training data remain hard to characterize; an improved understanding could enable open research to train stronger models under resource constraints.

In this work, we aim to capture the abstract qualities of texts which humans intuitively perceive. As part of our approach, which we call QuRating (**quality rating**),² (1) we compare pairs of texts along a quality criterion, (2) we train a model that translates the resulting judgments into scalar quality ratings, (3) we use these ratings to select pre-training data, and (4) we identify which abstract qualities are valuable by training language models on the selected subsets and evaluating their performance.

Throughout the paper, we focus on four particular qualities of a text as our criteria for data selection: the text’s *writing style*, the amount of *facts & trivia* it contains, its *educational value*, and the *required expertise* needed to understand it. These qualities are necessarily subjective. However, we verify that state-of-the-art LLMs can discern their presence in clear-cut cases. In particular, we find that LLMs produce stable and accurate judgments when prompted to compare documents in a pairwise setting.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate the LLM-derived pairwise judgments into quantitative ratings for each piece of text. We treat the ratings as logits over documents,

¹To encourage further research, we release models and data at <https://github.com/princeton-nlp/QuRating>.

²QuRating/QuRater can be pronounced like curating/curator.

from which we sample without replacement for subset selection. We add a temperature τ to trade off quality and diversity: $\tau \rightarrow 0$ becomes top- k selection, while $\tau \rightarrow \infty$ is equivalent to uniform random sampling. We show that in this formulation, quality ratings are connected to rewards in RLHF (Ouyang et al., 2022).

For our experiments, we query GPT-3.5 to judge 250K text pairs for each of the four quality criteria and fine-tune a Sheared-Llama-1.3B model (Xia et al., 2023) to learn the implied quality ratings. We then use this fine-tuned *QuRater* model to predict quality ratings across 260B tokens from the SlimPajama corpus (Soboleva et al., 2023) to produce the *QuRatedPajama* dataset. Finally, we train new 1.3B-parameter language models from scratch by selecting subsets of 30B out of 260B tokens. We compare our method to uniform sampling and importance resampling (Xie et al., 2023b) with respect to high-quality domains. Our evaluation focuses on in-context learning on 10 diverse tasks as a measure of model capability (Gao et al., 2021).

We find that selecting only the highest-rated documents can produce models that excel at particular tasks but perform worse than uniform selection in others. Sampling with a temperature τ produces more consistent results across tasks and improves validation perplexity. When we use our best selection criterion, *educational value*, we improve in-context learning (ICL) performance on all 10 tasks by an average of 1.8% compared to uniform selection. Similarly, selecting data rich in *facts & trivia*, improves performance on 8 tasks by an average of 1.3%. Selecting based on *writing style* leads to the best perplexity but surprisingly does not lead to substantial improvements in downstream task performance. We explore leveraging the quality ratings to build a training curriculum. Our experiments show that models trained on data ordered based on *required expertise* outperform models which are trained on the same data in a random order.

We perform an extensive analysis of the quality ratings. For each domain, we study the distribution of ratings and report insights from inspecting high and low-ranking documents. Finally, we document the social impact of QuRating data selection by applying our method to documents annotated with social roles, topics, and geographical information in the AboutMe dataset (Lucy et al., 2024).

Our work demonstrates how intuitive notions about data quality can be used to effectively select training data at scale. We release our code, the GPT-3.5 outputs, the fine-tuned QuRater model and the annotated SlimPajama subset to encourage data exploration and efficient LLM training.

2 BACKGROUND

We review some best practices in LLM data engineering and discuss them in relation to our approach.

Rule-based heuristics. Data selection pipelines commonly include hand-crafted heuristics that filter out low-quality data (Rae et al., 2021; Laurençon et al., 2022; TogetherAI, 2023; Penedo et al., 2023; Soldaini et al., 2023). These typically involve thresholds on mean word length, stop word fraction, and word repetitions, e.g., the so-called C4 filters (Raffel et al., 2020) and the Gopher rules (Rae et al., 2021). While binary rules are useful for excluding noisy internet artifacts, we need more precise quality measures to identify the most desirable examples in a dataset.

Model-based heuristics. In *heuristic classification* (Brown et al., 2020), a bigram discriminator model selects data that resembles a high-quality target domain, such as Wikipedia articles. This paradigm has been widely adopted (Du et al., 2022; Gao et al., 2020; Chowdhery et al., 2023; Touvron et al., 2023a). In Data Selection with Importance Resampling (DSIR), Xie et al. (2023b) sample from generative models instead of discriminators, and show that this improves performance. We argue that an entire domain such as Wikipedia is an imprecise proxy for data quality. Another popular method is perplexity filtering (Wenzek et al., 2020; Muennighoff et al., 2023; Marion et al., 2023), i.e., choosing data that has high likelihood under a language model. However, we note that this includes data with simple and repetitive content, which is easy to predict for a model.

LLM quality signals. Most similar to our work, Gunasekar et al. (2023) filter data by querying GPT-4 to identify documents with “educational value for a student whose goal is to learn basic coding concepts”. In contrast to our work, they augment filtered web data with synthetic data generated by LLMs. We study four quality criteria and use pairwise comparisons, which produce more stable rankings with GPT-3.5. Our work is also connected to Korbak et al. (2023), who incorporate human

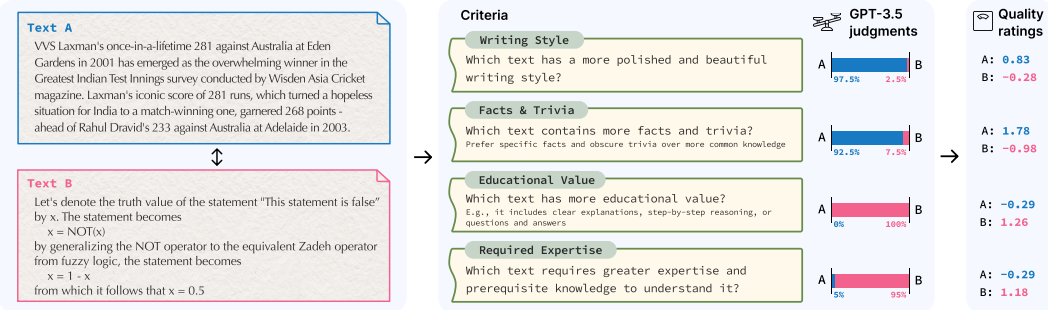

Figure 1: We consider a pair of texts and report the judgments we elicit from GPT-3.5 as to which text it prefers, using different prompts that correspond to different qualitative criteria. We also report the quality ratings which we ultimately use for data selection. These ratings are given by our QuRater model, which is trained to assign ratings that best correspond to pairwise judgments.

preferences into LM training and focus on toxicity and privacy. We select data with the goal of teaching language models strong skills with fewer samples.

Deduplication. Deduplicating training data has become standard practice (Lee et al., 2022; Anil et al., 2023; Touvron et al., 2023a), as it improves language models by removing repeated training data and boosting sample diversity. Deduplication is usually done in a fuzzy or semantic manner (Jiang et al., 2023; Abbas et al., 2023; Tirumala et al., 2023). While it reduces the number of documents in a corpus, it is not well-suited to sample a subset of a specific size. Rather, it should be run before selecting data based on quality.

3 QUANTIFYING QUALITATIVE ASPECTS OF TEXT

We develop a method which can directly capture human intuition about data quality and leverage it for scalable data selection. We obtain fine-grained quality signals without having to craft heuristic rules or select proxy domains.

3.1 OVERVIEW OF THE METHOD

We associate a *quality criterion* with a question that asks which of two pieces of text (t_A, t_B) exhibits a certain quality to a higher degree. We record the probability $p_{B>A}$ with which a judge chooses B over A . In this paper, we sample pairs of texts from a vast collection of documents and use a large language model (LLM) to judge them based on the criterion. Thus, we can rapidly create large datasets of judgments $\mathcal{J} = \{(t_i, t_j, p_{i>j})\}$.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate binary judgments into scalar quality ratings,

$$p_{B>A} = \sigma(s_B - s_A),$$

where σ is the sigmoid function, and the ratings are estimated using maximum-likelihood estimation. We parametrize the ratings with a so-called *QuRater* model $s_\theta(t_i)$, which is trained with the binary cross-entropy loss,

$$\mathcal{L}_\theta = \mathbb{E}_{(t_A, t_B, p_{B>A}) \in \mathcal{J}} \left[-p_{B>A} \log \sigma(s_\theta(t_B) - s_\theta(t_A)) - (1 - p_{B>A}) \log \sigma(s_\theta(t_A) - s_\theta(t_B)) \right].$$

This parallels the training of reward models in Reinforcement Learning from Human Feedback (RLHF) (Ouyang et al., 2022) without conditioning the models on user input.

3.2 CHOICE OF CRITERIA AND PROMPTS

Which abstract qualities of text are most deserving of study? We argue that the most interesting criteria (1) are applicable to a wide variety of text, (2) require a deeper understanding of a text's

content, which cannot easily be derived from surface features, (3) result in fine-grained rankings with few ties, (4) are complementary to each other. After exploring different candidates and iterating on their prompts, we choose the following four questions as our criteria:

- *Which text has a more polished and beautiful **writing style**?* We use “style” to emphasize the writing over the subject matter. In our exploration, “beautiful” and “polished” favor literary and academic writing, respectively.
- *Which text contains more **facts and trivia**?* *Prefer specific facts and obscure trivia over more common knowledge.* Inspired by LLMs’ potential applications as knowledge bases (Petroni et al., 2019), we aim to identify texts that have a high density of long-tail factual knowledge. We find that adding “trivia” helps the LLM choose facts about niche topics and fictional worlds.
- *Which text has more **educational value**?* *E.g., it includes clear explanations, step-by-step reasoning, or questions and answers.* Following Gunasekar et al. (2023), we prompt for educational value and specify some properties that are considered particularly valuable for inducing reasoning capabilities in LLMs, e.g., “step-by-step reasoning” resembles Chain-of-Thought prompting (Wei et al., 2022; Kojima et al., 2022).
- *Which text **requires greater expertise and prerequisite knowledge to understand it**?* It is interesting to study how the difficulty level of the training corpus affects model capabilities. We also explore designing a training curriculum based on this criterion.

We show how these prompts act on two contrasting texts in Figure 1. The full prompts can be found in Appendix A.

Prompt validation. As quality judgments are ultimately subjective, we evaluate the prompts on clear-cut cases. For each criterion, we curate two sets of 40 documents from the web with clear differences in quality. We describe the specific constitution of this dataset in Table 4 in the appendix. We choose GPT-3.5-turbo-0613 as the LLM judge and evaluate the agreement with our preferences on 1600 document pairs. Using our prompts, GPT-3.5 agrees with our preferences over 97% of the time on all the criteria except *facts & trivia*, on which we achieve 92% agreement.

3.3 WHY USE PAIRWISE COMPARISONS?

Previous work explores using LLMs to judge individual texts (Gunasekar et al., 2023). We observe that LLMs are better at comparing texts than they are at judging individual texts; specifically, they produce more reliable judgments in pairwise settings, and can better discriminate between texts with fine variations in quality.

In a case study, we rank 10 documents (see Table 5 in Appendix A) based on the authors’ collective perception of their *writing style*. We use this ranking to study the LLM’s ability to measure subtle gradations in quality. We ask GPT-3.5 to (1) rate the documents’ *writing style* on a 1 to 10 scale or (2) make pairwise judgments for all pairs of these 10 documents. We evaluate the Kendall tau rank coefficient with our human judgment on all 45 pairs of documents and find that with GPT-3.5 achieves 0.79 ± 0.01 in the pairwise setting, compared to 0.61 ± 0.06 for individual judgments, where we compute standard deviations over 3 runs.

Pairwise judgments are usually easier to verify for human annotators, while it is difficult to assess the correctness of the precise grade assigned to a document. Research in psychology and education suggests that pairwise judgments improve human self-consistency and inter-annotator agreement (Thurstone, 1927; Pollitt, 2012); and have been found to be useful in the specific setting of evaluating essays (Pollitt & Crisp, 2004; Lesterhuis et al., 2022). In machine learning, pairwise comparisons have been used in assessing LM outputs (Ouyang et al., 2022; Dubois et al., 2023; Zeng et al., 2024) and in information retrieval (Gienapp et al., 2022; Sun et al., 2023; Qin et al., 2023).

3.4 TRAINING THE QURATER MODEL

Having settled on criteria and prompts, we produce a large-scale dataset of criterion-wise judgments on 250K text pairs by querying GPT-3.5-turbo-0613. For each text pair, we prompt the LLM in both (t_A, t_B) and (t_B, t_A) order, and produce multiple generations, which we average to compute

the overall confidence $p_{B>A}$. This counteracts the positional bias observed in pairwise comparisons with LLMs (Wang et al., 2023; Zeng et al., 2024).

The dataset is derived from 500K unique documents in SlimPajama (Soboleva et al., 2023), a web-scale pre-training corpus based on RedPajama (TogetherAI, 2023). For each pair of documents, we extract snippets of at most 512 Llama tokens (Touvron et al., 2023a). Specifically, 200K pairs are sampled randomly across all domains, and an additional 10K pairs are sampled within each of the five specialist domains Wikipedia, Book, StackExchange, Github, ArXiv. In Appendix B, Table 6 shows that we obtain many confident LLM judgments across domains, and Figure 3 shows that the judgments are not strongly correlated between criteria.

We fine-tune a 1.3B parameter Sheared-Llama model (Xia et al., 2023) on the dataset of pairwise LLM judgments. We employ a multi-task setup with separate regression heads for different criteria, which allows efficient prediction of multiple quality criteria in one forward pass. In Appendix B, we discuss the training setup in detail and show that the QuRater model has over 93% accuracy on held-out judgments.

4 SELECTING DATA BY QUALITY RATING

Our goal is to select a subset of documents from a large-scale corpus. We introduce the following framework for sampling according to quality ratings.

Let each document d_i in a corpus \mathcal{D} be annotated with a quality rating s_i , assigned by the QuRater model. We sample documents without replacement according to,

$$p(d_i) \propto \exp\left(\frac{s_i}{\tau}\right),$$

normalized over the corpus \mathcal{D} . This sampling scheme implicitly changes the language modeling objective to reward-weighted regression (Korbak et al., 2023; Peters & Schaal, 2007). We sample without replacement following Xie et al. (2023b), as it increases sample diversity and also allows for efficient sampling via the Gumbel top- k trick (Kim et al., 2016; Kool et al., 2019; Vieira, 2014).

The temperature term τ controls the sample diversity. As $\tau \rightarrow 0$, this strategy becomes top- k selection, the most straightforward approach of incorporating quality signals. At $\tau \rightarrow \infty$, it is equivalent to the uniform sampling baseline.

Quality ratings as rewards. In Appendix C, we show the quality ratings are connected to rewards in Reinforcement Learning from Human Feedback (RLHF) (Ouyang et al., 2022; Rafailov et al., 2023) when using this sampling strategy. For large enough sample sizes, our method approximates pre-training a language model on a random subset of the dataset, and then using RLHF to steer the language model towards generating documents with higher quality ratings. The temperature τ becomes the weight of the KL-divergence term in the RLHF objective, constraining the RLHF model to be similar to the pre-trained model. Unlike the typical rewards used in RLHF, the quality ratings are not conditioned on user input and should serve a different purpose: to guide the model towards data from which it can learn generalizable skills (Arora & Goyal, 2023; Yu et al., 2024) and useful world knowledge (Li et al., 2023).

Curriculum from quality ratings. Sampling without replacement naturally leads to a training curriculum. In regular language model training, the examples are randomly shuffled after data selection. However, if we train on examples in reverse order in which they were sampled, examples with low quality ratings are more likely to appear at the start of training and highly-rated examples towards the end of training. This is particularly interesting when there is sufficient budget to train on the entire corpus \mathcal{D} .

5 EXPERIMENTS

We verify the QuRating approach in practice by training language models from scratch.

5.1 SETUP

QuRatedPajama. We annotate a 260B token corpus with quality ratings across our four criteria—using the QuRater model from Section 3.4—to produce QuRatedPajama. The corpus is a subset of documents from SlimPajama (Soboleva et al., 2023), an extensively deduplicated version of RedPajama (TogetherAI, 2023), and consists of sequences of 1024 tokens using the Llama tokenizer (Touvron et al., 2023a). Since the QuRater model was only fine-tuned on short sequences, we compute the document-level quality rating by averaging over contiguous segments of up to 512 tokens weighted by their segment length. While the annotation process is expensive (equivalent to 514 NVIDIA H100 hours), it can be massively parallelized, and the resulting quality ratings can serve many purposes, e.g., data selection, curriculum training or data discovery.

Training. Using different data selection methods, we select a subset of 30B tokens from QuRatedPajama and train a randomly initialized language model on this training set for one epoch in a randomly shuffled order. The models have 1.3B parameters and use a transformer architecture (Vaswani et al., 2017) with RoPE embeddings (Su et al., 2024). Further details can be found in Appendix D. We train on slightly more data than the compute-optimal amount (Hoffmann et al., 2022). However, a larger number of training tokens should give a clearer signal regarding data quality.

Evaluation. We aim to provide a holistic evaluation of the language models trained on 30B tokens:

- We measure the perplexity over 50M tokens from SlimPajama’s random validation split. We report both overall perplexity and perplexity on each of the source domains.
- We evaluate the in-context learning (ICL) performance using `lm-evaluation-harness` (Gao et al., 2021). We study a wide range of tasks, covering reading comprehension (ARC-easy/challenge (Clark et al., 2018), SciQA (Welbl et al., 2017), LogiQA (Liu et al., 2020), BoolQ (Clark et al., 2019)), commonsense reasoning (HellaSwag (Zellers et al., 2019), PIQA (Bisk et al., 2020), WinoGrande (Sakaguchi et al., 2021)), and knowledge-intensive tasks (NQ (Kwiatkowski et al., 2019), MMLU (Hendrycks et al., 2021)). We choose the number of few-shot examples per task depending on the length of the demonstrations to ensure that all examples fit within the context window of 1024 tokens.
- We evaluate the instruction-following capabilities of our models, borrowing the setting used by Xia et al. (2023). We perform supervised fine-tuning on 10,000 instruction-response pairs from the ShareGPT dataset. We evaluate on another 1,000 instructions and use the AlpacaFarm codebase (Dubois et al., 2023) to judge the responses from two models with GPT-4.

5.2 DATA SELECTION METHODS

In each experiment, we sample a 30B-token training dataset from QuRatedPajama. We compare the following methods:

- *Sample with QuRating:* For each of the four criteria, we sample according to the quality ratings as described in Section 4. We normalize the variance of the quality ratings to be 1 and then sample with temperatures $\tau \in \{0.0$ (i.e., top- k selection), 1.0, 2.0}.
- *Inverse sampling:* As a control study, we repeat the above procedure with transformed quality ratings $s_i \rightarrow -s_i$ to select the lowest-rated documents.
- *Mix of criteria:* We explore the setting of merging the QuRating-sampled data for $\tau = 2.0$ for the four criteria, and subsampling it randomly to 30B tokens, while taking care to exclude duplicate documents.
- *DSIR:* We apply data selection with importance resampling (DSIR) (Xie et al., 2023b) and select examples that resemble either English Wikipedia or the Book domain (TogetherAI, 2023)—commonly used as proxies for quality (Brown et al., 2020; Touvron et al., 2023a; Xie et al., 2023b). We follow Xie et al. (2023b) and train hashed bigram models on QuRatedPajama and the target data.
- *Uniform:* We select randomly with a uniform probability across documents, equivalent to $\tau \rightarrow \infty$.

For all experiments, we select a proportionate amount of data from each subdomain in SlimPajama. We leave it to future work to combine QuRating with methods that optimize the domain mixture (Xie et al., 2023a).

Table 1: QuRating improves average few-shot in-context learning (ICL) results when sampling with temperature $\tau = 2.0$. The number of demonstrations (shown in parentheses) varies by task depending on the overall prompt length. We report accuracy for all tasks, except for NQ, where we report EM, and highlight the best result in each column. The results for all models can be found in Table 10 in Appendix D. Abbreviations: HellaSw. = HellaSwag, W.G. = WinoGrande.

5.3 RESULTS

We report the perplexity of the models in Table 2, the ICL results in Table 1, and the instruction following evaluation in Figure 3. The full set of results can be found in Appendix D.

Sampling is better than top-k selection. Selecting only the top-k documents for training a language model results in substantially worse perplexity and severe performance drops in many ICL tasks. This suggests that the best-rated documents do not have good coverage of the overall text distribution. Our sampling strategy is effective at alleviating this, and typically leads to gains across many ICL tasks. Increasing sample diversity further with a temperature of $\tau = 2.0$ improves perplexity over uniform sampling, despite the shift between the train and test distribution.

Choice of criterion. Selecting data with good *writing style* yields the lowest perplexity, but surprisingly, the smallest improvements in ICL performance. The model trained with high *educational value* shows the most consistent gains on ICL, and with $\tau = 2.0$ improves on uniform sampling on every single task. It is the only model that gives a clear win rate of 57.3% against the uniform model after instruction tuning in Figure 3. *Facts & trivia* and *required expertise* improve ICL performance on average, and provide substantial gains in reading comprehension and world knowledge tasks, but perform worse at commonsense reasoning. In our control experiments, in which we sample from the lowest quality ratings, no criterion leads to meaningful ICL improvements on average. However, selecting documents low in *facts & trivia* or *required expertise* benefits all 3 commonsense tasks, see Table 10 in the appendix.

Table 2: Perplexity of the trained models on 50M sequences from the SlimPajama validation split. τ is the sampling temperature, which is equivalent to top-k selection at 0, and *lowest* corresponds to using inverse sampling. The breakdown of perplexity by domain can be found in Table 9 in Appendix D.

Selection Method	PPL			
Uniform	8.96			
DSIR with Wikipedia	10.67 ^{11.71}			
DSIR with Book	11.00 ^{12.04}			
QuRating	<i>top-k</i>	$\tau=1.0$	$\tau=2.0$	
Writing	<i>highest</i>	10.53 ^{11.57}	9.04 ^{10.08}	8.90 ^{40.06}
Style	<i>lowest</i>	11.10 ^{12.14}	9.16 ^{10.20}	8.96
Facts & Trivia	<i>highest</i>	10.56 ^{11.60}	9.08 ^{10.12}	8.91 ^{40.05}
	<i>lowest</i>	10.90 ^{11.94}	9.17 ^{10.21}	8.97 ^{40.01}
Edu. Value	<i>highest</i>	10.59 ^{11.63}	9.08 ^{10.12}	8.91 ^{40.05}
	<i>lowest</i>	11.23 ^{12.27}	9.22 ^{10.26}	8.98 ^{40.02}
Required Expertise	<i>highest</i>	11.54 ^{12.58}	9.11 ^{10.15}	8.93 ^{40.03}
	<i>lowest</i>	11.28 ^{12.32}	9.16 ^{10.20}	8.95 ^{40.01}
QuRating: mix of criteria	8.90 ^{40.06}			

Table 3: Instruction following win rates of models trained with QuRating ($\tau = 2.0$) vs. uniform data selection after instruction fine-tuning on 10K ShareGPT examples.

Mix of criteria. Mixing the selected subsets across criteria results in the lowest perplexity overall. While this approach leads to better average ICL performance than baselines, it does not outperform selection using only *educational value* or *facts & trivia*. This may be since 25% of the data is selected based on *writing style*, our worst performing criterion. We are optimistic that future work may find more effective ways of combining criteria.

5.4 CURRICULUM LEARNING

Setting. We train two additional models on the 30B token dataset created with uniform selection. However, we change the order in which samples are seen during training based on *required expertise*. Specifically, we use our sampling method (Section 4) with temperature $\tau = 2.0$, and train on data in the same order in which it was sampled (high \rightarrow low expertise), or in the reverse order (low \rightarrow high expertise). This explores whether quality ratings are useful in forming a curriculum without changing the set of training examples.

Results. The evaluation results for perplexity and ICL are included in the appendix in Tables 9 and 10 respectively. We find that, even when training on the same set of examples, quality ratings are still useful for improving performance, compared to training with a randomly permuted sample order. Both the curriculum of low-to-high expertise and its reverse improve average ICL performance by 0.6% and 0.5% respectively, with strong performance in different tasks. However, only the curriculum of increasing expertise improves perplexity on held-out data.

6 ANALYSIS OF QUALITY RATINGS

Understanding the nature of quality ratings on a such a vast amount and variety of data is challenging. We begin by studying the distribution of ratings across domains, as well as across unsupervised clusters when domains are too coarse. We then inspect raw documents across these distributions and discuss our observations. Lastly, we document the social, topical, and geographical biases of our approach by applying it to the AboutMe dataset (Lucy et al., 2024).

6.1 DISTRIBUTION OF QUALITY RATINGS

We sample 1M sequences from QuRatedPajama and visualize the normalized quality ratings across the different RedPajama domains (TogetherAI, 2023). CommonCrawl and C4 constitute the majority of training data, but lack interpretable metadata. We therefore leverage techniques in unsupervised domain discovery. We follow Gururangan et al. (2023) and implement k -Means clustering with $k = 25$. We name the clusters by the most salient TF-IDF terms at the cluster centroids.

In Figure 2, we plot the distribution of quality ratings across the Wikipedia, Book, StackExchange, Github and ArXiv domains. The results align with expectations: The Book domain has high ratings for *writing style*; a subset of Wikipedia is particularly rich in *facts & trivia*; ArXiv requires particularly high *expertise*. However, each domain contains a wide range of ratings, suggesting that it would be sub-optimal to select data by simply picking domains, e.g., all domains contribute towards the overall top 5% of documents in terms of *educational value*.

We visualize the distributions for the cluster in CommonCrawl and C4 in Figure 4 in the appendix. They are similarly encouraging, e.g., the clusters associated with *cells*, *protein*, *gene* and *energy*, *climate*, *species* are rated highly on *required expertise*, *educational value*, and *facts & trivia*. Meanwhile, the *book*, *author* cluster tends to obtain high ratings in *writing style*. However, almost all clusters encompass a wide range of quality ratings.

Comparison to perplexity filtering. We compare sequence-level log-likelihood scores from Llama-2-7b (Touvron et al., 2023b) with the quality ratings across 1M training sequences and visualize the relationship in Figure 6 in the appendix. We observe that documents with low quality ratings have a wide range of likelihoods, and the Spearman correlation coefficient varies between 0.50 for *writing style* to -0.02 for *required expertise*. Therefore, QuRating is meaningfully different from selecting texts based on perplexity scores from a strong LLM (Marion et al., 2023).

Figure 2: Distribution of quality ratings per domain, normalized for each criterion to have zero mean and unit standard deviation.

6.2 DATA INSPECTION

We study raw documents from each of the domains and clusters discussed in Section 6.1. We select training examples at the 5th, 30th, 70th and 95th percentile for each criterion, and feature random extracts in Appendix F without any cherry-picking. While this is a minute sliver of the training data, the documents still exhibit clear qualitative differences and we invite the reader to inspect them in the appendix.

Behavior on code. Table 15 shows text extracts at different quality percentiles for each of the four criteria on documents from Github. Although not designed for code, the quality ratings correlate with reasonable traits. We notice *writing style* and *facts & trivia* prefer code with comments and documentation; *required expertise* ranks a CSS stylesheet lowest and embedded system code highest. The document with the 95th percentile *educational value* rating is a markdown explaining Ruby string manipulation in Spanish. We also highlight that in the StackExchange domain (Table 14), the lower-ranked documents include convoluted stack traces, logs, XML, HTML, and CSS documents, while higher-ranked documents contain a mix of code and natural language.

Preference for English. While there are high-ranking documents in non-English languages (e.g., the abovementioned Ruby tutorial), we observe a bias towards English across domains. This manifests most clearly in the Wikipedia domain (see Table 12), which is relatively rich in non-English text. We investigate this observation more quantitatively in Appendix E, where we confirm that the QuRater model rates English data slightly higher on average. Since we explicitly instruct GPT-3.5 to ignore language in its judgements in Section 3.2, this highlights the need for more sophisticated approaches to de-bias model judgements.

Educational shortcut. We notice a potential shortcoming in the model’s understanding of the *educational value* criterion. Some highly-rated documents are *about* education-related topics (schools, universities, etc.) but not inherently educational; see Tables 29, 33 and 41. This may be remedied with a better prompt or a stronger judge like GPT-4.

7 CONCLUSION

Training corpora for state-of-the-art language models are becoming increasingly large, such that there are concerns that models may run out of data (Muennighoff et al., 2023). However, under resource constraints, informed data selection with QuRating is an avenue for improving language models. However, future work is necessary to study and reduce social and cultural biases inherent in data selection. To facilitate further research, we release the pairwise judgements, the resulting QuRater model, the language model checkpoints and the annotated QuRatedPajama.

ETHICS STATEMENT

Language models are increasingly applied in real-world scenarios, and their behavior is inextricably linked to their training data. Data selection may help produce models at lower computational costs, reducing the environmental footprint of model training Strubell et al. (2019); Lacoste et al. (2019); Patterson et al. (2021), and allowing organizations with relatively fewer resources to train stronger models. Our experiments are still expensive to reproduce, as each training run takes an equivalent of 200 NVIDIA H100 GPU hours. By studying a set of intuitive qualities as the basis for data selection, our work also sheds light on the relationship between pre-training data and model capabilities.

A number of harmful behaviors of language models trained on large-scale web data are well documented, including exhibiting social biases Nadeem et al. (2021); Abid et al. (2021) and producing toxic generations Gehman et al. (2020). We study which social, linguistic, and geographical biases are inherent in our data selection method in Appendix D.1 to promote transparency. Future research is necessary to study the effect of such biases. We recommend that in practice, QuRating should be combined with manual curation of certain languages and topics, and the resulting models should be carefully evaluated for biases before wider deployment. We highlight that the quality ratings do not measure the social or literary value of a text and should not be used for textual or demographic studies.

A FULL PROMPTS

Our full prompt templates are shown below, where the criteria on the right are substituted for {criterion} on the left. We settled on these prompts via a heuristic and iterative process, in which we varied the prompt wording and observed trends on a few examples from SlimPajama Soboleva et al. (2023). Throughout this project, we used GPT-3.5-turbo, as we decided that it was too expensive to collect large-scale annotations with GPT-4. We believe that future work should take a more principled approach and first curate a high-quality dataset for prompt refinement.

We observe better performance with a short and generic system response, namely `You are a helpful assistant.` than describing a personality with expert skills in all subjects. The effect of different personalities on the subjective judgements in our data selection method is an interesting avenue for future work.

To validate our prompts, we handpick 40 documents from the web that correspond to what we believe should be either highly and poorly rated documents for each criterion. Note that we do not use these data points for prompt refinement. We report the data sources of this dataset in Table 4 below. Our prompts achieve 97.6% agreement for *writing style*, 91.9% agreement on *facts & trivia*, 98.2% agreement for *educational value* and 98.5% agreement for *required expertise*.

We add additional instructions that the judgement should not be influenced by the languages present in the texts, the length of the texts—although for the final dataset we compare texts with the same number of tokens—and the order in which the texts are presented. However, these instructions do not suffice to overcome these biases. For example, we observe that GPT-3.5-turbo still exhibits positional bias.

Prompt Template	Writing Style	
<p>Compare two text excerpts and choose the text which {criterion}</p> <p>Aspects that should NOT influence your judgement:</p> <ol style="list-style-type: none"> 1. Which language the text is written in 2. The length of the text 3. The order in which the texts are presented <p>Note that the texts are cut off, so you have to infer their contexts. The texts might have similar quality, but you should still make a relative judgement and choose the label of the preferred text.</p> <p>[Option A] ... {text_a} ...</p> <p>[Option B] ... {text_b} ...</p> <p>Now you have to choose between either A or B. Respond only with a single word.</p>	<p>has a more polished and beautiful writing style.</p>	
	<th data-bbox="919 1125 1330 1167">Facts & Trivia</th>	Facts & Trivia
	<p>contains more facts and trivia. Prefer specific facts and obscure trivia over more common knowledge.</p>	
	<th data-bbox="919 1635 1330 1677">Educational Value</th>	Educational Value
	<p>has more educational value, e.g., it includes clear explanations, step-by-step reasoning, or questions and answers.</p>	
	<th data-bbox="919 1837 1330 1879">Required Expertise</th>	Required Expertise
	<p>requires greater expertise and prerequisite knowledge to understand it.</p>	

Table 4: For each of our criteria, we curate 40 documents that exhibit particularly strong or weak qualities. We use this data for prompt tuning and validating model performance. This table gives a description of the sources of documents in this validation set. Examples with citations come from existing NLP datasets.

Criterion	Sources	
Writing Style	<i>High</i>	11 featured Wikipedia articles, 10 fiction books, 8 academic papers, 6 famous speeches, 3 Supreme Court decisions, 2 Shakespeare texts
	<i>Low</i>	10 Yelp reviews (Zhang et al., 2015), 10 spam messages (Almeida & Hidalgo, 2012), 10 tables/lists, 5 Amazon product reviews, and 3 Enron spam e-mails (Metsis et al., 2006)
Facts & Trivia	<i>High</i>	21 niche Wikipedia articles, 12 fun fact lists, 7 IMDb trivia sections
	<i>Low</i>	15 Wikipedia summaries of Pixar movies, 15 books (Gao et al., 2020), 5 poems, 5 textbook explanations
Educational Value	<i>High</i>	13 Khan Academy explanations (across subjects), 8 science textbooks, 6 history textbooks, 5 high-level Wikipedia articles
	<i>Low</i>	10 Reality TV transcripts, 10 fantasy/sci-fi books, 10 niche Wikipedia articles, 7 gossip news posts, 3 obscure WikiHow articles
Required Expertise	<i>High</i>	15 Wikipedia articles, 12 technical academic papers, 9 advanced textbook excerpts, 4 patents/laws
	<i>Low</i>	10 WikiHow articles, 10 Children’s books, 5 nursery rhymes, 5 miscellaneous how-to articles

Table 5: We handpick a list of 10 texts from various sources and present a ranking which, in the authors’ view, reflect steady decreases in writing style, allowing us to test the nuance of LLM judgments.

Rank	Text	Description
1	Amory Blaine inherited from his mother every trait, except the stray inexpressible few, that made him worth while. His father, an ineffectual, inarticulate man with a taste for Byron and a habit of drowsing over the Encyclopedia Britannica, grew wealthy at thirty through the death of two elder brothers, successful Chicago brokers, and in the first flush of feeling that the world was his, went to Bar Harbor and met Beatrice O’Hara... B QURATER MODEL TRAINING

B.1 DATASET

We use GPT-3.5-turbo to generate 20 predictions of either “A” or “B” for a criterion and a pair of documents in either order. When we conducted this work, we did not have access to the logits of the model, and therefore reconstruct the model confidence through multiple generations. We prompt the LLM for each criterion separately, as we observed in our exploration that performance deteriorated when querying for all criteria together.

We also observe that GPT-3.5-turbo struggles to be decisive when queried with a pair of long documents, i.e., it reverts to choosing the document purely based on positional bias. We tackle this problem by only ranking pairs of short text snippets. Specifically, we randomly extract segments of n tokens (with respect to the Llama tokenizer (Touvron et al., 2023a)) for each pair, where n is chosen randomly according to $n \sim \text{Uniform}[256, 512]$ in half of cases and $n = 512$ otherwise.

Table 6 shows the statistics after querying with 250K pairs. Note that we only obtain judgements on the English subset of Wikipedia, instead of all the languages present in the Wikipedia split of RedPajama (TogetherAI, 2023). For a small subset of queries, we do not obtain predictions, as they are blocked by OpenAI and Azure content filters. The cost for creating this dataset was \$2820.

Figure 3 shows that while GPT-3.5-turbo predictions are all positively correlated, the Pearson correlation coefficients are less than 0.6, and therefore will differ on many documents. The correlations are typically in the range of 0.45-0.55, except between *required expertise* and *writing style*, which have a correlation of 0.29.

Table 6: Statistics of the qualitative choices generated by GPT-3.5-turbo. While we query with 250K pairs, we do not obtain labels for a small subset due to OpenAI and Azure content filters. The confidence margin for a prediction between (t_A, t_B) is defined as $|p_A - p_B| = |2p_{B>A} - 1|$.

Figure 3: Pearson correlation coefficients between our criteria for predictions made by GPT-3.5-turbo.

B.2 TRAINING

We fine-tune QuRater models using Sheared-Llama-1.3B (Xia et al., 2023), a pruned version of Llama-2-7B (Touvron et al., 2023b). We only train and evaluate on judgements that have a confidence margin of at least 50%, where the confidence margin is defined as $|p_A - p_B| = |2p_{B>A} - 1|$ for a prediction between (t_A, t_B) , since non-confident predictions contain little signal on data quality, and can be caused by GPT-3.5-turbo’s positional bias. Table 6 shows the effect of this filtering on dataset statistics. We use a random 10% of the dataset as a held-out validation split for early stopping and hyperparameter selection. For early stopping, we choose based on held-out accuracy averaged across all criteria.

We search over the following hyperparameter grid: learning rate $\in \{2 \times 10^{-5}, 5 \times 10^{-5}\}$, number of epochs $\in \{2, 4\}$, batch size of 512. Model selection is based on which model achieves the best validation examples on the criterion with lowest performance overall. The selected model was trained with a learning rate of 5×10^{-5} and is trained for 2 epochs.

In Table 7, we report accuracy on the validation set, as well on specially procured test sets of 1,428 pairs of texts from specific domains. We confirm that performance increases when evaluating only on confident GPT-3.5-turbo’s judgements, where *educational value* is the hardest category to predict. Finally, we compare to separately fine-tuned models and model trained from a random initialization. Multi-task fine-tuning usually gives comparable or better performance, and a pre-trained initialization helps substantially in this task.

Table 7: We compare held-out accuracy of training a multi-task QuRater model vs. training separate QuRater models. The multi-task QuRater model is trained with separate prediction heads per criterion. We also show an ablation where we train the QuRater model from scratch instead of initializing with Sheared-Llama-1.3B Xia et al. (2023). During the evaluation, we only predict on text pairs with confident judgement labels, i.e. a confidence (conf.) margin (defined as $|p_A - p_B| = |2p_{B>A} - 1|$) greater than 50% or 80%.

C CONNECTION OF EXPONENTIAL SAMPLING TO RLHF

In RLHF (Ouyang et al., 2022), a language model $p(y|x)$ is fine-tuned to produce outputs y given inputs x that maximize a reward $r(x, y)$ subject to a relaxed KL constraint with respect to a reference language model $p_{\text{ref}}(y|x)$,

$$p^*(y|x) = \arg \max_p \mathbb{E}_{y \sim p(\cdot|x)} \left[r(y) - \tau \log \frac{p(y|x)}{p_{\text{ref}}(y|x)} \right]$$

Typically, the rewards encourage the model to act in a helpful and harmless manner (Bai et al., 2022).

It can be shown that this admits the closed-form solution (Korbak et al., 2022b; Rafailov et al., 2023; Go et al., 2023; Korbak et al., 2022a)

$$p^*(y|x) = \frac{1}{Z(x)} p_{\text{ref}}(y|x) \exp \left(\frac{r(x, y)}{\tau} \right).$$

Consider the following setting: (1) we use the QuRater model $s(y)$ as reward model not conditioned on any user input, (2) the reference model is a language model $p_{\mathcal{D}}(y)$ pre-trained on a corpus \mathcal{D} . In that case, we write the optimal policy as:

$$p^*(y) = \frac{1}{Z} p_{\mathcal{D}}(y) \exp \left(\frac{s(y)}{\tau} \right).$$

We compare this optimal model with the model obtained from maximum log-likelihood optimization (i.e. language model training), where a document y is resampled with a probability $\propto \exp \left(\frac{s(y)}{\tau} \right)$. Let $\hat{p}_{\mathcal{D}}(y)$ be the underlying data distribution of the training corpus \mathcal{D} , resulting in the weighted cross-entropy objective,

$$\arg \max_p \sum_y \exp(s(y)/\tau) p_{\mathcal{D}}(y) \log p(y),$$

which in practice is approximated via MonteCarlo sampling and importance resampling with the exponential quality ratings. The optimal model to this objective is $\hat{p}_{\mathcal{D}}(y) \exp \left(\frac{s(y)}{\tau} \right)$. Assuming \mathcal{D} is large and $p_{\mathcal{D}}(y)$ approximates $\hat{p}_{\mathcal{D}}(y)$ sufficiently well, the maximum likelihood solution to the resampled distribution will approximate the optimal policy $p^*(y)$.

In summary, our sampling strategy is equivalent to (1) training a language model on the entire dataset, and then (2) using RLHF to guide the language model towards generating documents with higher quality ratings.

D EXPERIMENTAL DETAILS

Each data selection method retains the original domain proportions between the RedPajama subsets. Table 8 shows the domain statistics of the 260B QuRatedPajama, from which we select 30B tokens using different data selection methods. *QuRatedPajama is a curated subset of SlimPajama, which is itself a subset of RedPajama. Both SlimPajama and RedPajama are released on HuggingFace under the Apache 2.0 License.*

We use a global batch size of 2048 sequences and a learning rate of 5×10^{-4} with a cosine learning rate decay to 5×10^{-5} and a linear warmup for the first 5% of training steps. Each model is trained on 8x NVIDIA H100 and costs 200 GPU hours. We use a weight decay of 0.1 and train with Adam (Kingma & Ba, 2015) with hyperparameters $\beta = (0.9, 0.95)$. We train a 1.3B parameter transformer model with RoPE embedding (Su et al., 2024) and SwiGLU activations (Shazeer, 2020).

Detailed results. We feature the full perplexity results in Table 9, including the perplexity for each of the RedPajama subsets. Table 10 contains the ICL performance for all models. The performance of the curriculum models is featured at the top of the tables.

Table 8: Number of sequences in the 260B token corpus from which we select data. The data is a subset of SlimPajama, where each document is processed into sequences of exactly 1024 tokens. Therefore, the proportion of domains is different from the raw SlimPajama.

D.1 DOCUMENTING SOCIAL BIAS

We apply our data selection pipeline to the AboutMe dataset, (Lucy et al., 2024) which associates 10M webpages with geographic, topical, and social role metadata. Following a setting by the authors, we sample a 10% subset using QuRating with top- k selection or sampling with temperature $\tau = 2$. We calculate retention rates by measuring what fraction of the total pages associated with a topic cluster, social role, or geographical region are retained in the 10% selected subset, where a rate higher or lower than 10% means that the attribute is *amplified* or *suppressed*, respectively. We report the most amplified and suppressed topics, roles, and regions in Table 11.

Compared to prior data selection methods studied by Lucy et al. (2024), we find that the retention rates for QuRating are slightly more balanced. However, sampling is important: In Table 11, we show that the retention rates are far exacerbated in all categories when using top- k selection. Our results share some common trends with prior methods, e.g., topics related to shopping websites—*online*, *store* and *fashion*, *women*, (*brand*)—are among the most suppressed across all quality criteria; Lucy et al. (2024) make a similar observation.

We observe that the most amplified attributes reflect the quality criteria: Topics selected with high expertise (research, law, technology, medical, software) are indeed widely considered to require specialized knowledge. Roles associated with research are amplified when we sample based on *required expertise*, *facts & trivia*, and *educational value*; roles associated with art and writing are amplified if we use the *writing style* ratings. We observe that documents associated with conventionally female roles (*mommy*, *manicurist*, *beauty therapist*, *quilter*) are suppressed across the *facts & trivia* and *required expertise* methods. The roles of *youtuber* and *hacker* are suppressed when selecting for *writing style*, suggesting a bias against “internet” language, while documents linked with performing roles (*band*, *act*, *dj*, *drummer*) are suppressed when selecting for *educational value*.

The geographical trends are less pronounced. We observe that selection based on *writing style* exhibits a mild preference towards websites from Europe and against websites from Asia. The criteria *facts & trivia* and *required expertise* retain a slightly higher proportion of websites from Western and Eastern Europe, Central Asia and Northern Africa.

We agree with Lucy et al. (2024) and Dodge et al. (2021) that it is important to study the effect of data filtering on social and geographical representation. The impact on the resulting language models is not well documented yet, but may be understood in terms of representational and allocative harms Barocas et al. (2017); Suresh & Gutttag (2021), and potential manifestations include stereotyping Caliskan et al. (2017); Manzini et al. (2019); Tan & Celis (2019); Abid et al. (2021), erasure Dev et al. (2021), or simply a lack of performance in relevant tasks not considered in traditional benchmarks. We note that web-scraped datasets are already immensely skewed in terms of their social and geographical factors, e.g., by ease of internet access Bender et al. (2021), and creating a taxonomy of social factors is difficult Blodgett et al. (2020). Given the broad coverage of web-scale data and the wide range of LLM applications, the question of what would constitute a fair pre-training distribution remains important and up for debate.

E FURTHER ANALYSIS OF QUALITY RATINGS

We provide further details of the quality ratings on a random subset of 1M sequences from the 260B QuRatedPajama dataset. Table 8 shows the domain constitution of this dataset.

Quality ratings across clusters. Figure 4 shows the distribution of ratings of the C4 and Common-Crawl subset of RedPajama. Since this subset contains diverse data, we visualize by performing unsupervised clustering of TF-IDF features. Our method follows Gururangan et al. (2023), including using whole-word tokenization with a special placeholder for numbers. However, we do not enforce an balanced cluster assignments during the k -Means clustering and use $k = 25$. The resulting proportions of examples per cluster are also shown in Figure 4.

Correlation with log-likelihood. In Figure 6, we show correlations between the quality ratings and log-likelihood scores assigned by Llama-2-7B (Touvron et al., 2023b). We observe no clear correlations, with the exception of *writing style*, which has a Spearman correlation coefficient of 0.50.

Table 11: We select 10% of the webpages in the AboutMe dataset using quality ratings from different criteria. We report the categories that are most/least retained (amplified/suppressed) in the selected data and report their retention rates in %.

(a) Select by sampling with temperature $\tau = 2.0$.

Quality ratings across languages. We study how ratings are distributed across different languages by considering trends for the top 10 languages in the 1M sequences in our analysis subset. We identify sequence languages using the `fasttext-langdetect` Python library (<https://github.com/zafercavdar/fasttext-langdetect>), a wrapper for Facebook’s `fastText` language identification models (Facebook, 2016; Joulin et al., 2016; Bojanowski et al., 2017). We observe that English comprises the overwhelming majority of our dataset, which is unsurprising given that we annotate a subset of the SlimPajama dataset (Soboleva et al., 2023), which is itself majority English. We find that English language data has the widest distribution of ratings, and that it also tends to have slightly higher median ratings compared to data from other languages. However, we observe that some languages do receive higher median ratings than English for some criteria; across criteria, sizable quantities of non-English data get ranked as high quality. We note that the QuRater appears to particularly penalize non-Latin scripts (usually expressed as Unicode characters); Russian and Ukrainian tend to have some of the lowest ratings across criteria, and receive particularly low writing style ratings.

Figure 4: Distribution of normalized quality ratings over clusters of 760K CommonCrawl and C4 training sequences.

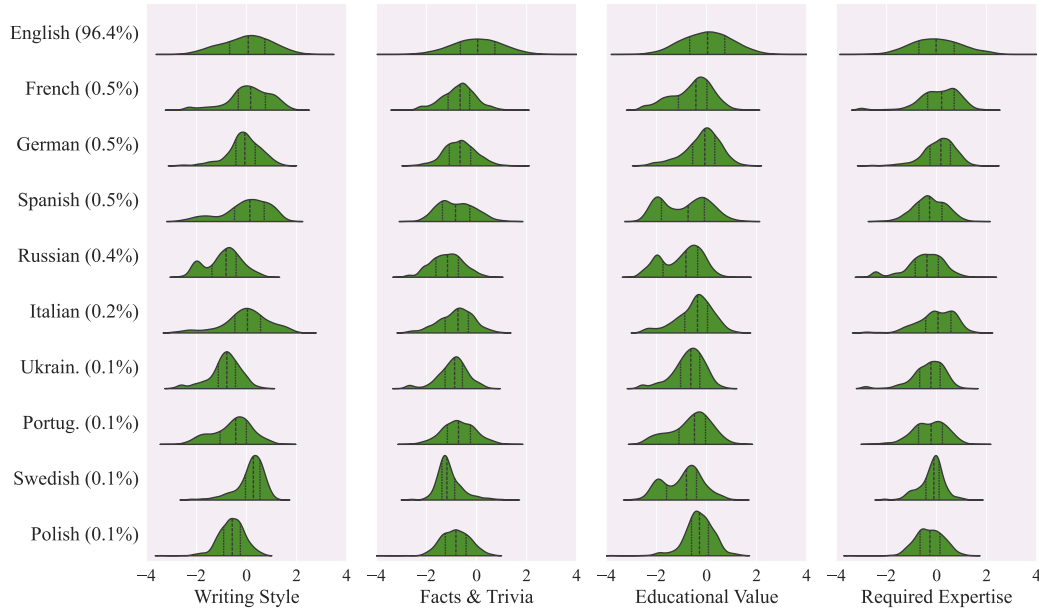

Figure 5: Distribution of quality ratings for the 10 most common languages in 1M documents randomly sampled from SlimPajama, normalized for each criterion to have zero mean and standard deviation.

Figure 6: Correlations of quality ratings and negative log-likelihood scores by Llama-2-7B(Touvron et al., 2023b) over 1M training sequences. The negative log-likelihoods are averaged over the number of tokens, and are the logarithm of the perplexity score of a single sequence. We observe that perplexity scores are not good approximations for any quality criteria.

F INSPECTING RAW DOCUMENTS AND RATINGS

Finally, we present snippets from raw documents for the Wikipedia, Book, Stack Exchange, Github and ArXiv subsets of SlimPajama in Tables 12-16; and documents from the clusters for C4 and CommonCrawl in Tables 17-41. The documents are taken at the 5th, 30th, 70th and 95th percentiles of quality ratings shown in Figures 2 and 4, respectively. We believe it is important to give an unfiltered view of the training data, and therefore do not filter these documents.

A small number of documents contain potentially sensitive content.

Table 13: Raw training examples selected to have quality ratings at the 5th, 30th, 70th and 95th percentile within **Book**. For each criterion, the ratings are normalized to have zero mean and unit variance across the corpus and reflect the distributions in Figure 2.

5th percentile	30th percentile	70th percentile	95th percentile

Zia Rosa, who sat beside him, clucked her tongue and patted his thigh. "You know what your problem is, Alex, honey?" # # He looked trapped. "Don't tell me. Please." # # "Your problem is, you ain't picked out some nice lady. Look at all these people here. They're happy, see? They all got somebody. You don't got nobody. If you had a nice girl to go home to, you wouldn't have got caught with your pants off by that nasty putanella, eh?" # # "Zia, now's not the time for the family-value lecture," Bruno said. # # Zia Rosa waved him down. "Shhh. Like my old nonna back in Brancalona used to say, 'Attent' a le fosse.' # # "Lily leaned over to Bruno. "What does that mean?" # # Bruno sighed and translated. "Beware of the holes." # # Aaro buried his face in his hands. "I tell me about it," he muttered. # # Zia Rosa patted Aaro's thigh again, palpatting his quadriceps muscle appreciatively. "The time's come, I guess," she</p>	<p>Writing Style = 1.39</p> <p>... n go out the way it comes in?" # # "More than that, Friend Ethan." Ta-hoding, overhearing, elaborated. "Once we build up enough speed traveling back down the thunder-eater's trail, we can then turn the ship and continue in any direction we wish." # # "It is the building up of enough speed that is critical," Eer-Mesach finished. # # "Kinetic energy," Ethan murmured, and then had to try and explain the unfamiliar-sounding Terrango term in Terranish. # # "It will be not easy." Ta-hoding was talking as much to himself as to his listeners. "Even if we do pass successfully into the trail, there are other dangers to be considered." Ethan didn't press him for an explanation. # # "We must make a decision. We do have a choice." He gestured with his arm toward the bow, his dan momentarily following with wind. "We have cut a path a kajat or two ahead of us. We can reset sail and make a run at the forest wall. If that fails, we will then have no room to maneuver, and it will be most difficult to try and back up for another run. Also, I sh</p>	<p>Writing Style = 2.10</p> <p>... sh of bottled water. # # "Here's something else," she said. "Napoleon refused to go into debt. He despised financiers, and blamed them for many of the French Republic's shortfalls. Now he didn't mind confiscating money, or extorting it, or even depositing money in banks, but he refused to borrow. In that, he was totally different from all who came before him, or after." # # "Not a bad policy," he muttered. "Leeches, every one of the bankers." # # "Would you like to be rid of them?" # # She saw that prospect seemed pleasing, but her guest kept silent. # # "Napoleon agreed with you," she said. "He flatly rejected the American offer to buy New Orleans and sold them, instead, the entire Louisiana Territory, using the millions from the sale to build his army. Any other monarch would have kept the land and borrowed money, from the leeches, for war." # # "Napoleon has been dead a long time," Mastroianni said. "And the world has changed. Credit... us... today's economy." # # "That's not true. You see, Robert, what Napoleon learned fr</p>
<p>Facts & Trivia = -1.69</p> <p>... te che nessuno utilizzerà o da cui nessuno tra rra profitto non sarebbe un atto umano; gli verrebbe a mancare l'«essenza», la dimensione spirituale, l'anima, la preghiera di accompagnamento (non ne cessarissimo mantra); ma potrebbe esprimere il desiderio di contribuire al benessere dei nostri vicini e alla felicità dei nostri simili, o un'idea che mira a migliorare la qualità della vita una vita attorno a noi. Quando lo spirito di preghiera non permea l'azione, l'atto degenera a livello subnomico. # # Le pagine seguenti servono da introduzione alla vita di orazione, che per millenni ha nutrito una parte considerevole dell'umanità nella sua ricerca della felicità e del senso ultimo della vita. # # Due sono le pratiche che si potrebbero suggerire. Una è il silenzio e la calma totale, il vuoto e il nulla, l'eliminazione attiva di tutti gli ostacoli per lasciare che lo Spirito operi liberamente; è il cammino della libertà assoluta che rimanda persino la libertà dall'essere. Nessuna parola è ammessa in quanto altererebbe l'esperienza e</p>	<p>Facts & Trivia = -0.52</p> <p>... stubbornly, and Talon forced the words out. "Have you never been proud of me? Did I never make a difference?" # # The older man's jaw tightened until it was a white line against his weathered complexion. Drovic could not afford either pride or the approval Talon sought. The goal, Drovic told himself harshly. In the end, it was the goal, not the men, that counted. But before Talon's icy gaze, Drovic suddenly felt old, as if the goal itself had worn thin. # # Talon gritted his teeth at the older man's silence. No pride in the weakling, he told himself. What had he expected? It struck him that surely there had been at least one healer willing to help a wounded man-healers had their own vows to save lives. So why had they been forced to heal him? Was it the side effects of the medicine? Was it more than a painkiller, more than a healing drug? Did Drovic hope it kept him subservient? Because the longer he had drunk that vile mix, the more he became impatient, enraged. It was only in a past few days, without the herbs, as the gray fog g</p>	<p>Facts & Trivia = 0.62</p> <p>... <p>Writing Style = -1.31</p> <p>... Push Zigger! 7 Find all posts by Fordia urusSH04 That Don Guy I wouldn't be surprised if the Money In The Bank winner ends up being either Cena or Batista return by Batista (remember when everybody thought Daniel Bryan was leaving WWE?), who then decides, "I don't want the belt this way; I'll wait for Daniel Bryan to return, and the n cash in the briefcase." What they should have done: have him hand over one of his two belts, the n, when he's better, they'll hang both belts over the ring and have a ladder match for the "unified" title (after which they can finally retire one of them - having both of them around is meaningless unless there's another split coming up). 8 Find a nly posts by That Don Guy I am hoping the days of a non-heel Cena winning the championship in any way at all are OVER. Batista/Bryan could be good, as the "broken promises" relate to Batista not getting the title at WrestleMania. But if we are supposedly moving to Brock/Bryan at Summerslam, we really don't need Cena at all in the title picture. B</p>	<p>Writing Style = -0.36</p> <p>... pens offered as a selection. I'm not looking for exact names so duplicating what I wrote as the name isn't required and having a typo won't disqualify you. Picking a Visioneer would disqualify you since there's no universe where that's a typo or a good choice. 2. One entry per person. 3. This is open internationally as long as USPS will ship there. Prizes will be declared as a gift but I am required to indicate a value. While this value will be relatively small you will be responsible for any customs fees or taxes. 4. I can't (won't) replace any prizes that may be lost or delayed in transit. I use the lowest cost method with no insurance and often no tracking outside the US. After many years of problem free shipping my recent history has some international deliveries taking over 30 days while touring the customs house in multiple countries only to be sent back. This applies to US winners too, but it's mainly been an issue internally. 5. Please leave your email address in the appropriate comment field. It will not be made</p>	<p>Writing Style = 0.63</p> <p>... sturised. Got any cuts on your hands? This lovely soap is full of aloe so it'll speed up the recovery process and help avoid any nasty infections from developing. Most importantly, I like that this is a big bottle that lasts about 2-3 months based on a normal family (although what is normal right?). It means it's one thing of my list at the supermarket. Or two if you count the hand cream I don't need to buy. Or three because I also don't need to buy baby bath. I'm all about the thrifty but sensitive skin but especially good for babies. I just use a pump in the bath for lots of bubbly fun. It's got a nice, natural scent and gives baby bum that fresh baby smell. Aloe Vera Gelly - This one has been absolutely amazing for teething! When b</p>	<p>Writing Style = 1.51</p> <p>... st as it is awkward to ask wealthy people why they need so much money, why they use their wealth so poorly, and why they just get rid of it when they recognize that it is the cause of their unhappiness. - Anton Chekhov # Maybe that's what we look for in the people we love, the spark of unhappiness we think we know how to extinguish. - Tom P. errotta # I suddenly wondered whether Mother might not actually be happy now, whether the sensation of happiness might not be something like faintly glittering gold sunken at the bottom of the river of sorrow. The feeling of that strange pale light when once on as exceeded all the bounds of unhappiness - if that can be called a sensation of happiness, the Emperor, my mother, and even I myself may be said to be happy now. - Osamu Dazai # For years of our lives the days pass waywardly, featureless, without meaning, without particular happiness or unhappiness. Then, like turning over a tapestry when you have only known the back of it, there is spread the pattern. - Jane Gardam # Today, I go east.</p>
<p>Facts & Trivia = -1.91</p> <p>... be able to grieve that, right? No, you can't, that's okay. That's okay. It doesn't bother me, right. I know how amazing my partner is for my girls and vice versa. But I also understand that as a parent, you have these visions of what your child's life is going to look like as an adult. And when it doesn't turn out that way, and it almost never does, it's okay to grieve that vision. And I think the response I got was, it was incredible to me because it was so many people sent that post to their parents and said, "It's okay for you to grieve. And then those parents came back to me and were like, 'Thank you because I needed that. Right. And that was just that. I think that was a huge part of why we started that because the support group is there at we need those places. We need those places where we can feel that whole spectrum of emotion.' We absolutely do. In fact, I told, and one of the few things that I have let slip since the kids have come out is, I think it was last weekend said, "You know, I'm sad. I'm never going to get a son-in-la</p>	<p>Facts & Trivia = -1.04</p> <p>... et up. It is apropos that I am especially grateful today, but I aim to cultivate an attitude of gratitude daily. So for all of you reading this who have helped make this fall a little more bearable, thank you. I know this post is LONG overdue. But I'm posting it anyway, because we have an awful lot to be thankful for, and because I think I'll be glad we have a Thanksgiving 2015 post someday. We spent Thanksgiving in Islip with Grammie's side of the family, a long-standing tradition for Will (and at this point, for me!), but a first for Henry, Jack, and Sophie. This meant lots of family, lots of food (though let's be honest, these kiddos just ate mac 'n cheese like it was another Thursday), and lots of fresh air and wide open spaces. With the weather as warm as it was, we took full advantage of the immediate access to the outdoors. How different from our city lives! # If you look closely, you'll see two kiddos running around on this glorious afternoon. The third one is in the bushes around the corner. I think they were play</p>	<p>Facts & Trivia = -0.26</p> <p>... uch faster focusing and consistently sharp across the entire aperture range which makes me think the smart money is on the SIGMA 50. I think the SIGMA 50 will hold its value much better and be a lens that works nicely with newer sensors in the future, whereas I consider the 50mm f/1.4G to be a reasonable bargain alternative. D800 series users should probably for the SIGMA 50 as the superior resolution will no doubt be more noticeable. # It's impossible to do exact compares for the following due to different sensor sizes and focal lengths, but I just for fun I included these comparisons I did for my own personal curiosity. # If figured you might enjoy seeing them too, but strictly speaking these are apples to oranges comparisons. # As a lens, I think the Fujifilm 56mm f/1.2R is probably sharper but I think the sensor is superior on the 10 X. As a result, I don't think this lens compares as favorably as it would if I could do an apples to apples comparison of both lenses on the same camera body. It's clear the Fujifilm lens is just about as s</p>	<p>Facts & Trivia = 0.61</p> <p>... ever seen. Cameron's camera captures the subtle structure of the thing with a naturalist's precision. Her up-close framing strips away context and a dense of scale; her high-speed film records more detail and clarity than the naked eye can see. The result is a defiantly alien beauty. This flower is a "floral" in name only. # That's just a sample of the powerful art you'll see here - images beautiful, tactile, weird, highly personal, fiercely objective, and occasionally disturbing. To make it even more disturbing, these images aren't first-generation photographs, drawings, paintings or assemblages. They're prints, although you'd never know it at a casual glance. What's going on? # On a technical level, it's easy to explain. # Chris Schumaker scanned in the original art at insanely high resolution, then generated large-scale prints on ever-ything from paper to canvas to aluminum. Some pieces are screen-printed, others are continuous-tone, giclée output. The images are so good, you have to wonder: Is it fine art on the walls, or high-tech</p>
<p>Educational Value = -1.70</p> <p>... deal. There's two many others. # Steven Butala: That only works for women. # Jill DeWitt: Oh, well! I then ask a woman. # Steven Butala: Men are hard wired to be distracted. # Steven Butala: I'll go out on a limb here. Here's my girl. # Steven Butala: I love her, and we have history. Oh, wait. There's a girl over there? # Jill DeWitt: Do you really want to use this example? # Steven Butala: Wait a second. Wait a second. Look. I'm not saying I've ever partaken in anything like that. # Steven Butala: I'm just saying. # Jill DeWitt: You don't have a better example. How about a boat? # Steven Butala: Yeah. A boat. There it is. # Jill DeWitt: Here's my beautiful boat. # Steven Butala: Boats are good. # Steven Butala: There's a bigger boat. # Jill DeWitt: - 10 years younger. It looks an awful lot like my boat. # Steven Butala: That's a bigger, better, but younger version of the boat that I already have. # Jill DeWitt: But it's 10 years younger. Actually, it's the same boat 10 years younger. # Steven Butala: So what that it's more expensive. # Jill D</p>	<p>Educational Value = -0.73</p> <p>... 's performance in the Daytona 500, the meaning might just fit. In the final six laps of the race, Gordon made several moves to pry on leader Tony Stewart, and rob Budweiser nation of another Daytona victory. Running in second as the laps wound down, Gordon had two options. He could stay in line and push Stewart to a victory. Or he could take his chances and pull out of line, hoping that his teammate back in fifth place could move up and help him. Nobody would have faulted Gordon for taking the safe road. After all, in a day that saw some dramatic wrecks, a runner-up finish would have been a fine start to the new season. But this is Jeff Gordon. ... this is the Daytona 500. ... this is crunch time. There are no safe roads. # Gordon pulled out of line with six laps to go and immediately lost the runner-up spot to Kurt Busch. As expected, Johns on jumped to the outside to push Gordon. Dale Earnhardt Jr. drafted off Stewart and pulled high to move into the race lead. The crowd roared its approval. But Gordon's chess game wasn't over just yet.</p>	<p>Educational Value = 0.33</p> <p>... lways encouraged them to take it into their teacher when school started. This made them so proud to have their teacher read it and give them a "GREAT JOB" pat on the back. # Never leave home without them. Make sure it is not a messy snack. As a mom you want them to eat healthy stuff like carrots and celery, but we know that might be tough so limit their dry snack intake. Don't forget the drinks too. Keep them well fed and hydrated is key here. Also feed them healthy lunches too. # Always stop to burn energy. I know if you have a husband that likes to drive straight through this can be a problem, but honestly either you have a miserable trip or you stop to let them burn energy. Nice, clean and busy rest stops are the best of course. Some have play areas or find a corner with no traffic and let them run a little bit. Of course with supervision. Take chalk and draw hopscotch or draw a circle and have them stay within that circle with a ball. Take their scooter along if they're old enough to ride one. # BE ACTIVE AND PLAY WITH THEM. # Kid</p>	<p>Educational Value = 1.39</p> <p>... abits are formed through the instances where you make a successful decision, which in turn becomes a more "natural instinct". Even if you make the wrong decision, you will still have a valuable learning experience. A bad choice will just open up the door for a better one. # Your library and books store probably have an entire section devoted to self-help. The best of these types of books can truly give you new advice and ideas that work for improving your specific life situations and challenges. Many personal development books are poorly written, so pick one that has good reviews. # Try to be prepared to record your ideas no matter where you are. Pack some paper with you when you go out. If an idea grabs you while you are on the subway, write it down, then do something about it when inspiration strikes. # You should know the values that bear importance to you prior to planning a self improvement program. Focus on those areas first to make the positive changes that are most important to your happiness. Instead, focus on all that is impo</p>
<p>Required Expertise = -1.96</p> <p>... ilk jugs, putting one in twice a day. They have done well with this, but I am concerned about the electrolytes too so I will add the recipe. # Thanks Lisa! I had fans on all night along with adding electrolytes to the water. Counting down the days to cooler weather! # Lisa, you are a life saver. I hanks a bunch for this recipe-going now to make. # Thanks so much. I was paying a dollar per packet of electrolyte solution to mix with 1 gallon of water. This will save me a lot of money. Just made up a batch for them. # I'm wondering if the avachic powder that I received with my baby chicks is something similar. ... it says it's a mix of vitamins and electrolytes so maybe I could use that as well? # THANK YOU for this recipe!!! and... for anyone else trying to keep chickens cool... we installed a \$25 misting system that we got from Tractor Supply... it only uses 0.9 gallons of water per hour, drop s the temp by 15 to 20 degrees (we tested it with a thermometer) and the chickens LOVE it!!! The CAT S even lay under it!!! It has proven to be a great</p>	<p>Required Expertise = -1.13</p> <p>... unity to re-install the CV to fit employer and that job. Another thing concerning the existing job and also the employer info, if any, need to get mentioned. # Your CV gives a synopsis of everything you have to give an organization and that which you have. Make certain that there was. Even the CV allows one to center on the skills you might have developed in a lot of elements of one's life. # Make certain you are represented by the CV. Make certain your CV communicates that. It's quite important to organize your CV before you begin creating it. You also need to mention that your CV and cover correspondence are all attached. Your CV is easy readable and to scan through. CVs are designed to get an crowd that was specific. Deciding the appropriate CV out to highlight your abilities and experiences is vital. # Additionally, there are certain are a lot of all CVs utilized in the great Britain now and despite it is correct that you find it possible to have distinct formats of CV, in addition you will need to take into account the form o</p>	<p>Required Expertise = -0.33</p> <p>... posted a message opining that the community could do better job of running a conference. Guido agreed that the Python Software Foundation (PSF) would underwrite the event, we found a university venue to try and keep costs down, and started to ask for volunteers and speakers. PyCon was born. # At the second event I announced I would only chair one of more conferences, and the community would have to find a replacement chair if the conferences were to continue. I didn't want PyCon to become one person's plaything. Happily someone did come forward, and now there are PyCons all over the world. I haven't missed a single PyCon US so far. It's a fun conference. # Many people like to say they are "giving something back to the community," which is fine if you have to take first. Personally I think paying it forward is a more viable way to ensure that open source initiatives succeed. Running the PSF is a fine way contribute to the open source community, though it doesn't necessarily serve my financial interests best. # The first Linux distribution</p>	<p>Required Expertise = 0.54</p> <p>... rpreting his statements. # We can abstract from our values to principles, and so on, but what makes the difference between an instrumental value and a terminal value is that a terminal value is one that exists for its own sake. Inclusive genetic fitness does match that definition, because natural selection is a thing that slowly replaces things with lower inclusive genetic fitness with things with higher inclusive genetic fitness. This is what biologists mean by "maximize," and it's different from what numerical optimization / math people mean by "maximize." # Is it true that you are doing the most you can to maximize your inclusive genetic fitness (IGF)? No, you're clearly suboptimal. But it is clearly true that your ancestors reproduced, and thus your genes are a product of the evolutionary project to gradually replace lower IGF with higher IGF, and in that sense you are doing more on average to increase your IGF than the counterfactual you that do not exist because their ancestors failed to reproduce. That seems to be what PhilGoe</p>

Leave a comment # twohands # Today in the Sout h our calendars tell us that this is the beginning of spring. But as trees come into blossom here, th e leaves will begin to wither and die in the North # In his novel Rasselas, Samuel Johnson attempte d to discover the secret of happiness. After many adventures, he concluded that any happiness is als ways accompanied by a loss, 'That nature sets her g ifts on the right hand and on the left'. You can c hoose to have either worldly fame or a bountiful g arden. It seems that full happiness can only be e xperienced collectively. # Two hands is a symbol o f a world made from the separation of two halves - N orth and South, thinking and doing. # Aristotle sa w the world as made by two kinds of persons: the u ser who determines the form and the producer who realises it. In much of everyday life, these two si des work together: we want a cup of tea and we fin d the materials and equipment to make one. As huma nity evolves, these two sides are drawn apart # In the West, there is a hierarchy that places th	... on earth if we continue on this path? Will we build a sustainable future for our children, our g randchildren? Ourselves? # In the US, even the cu rent CDC admits that COVID-19 has hit POC and Indi genous Peoples, especially African Americans, hard er than white people. The 1% remain more secure an d protected. # From Pandemic to Race # The effects of COVID-19 on the health of racial and ethnic min ority groups is still emerging; however, current d ata suggest a disproportionate burden of illness a nd death among racial and ethnic minority groups. # US CDC (COVID-19 in Racial and Ethnic Minority G roups page last reviewed on CDC June 4 2020) # R obert D. Bullard is a professor at Texas Southern University who has written for more than 30 years about the need to redress environmental racism. He welcomed the statements of support this week fro m the leaders of big environmental groups but he lan guaged that the vast amount of donor money still g oes to white-led environmental groups. # "I'd like to see these groups start to embrace this whole co	... gence said in a report, released on Monday. # In the report - Smuggling in India Report 2021 - - which was released by Union Finance Minister Nir mala Sitharaman on Monday, the government agency s aid it had always risen to the challenge and made great inroads into breaking the gold smuggling sym dicates over the years. # The report said the quan tum of import of gold into India was significantly high to meet the huge demand. India, the world's s econd-biggest gold consumer after China, imports a bout 900 million tonne (mt) of gold a year. Gold c onsumption in India was 797.3 mt in 2021, the high est in the past five years, according to the World Gold Council data. # India being a negligible pro ducer of gold, the huge demand for gold in the cou ntry is met through imports, the agency said, addi ng that India imports gold ore bar as well as refin ed gold. In the last five years, imports of gold ore bars made up 30 per cent of the total officia l imports of the yellow metal in India. # Breaking through the web of syndicates, multiple carriers,

... # which is worse, that the attempted genocide of Native Americans would be considered a mere "in trusion" or that criticizing said genocide would b e considered "made-up criticism." Oh, and also sla very is totally made up. None of the Founding Fath ers ever had any slaves. You could look it up! But don't. # R.I.P. Etta James # The Legendary Ms Etta James went on to the great concert hall in the sky a couple days ago. # I saw her back in 1986 at the e San Francisco Blues Festival, and she would have torn the roof off the place, had the show been ind oors. Buddy Guy and Junior Wells joined her backu p band along with Ms Katie Webster on piano. It was such an amazing set that Albert King could not fol low her. My friend and I started heading for our c ar during his set. Later we felt shitty about it w hen we were informed that he was dying of cancer, which might have affected his performance. # Anywa y, Etta James was one of the greatest singers of a ll time. I don't know that anyone ever matched the sheer power of her voice. She will be missed. # Le	... but disagreed. # "Because these cuts have just been proposed, we haven't yet evaluated which step s we will take to deal with possible staff cuts," he said. # In response to whether he thought the c uts would affect the department's ability to provi de service, Wilbur answered, "Yes, that's why we w ill have to plead our case when our turn comes." H e added that the cuts do occur, the department will have to consider taking an engine company out of service or reducing fire prevention to cope wit h the reduced staff. # "On the issues of layoffs t hemselves, I clearly recognize the controversy the y engender and the impact it has on our workforce," Cohen said. "With labor costs constituting over 70 percent of our budget, and equipment and suppl ies cut to the point that it is starting to get dif ficult for departments to perform their basic fun ctions, we have little choice but to now look for savings in personnel." # However, layoffs are not t he only measures being proposed to save money. The major, with the approval of the department heads,	... xity increases without warning, and it engulfs the world in dimensions not even comprehensible. H ow to design globalisation taking care of complexi ty is what innovation should be focusing on - ther e is the play - the globalisation, complexity an d innovation as the three-pronged world dimensions need to be taken care of simultaneously. # When E stern countries (read US) forced India and other A sian countries to open their markets in the late 1 980s and early 1990s, the West believed that they would get large markets for their products as well as cheap labour. They forced economies to open th rough multiple thrusts and forces that the so-calle d poor protected economies had no means to push ba ck. The poor relented. In the 1990s, the opening u p of the Indian economy was criticised and genera ted a feeling of fear of new products coming into I ndia thus ending the so-called monopoly of existin g players in protected economy. # We are moving to wards an uncertain, unstable and chaotic state of the world affairs with everyone having mistrust of	... nformation online, we fill out forms and turn them in to government agencies online. Therefore, the question of whether ADA requirements concern g accessibility for people with disabilities might be applied to websites has been brought to the for e. # Generally, people with disabilities must have access to goods and services that are open to the public. People with disabilities have run into som e barriers in terms of access to and usability of certain websites. # This is a sip-and-puff device, sometimes called a puff mouse, which allows a per son with a disability to control computer interfac e screens by blowing and inhaling into the device. # Jobdone, Wikipedia. Some rights reserved. # ADA Compliance, Websites and Some Court Cases # Early court cases in which this issue was addressed bro ught decisions that stated that the ADA did not app ly to websites. However, some advocacy groups sou brought cases to court and the tide began to turn. # In 2006, the National Federation of the Blind su ed Target for having an inaccessible website. The

... osal to build up to 48 apartments in the subdivi sion. Apartment residents could not exceed certai n income requirements in order to rent there. # K ris Henry, a Waverly Pointe resident, told council members the proposal needs to be stopped right now # "Call it what it is," Henry said. "It's going to be people with income of \$25,000 paying rents o f \$900. Crime will go up. Drugs will go up in this community." # In early September, council members agreed to issue a letter of support for the develo per to obtain tax credits on the low-income apartm ent complex. Overland Property Group submitted an application to the Kansas Department of Housing in August for tax credits to build up to 48 units in three apartment buildings in Gardner's Waverly Poi nte subdivision in August. # Council's resolution of support does not guarantee that revisions to Wa verly Pointe's preliminary development, which incl udes a Home Owners Association requiring that sub division owners occupy their property, would be app roved by the council or by the planning commission	... And we did say that up front and at the time. # Question: Yes. # Deputy Spokesman: It remains to be seen what evidence they can collect, but we'll keep in touch with them to try and get whatever in formation they have to make sure that they are abl e to look thoroughly at this. And of course, what that means is that they need to have access to all the information that they can get hold of in order to make a reasoned judgment about what actually h appened in Tabit. Yes? # Question: I just wanted to ask yesterday about the announcement of the Board of Inquiry, described as an internal and independe nt UN Headquarters Board of Inquiry. By internal, how much of this report is going to be public? Tha t's my question. I have a couple other questions o n reports, but can you say what "internal" means? # Deputy Spokesman: As with all United Nations boa rds of inquiry, the Board's report will be an inte rnal document of the Organization and not for pub lic release. However, the Secretary-General intends to make publicly available a summary of its findin	... le-class mediocrity, has been great indeed! Go od Lord! Sacrosanct property has been attacked. Th e quivering bourgeois must have visions of looting and riot flashing before their eyes: all because t he demonstrations of hate by those who own nothing against a recuperator such as Jacob have ceased. T he prejudices that underpinned the old authoritari an society have melted away. Which just goes to sh ow that our propagandist is on the right track! Th e he takes the jury to task: "Sometimes, doctors' certificates are convenient." He breaks down by p rofession... each profession accompanied by some ep ithet of his own devising... the 'panel list' from which Jacob's jurors have been chosen by lot. Ther e is among them, he notes, "not one worker, not on e peasant, not a single proletarian!" How come? Be cause if justice was just and were Jacob's jury ma de up of twelve workers, he would necessarily have been acquitted! What, then, is the difference betw een the judges and the judged? It is that the thir ves are not the ones that are believed to be so!	... # the mid-1960s. In this model politics estab lishes broad plans for the administration, and the # administration, deploying its own separate ratio nality of decision-making, gives a universalisable legal form to these plans. (King & Thornhill 2003, 87.) # officials. They should not be seen here as 'persons' but as 'carriers' of a political communi cation. "They are the result of office-holding and 'or a political behaviour", or, "they are politica l data and decision premises in the # offices they exercise" (Luhmann 1990, 61). # Second, I shall gi ve an overview of the relation between the public and # politics. It is well known that in democracy the needs and interests of the # public have an in fluence on the themes or binding decisions of the political # system. The public can influence the b inding decisions through public # opinion and mass media, which are the structural couplings between the # public and politics. In democratic societies mass media play an important # role in representin g of the public opinion. They also produce topics

The positive response saw a third session added in 2016, and organisers will include a fourth panel discussion for 2017. With this year seeing ADIPEC expand to include downstream industries for the first time, an additional programme will include three Downstream Global Business Leader panels. ... "ADIPEC is unique for its ability to attract such a broad group of industry seniors to an annual event, driven by the market power of the region's NOCs and their IOC partners," said Ali Khalifa Al Shamsi, CEO, Al Yasat Petroleum Operations Co. Ltd and ADIPEC 2017 Chairman. "Nowhere else will industry professionals get such an insight into the strategic thinking guiding the industry forward, from individuals whose decisions are critical to the future of oil and gas businesses." ... with planning for ADIPEC entering its final weeks, organisers have confirmed the involvement of 13 CEOs for the Global Business Leader panels and are in talks with many more across the g</p>	<p>Writing Style = 1.20</p> <p>... vance for coordinating with press schedules and allows too much time for schedules to adjust prior to the tour dates. It's a hard two weeks of pitching, but allows you to pitch at the most effective time, instead of spinning your wheels too far in advance. ... Pitch in tiers: It isn't always easy to know what kind of response you'll get, so be sure to separate your press list into tiers, starting with top-tier and highly targeted outlets and working your way down. This formula also allows you to have a clear, open schedule for your most sought after meetings. No one wants to haggle with an outlet like the Huffington Post about timing! ... Pick up the phone. Begin the relationship on a more personal level and pick up the phone to pitch for a press tour. It's often hard, if not impossible, to truly portray the coolness of some products or services over email. Phone pitching allows you to "get real" with the press and tell them why it would work for them and their audience. Plus, you are more likely to establish a connection over the phone</p>
<p>Facts & Trivia = -1.24</p> <p>... healthcare business. And then on the positive side too, the other piece I would throw out is, as the economy moves to a digital-first, thinking about how we play in our semiconductor space, data centers, factory automation is another area of strength that has helped us and through COVID. ... Got that. And then as a follow-up, when I looked at the guidance that you had given or the framework for the third quarter, and you came in pretty darn close to -- and actually above on revenues and above on margins. What might be the prospects for restoring guidance? I know you've given our framework for Q4. But just if you -- in the position we are pretty darn close at this stage, when might guidance be restored? And when might you restore buybacks? I mean, you commented on disciplined capital allocation, but you had really good cash flow. ... You paid down debt, when might buybacks be restored? Thanks ... Yeah Dan, maybe I'll take the first part of that and just talk about how we think about guidance. And as we went through Q3 and got halfway thro</p>	<p>Facts & Trivia = -0.15</p> <p>... ties independently as well as in different projects with the government. These organizations have also implemented social accountability standard (ISO-26000). Thus employee at managerial or supervisory level is considered as a unit of analysis for this study. This study used survey based methodology and a questionnaire was developed after a comprehensive review of literature. CSR items are taken as independent variables and financial performance as dependent variable. Data was collected using questionnaire and distributed to the respondent, however, a formal permission was taken through HR department of each organization before conducting the survey. A stratified random sampling technique was used to reduce the common bias in the data. ... Questionnaire for this study consists of two sections; first section was about the general information about the respondent and the second section is to inquire respondent perceptions about the CSR items and its impact on the dependent variables. This study was based on employees experience and their exp</p>	<p>Facts & Trivia = 0.64</p> <p>... arily until most currencies were sold and the entire market got into a slump. ... However, after reaching its pinnacle in January 2018, the market crashed and has since been dwindling. In Telesivory's earlier blog, Blockchain, an emerging concept, a disruptive technology, we tried to explain the evolution of cryptocurrency and its technical knowledge. In this blog, Telesivory attempted to understand the volatility in its prices. Over the last 24 hours, Ether, the currency for the Ethereum network, went from \$1,09,964 to \$1,11,465, with a market cap of \$13.7T. ... So far, professional investors say they would actually welcome new regulations, as long as they are not too stringent. But Gensler has called on Congress to give regulators the authority to write new rules. "In the absence of, you know, definitive regulation that applies to crypto assets, we work with them to craft policies, procedures, and processes," she says. ... The computer controlled video display system includes a Z-buffer for storing Z values and a frame buffer for storing pixel values. The Z-buffer has a single, bi-directional data port which is coupled to a graphics update controller which is substantially similar to the prior art graphics update controller. The frame buffer may be a single port random access memory or a dual port random access memory. # The method of the invention for updating the Z-buffer with new Z values to replace the old Z values begins with the calculation of a new Z value and a new pixel value for each pixel location in a plural</p>	<p>Writing Style = 0.13</p> <p>... ual sources observed. # The observations were arranged in duty cycles. Each duty cycle covered a subset of two to four close-by sources (with integration times between 30 and 60 s in each source porting), in a similar way as the duty cycles described in Paper III. The duty cycles were designed to maximize the antenna elevations, which optimize the quality of the differential phase delays. We show in Fig. 1 the time distribution of all the observations. The frequency-switching changes were applied in two types of duty cycles, which were alternated every four iterations. In the first type of cycle (optimized for the frequency-switching calibration, see Sect. 3.2), half of the switchings were applied while the antennas were slewing among sources. If AL and AH are observations of source A at 14.4 GHz and 43.1 GHz, respectively, the duty cycles were arranged as This approach saves some time due to switching. In the second type of duty cycle, observations of different sources at the highest frequencies were put close in time: This approach</p>	<p>Writing Style = 1.01</p> <p>... # To travel a certain distance you must first traverse half of it. # Makes perfect sense. Two is one plus one. And one is one-half plus one-half. But don't be fooled by this seemingly innocent reasoning; it's a trap! (Admiral Ackbar!) # To appreciate what's going on-and connect Zen's paradox back to calculus-let's pretend Zen is in line at Starbucks, two feet away from the cash register. He's almost done scanning the menu when the barista yell is out "next!" And that's when poor Zen panics. He must now walk two feet, but because of his mind set, he walks only half that distance with his first step. He then walks half of the remaining distance with his second step. (Can you imagine how annoying those in line behind him are getting?) The figure below keeps track of the total distance Zen has walked and the change in distance after each of his steps. # Fig. 1.2: Zen trying to walk a distance of 2 feet by traversing half the remaining distance with each step. (Reprinted, with permission, from Calculus Simplified.) # Here's a tabu</p>

The property that $(\forall M^2=I)$, along with special properties of $(\forall J)$, allows you to conclude that higher powers of $(\forall M)$ are all just multiples of $(\forall J)$; in particular, examining $(M^3=JM^2=JM)$ reveals that every node in the graph has the same number of neighbors $(\forall k)$. So $(\forall M^2 = kI)$. (And $(\forall k^2 = nI)$ because $(\forall M^2)$ is the number of two-step paths, which lead uniquely to each node in the graph.) Notice that because of this neighbor property, $(\forall M)$ sends a column vector of all 1 ones to a column vector of all 1's, so $(\forall M)$ has an eigenvalue $(\forall k)$. Based on the powers of $(\forall M)$, $(\forall M)$ furthermore has $(\forall (n-1))$ generalized eigenvectors with eigenvalue zero. There are always exactly (n) independent generalized eigenvalues, and we've just found all of them. Their sum is $(\forall M^0 + \dots + \forall M^{n-1} = kI)$, which establishes the result. # The same procedure establishes a more general result: If there's a unique n-step path between every pair of nodes in a graph, then every node has (k)</p>

If you choose not to accept and pay the quote, your drive will be securely disposed 90 days after the quote expiry date. You can request the return of your drive at any time during this period by contacting us with your quote reference number, and paying a small return shipping fee. # Q: Are there any costs to me for the free evaluation or access? # A: You will need to pay for the shipping of your hard drive so we can inspect it (average price of our recommended courier service is £4.49). If you choose not to accept the quote and want your drive returned, you'll need to pay on average £6.00 for tracked shipping. Other than those, there are no costs to you. No exceptions. # Q: How do I package my drive? # A: Hard drives are delicate devices, and care must be taken when packaging them. Please ensure you follow the advice on how to ship your hard drive. # Can I send my device via Royal Mail or a different courier to that which you o</p>	<p>Required Expertise = 0.66</p> <p>... knowledge of the airplane, and proceeded to the runway to observe the takeoff. On takeoff the engine sounded "strong and even," and that the airplane popped up off the ground in a relatively flat attitude. This was followed by the mechanic stating that he heard a reduction in power and observed a slight sink, followed by an increase in power with a slight left roll and [ascend], then a decrease in power with a slight right roll/steep yaw, then an increase in power with hard left roll/left yaw. The airplane continued to sink until the left wing impacted the ground off the left side of runway 4R. # The mechanic reported that about 10 minutes later the pilot called to inform him that he had crashed, which the mechanic told him he had witnessed. Additionally, the mechanic stated that the pilot commented to him that there was a problem with the flight controls, to which the mechanic stated that he told the pilot that he did not believe that to be the case, that he observed the aircraft react in all directions, and that it appeared that the pilot</p>	<p>Required Expertise = 1.58</p> <p>... ed using frames so that the receiver can collect enough energy to recover the signal. Thus, the symbol duration is . The TH codes are integers chosen so that multiple users can access the channel concurrently and the transmission time of the monocyte waveform is delayed with seconds. Due to the highly-frequency selective feature of UWB channel, the frame duration is chosen such that, where ϵ is the maximum excess delay of the channel. This condition eliminates intersymbol interference (ISI). The energy of one pulse is ϵ, where ϵ is the channel template, denotes the convolution operation and denotes the noise including multiple access interference (MAI) and an additive white Gaussian noise (AWGN) with zero mean and two-sided power spectral density . The noiseless received signal energy in each frame is defined as and is proportional to the pulse energy. # Transmitted Reference (TR) with $n = 1$ if is even, otherwise = # Multi-Symbol Differential Encoder (MSDE) with and where is a multi-symbol block index and. # Multi-Symbol Tran</p>

A small flat ice pack comes in handy for taking items along that need some chilling or in their school lunchboxes for sandwiches that need a bit of chilling before lunchtime. Sandwiches are a favorite for my munchkins. There are endless possibilities as broad as your imagination. There's always good ol' peanut butter and jelly but wait...not just an PB&J. Here we have so many different jellies and jams and types of peanut butter or spreadable kinds of butter. Don't forget Nutella. Just try to limit how much you spread on the bread, as it has a lot of sugar in it. It's made with hazelnuts, and as long as it's used sparingly, it's a fun surprise once in a while. Types of jelly and jam my kids like - If we aren't picking berries from where ever we find them and making our own jelly, we buy jelly and jam with the fewest ingredients, no high fructose corn syrup (HFCS), a natural preservative like ascorbic acid or the ingredients are all organi</p>	<p>Writing Style = 1.00</p> <p>... flated prices on his produce. But it saves us a journey on the crappy track to town and the stuff is pretty good quality. He even sometimes has goodies like yoghurt and meat! Woohoo. There is also a truck that comes around who will fill the underground water tanks and will fill your water bottles, rare visits. In fact in two months we've only seen them once. Another fabulous pro to this paradise is the delicious fresh coconut water and flesh that Chris does most mornings to put on our breakfast. So fresh, literally fallen from the tree the day before. Erh, there's the con. I'm terrified of walking under these damned coconut trees, especially when it's windy which at the moment is quite a lot. I am sure it would kill you if one fell on your head and they're pretty stealth and you only hear them when they hit the sand with that very final dull thud. In fact I have googled it and apparently only about 150 people a year die from falling coconuts. I am very surprised! With our nearest neighbours at nearly two kilometres away and there</p>	<p>Writing Style = 1.84</p> <p>... long since become the village hall. Still, it was theirs, and the leaving was deeply painful for the older villagers. And like Normanton Church, which had lost its congregation long before the 1970s, it was symbolic enough for local people that they spent time and trouble keeping it intact. That's surely worth a visit from the land of the living. Normanton Church: 01788 686800; anglianna tier.co.uk. Check for openings and events such as concerts. Tyneham Village: tyneham.org.uk. <p>Facts & Trivia = -1.38</p> <p>... like we were the ones who made the mistake, not the kitchen. A simple dinner that should have taken an hour turned into almost two hours while we all sat there with quiet water glasses put in the far corner of a quiet restaurant. At one point a gentleman in a suit - presumably a manager? he did not really introduce himself - came over to ask how things were and when we explained, he said "oh okay we'll take care of that" - well we sat there for another 20 mins or so waiting for the check expecting our apps to be comped or something but received absolutely nothing. No offense but for \$140 bill without tip - there are A LOT of better places our money could have been spent - this place won't receive a dime of business again. My family and I had a great time there. I would recommend Red Stone to my friends! Waitress was nice. Food was horrible. very disappointed. The manager did not even offer to accommodate us given the food issues. Will not visit this location again. Redstone is always good, but they outdid themselves this tim</p>	<p>Facts & Trivia = -0.14</p> <p>... turned our experience around dramatically. In the end, I had a good time. Pro-tip: Each table seats 6, and they pair up their tables with very little space in between, so even though our party was split into two separate tables, we felt like we were sitting at the same one. They did put our orders on separate tabs, though: one per table. The food: pretty delicious. Unlike other Korean BBQ places, the sides were already served, meaning we sat down to a full table. I was a little overwhelmed at first, a bit confused by what all the dishes were, but our placements had instructions, and so by process of elimination, I was able to figure out which dishes held items meant to be consumed with the meat, and which were meant as sides that could be eaten separately. Another tip: for thoughtfulness, s. It was also pretty different that the grill held a little meat where the warm sides - eggs and corn with cheese - could be cooked and kept warm. The cold sides included kimchi, pickled radish soup, pickled radish, tofu, and salad. The salad, acc</p>	<p>Facts & Trivia = 0.79</p> <p>... team behind the garden labelled it "a sculpted art installation, not constrained by the rigours of season, climate or geography". The models were made by hundreds of volunteers including school children, war veterans and professional model makers - I can't decide whether I think it's a very clever piece of art designed to highlight gardening for all age groups or a stunt to gain publicity for May's new television show about children's favourite toys. The question that sticks in my mind, is how it could be judged as a garden if it contained no real plants? The Chelsea Judges obviously knew they couldn't judge it as a normal garden and therefore it was awarded a plasticine medal instead. While I'm sure there are many true gardeners whose distaste for the garden will linger long after the plasticine has melted. The people have spoken and voted for it in their thousands. It has gained the much coveted Peoples Choice Award for small gardens. These little pretty little flowers appear quintessentially British. Although most speci</p>	<p>Facts & Trivia = 1.77</p> <p>... cores, address environmental concerns, and preserve history - all of which help to redefine the post-industrial city (Loues, 2015). One of the earliest precedents of a post-industrial landscape is Parc des Buttes-Chaumont in Paris. The project was initiated by Napoleon III, who wished to clean up the slums and bring "green lungs" to produce a healthy air for the city and improve the aesthetics and image of Paris. Designer Jean-Charles Adolphe Alphand transformed the site of an old refuse dump and quarry site within the new industrial area of the 19th arrondissement, into Parc des Buttes-Chaumont (Komara, 2013). The design of the park engaged new construction techniques and new materials, such as irrigation systems, hydraulic pumps, tree-planting machinery, new uses of concrete, and more. Alphand planned along with the theme of the Exposition Universelle, which was industry, in the idea that some things found in nature look artificial, but what's new looks organic (Komara, 2013). After World War II, the industrial city shifted</p>

Upon arrival, I couldn't help but notice a few things that were unique about our experience here compared to other Asian ports. There was the usual long queue of people waiting for passport control and customs. But instead of standing in the morning sun, we enjoyed the shade of long, covered breezeways. We were processed quickly and courteously, such as the thoughtfulness of our Japanese hosts. Also, when we left port, a group of well-wishers stood on the dock and bade us goodbye. My first destination was the Glover Garden and Glover Residence. Thomas Blake Glover was a Scottish merchant, and his house is an interesting mix of Western and Japanese design and construction. Flowers, a koji pond, and statues of Puccini and Miura Tanaka (a famous Japanese opera singer who performed in "Madama Butterfly") decorate the grounds. We were lucky to see some flowering cherry Sakura as well. The residence and garden are located on a hill overlooking the harbor. It was not distant from the harbor, but we had to climb steps and</p>

The cathedral named in honor of Santa Maria del Fiore is a vast Gothic structure built on the site of the 7th century church of Santa Reparata, the remains of which can be seen in the crypt. The cathedral was begun at the end of the 13th century by Arnolfo di Cambio, and the dome, which dominates the exterior, was added in the 15th century on a design of Filippo Brunelleschi. A statue to each of these important architects can be found outside to the right of the cathedral, both admiring their work for the rest of eternity. Florence's cathedral is the 4th largest in the world, after St. Peter's in Rome, St. Paul's in London and the Duomo in Milan. The exterior is covered in a decorative mix of pink,</p>	<p>Required Expertise = 0.39</p> <p>... ecide who would represent the Families. Said representative had the authority to speak on behalf of the Five Families and each Representative would hold the position for a 10 year period before a new Representative would be selected in the same manner. To this day, Amath has been the centre of Food production and 'population' in the Principality, making it a ripe target for Bandits and Slavers from Isk'umar, as a result the number of Guard squad Irregulars and Kurgan Battleborn tend to slowly rise and fall as a dissuasive measure. A prime target for any invader, but the beating heart of the Principality on the whole. Falava City: The Default Capital City of the Region, Falava was first founded as a settlement meant to house the surplus population that came first. As time passed, wooden huts and tents gave way to a sprawling city metropolis of stone wood and bricks, the hierarchy made very clear: at the heart of the City are the Five Noble Families, all housed in the Grand House surrounding the Keep, the residence of the Regio</p>

He began as a player in the NFL, with three games with Hawthorn in 1966 and 1967 before receiving his medical degree in 1968. At that time, he was playing for Preston in the VFA. « 2018 AFL Hall of Fame « Submitted on Fri, 06/01/2018 - 6:51 PM EDT « Key in Sheedy waving the scarf « There are many adjectives one could use to describe Kevin Sheedy — pioneer, ambassador, quirky, madcap, innovator, eccentric, master coach, a legend in his own time. Now the latter is official as Sheedy, already in the Hall of Fame, was elevated to Legend Status. He became the 20th Legend. « The 2018 AFL Hall of Fame ceremonies were held on the Tuesday evening after Round 10. Along with Sheedy's elevation, six players were inducted — Terry Wallace, David Neitz, Wayne Johnston, Matthew Scarlett, Mel Whinnen (WA) and Bernie Naylor (WA). « Longmire Coach Of The Year « Sydney may have lost the Grand Final to Hawthorn, but Coach John Longmire enjoyed an individual victory over opposition Coach Alistair Clarkson when</p>	<p>Educational Value = -0.25</p> <p>... dnesday, May 8, the New England Revolution fired head coach Brad Friedel the next day. « He wasn't the only problem plaguing the Revs. New England is a prime example of how not to succeed in today's Major League Soccer. « Friedel was just 46 games into his tenure as head coach. The defeat was a good encapsulation of the myriad of problems that the former U.S. international faced in New England. The Revs had nothing in the way of attacking ideas, failed to finish the few opportunities they did create and made a slew of basic individual errors in defence to allow a five-spot against a Chicago team that had been shutout in three straight games heading into Wednesday's match. « The loss was New England's second consecutive five-goal defeat, dropped the Revs to 2-8-2 on the season and pushed their goal differential to a staggering -19. It was a pathetic performance, the type of game where you could almost see the players quit on their coach. « New England was justified in their decision to dismiss Friedel, but things won't meaningfully impr</p>	<p>Educational Value = 0.69</p> <p>... her in the half-marathon at Rock 'n' Roll Philadelphia in 1:04:37. He returned to Flagstaff until 1 December, and then returned home to Bowling Green for the holidays until the trials in January. « And, he said, it solidified his plan to stick to 1 longer distances. Based on his 10k PR in college, Eaton said he knew he didn't have the "wheels" — the top-end speed — to compete at the national level on the track. « "I figured early on that half and full marathons would be the way to go if I ever wanted to have a shot at making a world championship or Olympic team," he said. « He was right. In 2012 he ran on the U.S. team for the IAAF World Half-Marathon Championships in Bulgaria. « Following the 2012 trials, Eaton struggled at the full marathon distance for a couple of years. « Later that year, Eaton found himself struggling in the later miles again at Twin Cities, dropping out around mile 17. « Michael Eaton after winning the 2014 Monumetal Marathon. « In November 2014, Eaton won the Monumental Marathon in Indianapolis, finishing in 2:19:4</p>

I knew it couldn't last. « FC Barcelona losing to Chivas USA is the equivalent of Michigan losing to Appalachian State. « Justin Verlander threw 6 more no hitters this year. I'm not joking about that either. « The U.S. Women didn't choke. « (I mean did you watch the game? Japan never died. They kept fighting back and took advantage of the opportunities that were given to them.</p>	<p>Required Expertise = -1.10</p> <p>... gainst Florida on only one attempt. « Also, I would say that losing 70-19 is better than losing 56-6. My reasoning is as follows: Florida outscored South Carolina by more than an 9-1 ratio, but on only outscored the Citadel by a little more than a 3-6-1 ratio. Advantage, Bulldogs. « The good side of the basketball game also went about as expected, and this was a good thing. The Citadel was never threatened by Cincinnati. Christian and pulled away down the stretch for a convincing victory. CU had no answer for Cameron Wells, who had a good game on only on the set sheet, but in terms of letting the game come to him. Zach Urbanus had a strong first half and a solid overall game. The Bulldogs did a good job in this game of getting to the foul line and converting. Getting their fair share of free throw attempts has to be a priority for the Bulldogs, especially when shooting foul shots is one of The Citadel's strengths. « Speaking of that, Phillip Pandak got into the game late, and was almost immediately fouled. It was rooting for him to mak</p>	<p>Required Expertise = -0.55</p> <p>... h praise, I guess, from a seasoned veteran such as the Bont, accumulator of 56 games now, and all of 20 years old. « The Bont had 19 disposals. Not many by his peerless standards, yet to my mind he was, if not the best, the most influential player on the ground. « There was a wonderful moment, right in front of where the Tragician Tribe sit. Fritto had the ball, close to the boundary, and tried to launch a booming kick out of the danger zone of our forward line. But the Bont was right there, and with an athletic leap and full deployment of those "go-go-gadget" arms, spoilt the kick and forced it out of bounds. « 'Spud' looked crestfallen. And the Bont's reaction, visible only to us facing the two players, was a sight to behold. There was jubilation, and a full and utter appreciation of everything the moment meant. « And there was a touch of that facial expression, the one that generations of mothers have threatened to wipe off their children's faces. « A smirk. « And among all the sublime and audacious things The Bont did that day,</p>	<p>Required Expertise = 0.09</p> <p>... s arrival in the Welsh capital and then Maeterlinck's honour led to an unknown Cardiff City supporter deciding to call the team, resident in their blue strip. « The Blue Birds'. Gradually, it emerged as the favoured nickname before being adopted officially by the club. « At the time Cardiff City appeared in their first FA Cup final in 1925 an took the FA Cup out of England for the first and only time in 1927 the club sported the coat of arms of the city as their emblem. These arms were granted on 26 August 1906. The shield of the arms bears a red dragon, the national symbol of Wales. The dragon symbol has been in practically continuous use since the Romans brought it to Britain. When Roman withdrew her troops the dragon remained as the symbol of authority and unity among the Romanized Britons and became their standard in the wars against the invading Angles and Saxons. It was from this emblem the war-leader would take the name Pndragon, and would particularly be associated with the semi-mythical King Arthur. To this day the red d</p>

Cross-examined by MR. WILKINS. Q. A re you all acquainted with the process of makin	... urse, in the meantime, everybody knew what had happened. Everybody knew that I got lost in the forest. Everybody knew that I had to be helicoptered out. They found it generally quite amusing, mostly made fun of me. There wasn't a lot of sympathy. People around me thought, "Listen, you should have known better, and you didn't. Too bad for you," which really isn't wrong. People in this very small community, including my very good friends, were Swiss ski instructors, which is an extremely hard profession to obtain, triathletes, really serious outdoors people. The idea that this North American bikes into the forest and can't find her way out. They were not sympathetic really at all. My friends did find the situation funny. And I did, too. So there was really a sense of embarrassment. All the same emotions that I had felt sitting in that s helter, I felt again afterward because I thought, "Oh, what's my defense to this?" Then, I received a bill in the mail, and the bill was from the very nice folks who had arrived with the helicopter. It	... ymanski and Caroline scouted out the pens and quickly found the two fillies Caroline had on her list, but the colt was on the northern side of the island, which meant Caroline wouldn't have a chance to see him until the northern herd was rounded up and put in the pens on the southern side to await the much anticipated swim. When Caroline finally saw the colt, it was love at first sight. The day before the swim, Caroline was at the pens to see what foals would be tagged as "buybacks" (foals that are returned to the island to replenish the herd). Caroline had been told only fillies (female foals) would be kept as there were too many stallions on the island already. As she looked over the pens, her heart did a summersault. Both the fillies she was considering bore the red tag of a buyback. She was glad her number one pick was a colt and that she would at least have a shot at bidding on him. Just as that thought went through her mind, her phone went off. It was one of the Feather Fund girls calling to tell Caroline the colt she had f	... e lit window serves as a beacon. Someone is awake within the practice. Too late to be still working. The light belongs to one of the offices. Dr. Bethany Brooks within it, perusing patient files and making notations here or there. Busy work. To keep her awake and to stave off the blood filled dreams that have haunted her the past few evenings. Silence in the darkness is easy for one that lives solely within the evening's embrace. For several nights now, Marius has stood in the shadows, watching, listening to the movements that lie within those walls, both on the lower level and above; since he's learned where it is she works, and apparently resides. Often spending time alone in the evening is a good way to hone one's senses. Though vampires have the ability to move quietly, door knobs do not. The familiar squeaky creak of the knob is heard. The light in the office snuffed as she waits only a heartbeat to see if there will follow other noises. None appear to be forthcoming. Gating her robe from the chair Bethany situates it

... olngise, growl, whatever it takes." Jason's stern gaze pierced her soul. "It must be sincere or he won't accept it." He leaned back in the chair, crossing his arms, appearing extremely forbidding. She actually shivered. "Don't worry, he will believe me. I promise." She assured him. "I have also summoned Anna and Karen via email to be at my office at 9 o'clock sharp. I intend giving them both a severe verbal warning and a disciplinary on their record." He noted Alicia's satisfied expression. "However, I will be asking you to join us at 9:30 to apologise for what you did to them." Her mouth dropped open and she gasped. "No, Jason, don't make me do that, please." She pleaded with her eyes as well as her words. "That is only fair, Alicia. You don't want to fuel their accusations with favouritism, do you? And I expect you to reinburse Anna for her tyres. They need to know that you have been punished for your part in this fiasco." "He was adamant and she knew better than to argue, especially now that there were consequences.	... nce McMahon wouldn't allow it until he got on an angle with Jerry Lawler, which led to him being at the announcers table. "Vince didn't want me to talk," Faz revealed. "I didn't get on the mic and believe me, I had some pretty good promo work at ECW and I had my catchphrase 'best me if you can, survive if I let you' and he didn't care. He kind of wanted to re-brand me. And they don't tell you that. You kind of have to figure that out on your own. So fast forward a little bit, maybe a year or so, year and a half, I got into an angle with JR [Jim Ross] and that was at the Garden where I got verbal with JR and cut a promo on JR. Then they had Jerry Lawler punch me and he knocks me on my ass. I get into a big pull apart with king and me and king get into this angle for a couple weeks. Well, that angle is what put me at the announce desk because they had me take out Lawler before Snackdown, or something like that, and I sat next to Michael Cole. I was supposed to sit there for a segment and then Jerry Lawler was supposed to attack	... but still present, heart churning. You watch it organ throb from underneath the holes in the lung - it's just begging to escape. It would be so easy to reach in and take it, and you would if it could save your sister. She's nearly at the top of the donor waiting list. Distracted, you look back at the black burnt rubber on the pavement leading to impact. Your hands go through the motions of saving her; it's second nature at this point, but when everything happens at this speed it's easy to get left behind, so you refocus. Saving lives is your job. The left side of the girl's face is only halfway there, almost as charred as her arm, which sports a new unnatural angle thanks to an un sheathed bone. When she was thrown from her seat she must've turned slightly for her fatal surf along the cement. This isn't anyone's first call; you're all veterans who have seen every horror imaginable before, knowing when people will live or die comes with the territory. This girl will die. She will not live long enough to see the hospital. Your	... ay around the lavacomb. The sewage system's lack of life had her thoroughly confused. Even back home, where there was technology aplenty, the underground waterways were flooded, not just with waste, but also with monsters. Their unsanitary conditions provided the perfect nesting grounds for parasites, slimes, gorges, and other incarnations of filth. By contrast, Borrok Peak's sewers were empty, devoid of both excrement and the life it attracted. Anything that was discarded was incinerated the moment it reached the pipe's bottom. The environment served as the perfect disposal system, so long as the people inhabiting it didn't mind the constant threat of a society-ending eruption. The pipes, the vessels used to transport the borroks' waste, could just as easily serve to carry magma up into the city. Staring at the plumbing, the half-breed wandered around until she stumbled across a landmark. She realised, as she neared the lava chamber's center, that not all the tubes were open. They ones directly above the largest pit were shut o

... run along to fetch me some clothes." That shut him up even if he remained facing her. "Xfing wikaqolp?" He spoke to her in a guttural tongue that sent shivers dancing along her skin. She ignored how his voice affected her and concentrated on the fact she didn't understand a damned thing he said. "I don't know what the hell you just said so do you want to try again in English instead of whatever alien language you're using." She tapped a bare foot as she glared at him imperiously-naked or not, she refused to show fear even if inside she quivered at the situation. He snarled some foreign words before throwing something at her and stalking out of the room. Fabric hit her as she watched in stunned amazement how the previously unending door just slid across the opening, leaving the wall seamless again. Unsure of when the annoyed alien freak would return, she scrambled to get into the clothes, his she smirked judging by the size and style: a white turtleneck shirt that hung to her knees and pants that hugged her rounded ass but we	... more fishy goodness from that red bucket in front of me. I fished out the second fish (see what I did there?) and focused on making a better throw of it this time. I'd noticed that the Keeper had chuckled then higher up on the rocks so that Hudson would have to climb up to get them, and thus be visible to more people than he was down by the edge of the pool. So I heaved the fish trout and managed to get it up a couple of levels, which was a couple of levels higher than the first throw - not too shabby! Pleased with myself, I pulled out the third and final fish in the bucket, and waited while Hudson ate the one I hadn't botched. He seemed to like wandering across the exhibit, making sure he was feeling left out, and that everyone could see him from where they were standing. He especially wanted them to know he was eating fish, and that he had an amazing bucket to show them where the fish were done! When Hudson came back to our end of the exhibit, I paused to take some pics on my phone, commemorating the moment for myself, and	... nd he was enthralled. His workload piling up at the lab, he couldn't pull himself away from the whale. He quickly learned that auditory stimulation was a much greater reward for Skana than food. What came in the following months was a melody of tunes as Paul played everything from the Beatles an Rolling Stones to Bach. Skana loved them all. Paul was forced to accept that Skana was much more intelligent than any other terrestrial mammal he'd come in contact with. She was almost certainly, going crazy in her little pool, her calls reverberating and echoing off the concrete walls, with just a few humans for company. Capable of speeds up to 30 knots, Skana was resigned to swimming in slow circles day after day. It was apparent to Paul what needed to be done: Skana needed to go home. But when he did present his findings, a storm of criticism followed at the aquarium. They didn't want Skana to be a sentient intelligent being. They wanted the equivalent of an aquatic dog that would do tricks and keep people coming through the turnstil	... as she didn't have the energy for anything else. Play made beds for her toy dogs out of shoe boxes, using all the face clothes, napkins and towels in the house for bedding. She also played with her magnetic pop-up toys a lot, then later played independently with her dolls and cars, getting them set up for a journey and working out a complicated hierarchy for who sat where. This lasted over a few days. Board Games: My stepdaughter, D (8) had a new board game - Chinese Checkers. We all played it and I picked up the rules quickly and followed them well. She even figured out skillful moves. Politics: General conversations with W this week have covered: the law around sending children to school, children's rights in relation to this, Donald Trump and his wall, who pays for the Queen's palaces, gay rights, racism in America, gun control in America, and women's rights. All of these conversations were instigated by W, who appears at this stage to have a keen interest in politics and how the world works. Hopefully, we will d

... ew one of them, my friend Megs. The other people were her friends she'd met in Hong Kong. Two of the girls were visiting from Australia. Another was a native Utahn who brought her husband along to the dinner-they were newlives. Eventually, the conversation turned to the subject of marriage and the two at the table who had any said in it spoke up. The husband was several years younger than his wife, something that surprised me because of how often a few of my gay friends would reiterate the fact that they would never date an older woman. She went on to explain he might have had a guess but that he didn't really know until he had already fallen for her. So I guess that's how you do it. If you want to snag a younger man, don't tell him your age. Okay, fast forward a number of months. I'm on a blind date with this guys that my younger brother set me up with. They told me that he was younger than me, but didn't tell me by how much. When I met him, he looked 22. As we talked, I learned that he was at least older than that judging by th	... nstructions, safe but it did linger for a few days. I found night one and the next few nights pretty uncomfortable, but that says more about our old mattress than the Rem-Fit 400. According to the Ts & Cs at Rem-Fit they recommend that you sleep on your new mattress for a minimum of 30 nights to allow enough time for your body to fully adjust, which gives some comforting encourage to pursue (it's worth it, honest). We tested this mattress during the summer months, too, which has been somewhat a mixed bag of temperatures but the mattress - with its open cell memory foam which provides a degree of temperature regulation - cooled perfectly. With our wool duvet (cool in summer, warm in winter), cotton mattress protector (for extending the mattress longevity) and the window open we both slept through the nights, undisturbed unless it was to pump my glass of water which I like to keep full a my side of the bed at all times (it's comfort thing). To get an idea of the motion transfer I was paying more attention to how Joe moves around on	... as come forward with a shocking story about how his mother attempted to force him to be transgender starting at the age of eight. "I didn't know who I was," Lucas told Sausage Roll. His mother dressed him in girl's clothes before school, which resulted in alienation and confusion within the pool. He explained the shocking story about how the LGBT abuse started in his life. "My parents met online on some, now defunct, dating website. My father is an Australian labour worker and my mother was working as a waitress in Los Angeles, California, at the time," Lucas wrote in an email. "I grew up and went to school in Australia and everything was quite normal. I had a few friends and we'd hang out and play video-games or just mess around at the local part," he added. "Lucas' childhood was normal until his parents split up, which is when his mother without a strong patriarchal figure around to keep her in check started abusing her son by instilling transgender dogma into him. Lucas was forced to move to America, which alienated him	... sentence is our introduction to The Crooked Man and it warrants examination, for it contains a very singular point of interest. Notice that Watson tells us that the day in question occurred a few months after his marriage. We have commented on the frequency of Watson's participation in Holmes' cases in the months following Watson's marriage, and yet, it begs repeating, for it really is quite suggestive. Recall that Watson, according to Barin Gould, married Mary Morstan on May 1, 1889. According to Barin-Gould, the following cases took place a few months after Watson's marriage: The Boscombe Valley Mystery The Stockbroker's Clerk The Naval Treaty The Cardboard Box The Engineer's Thumb And this is limited to using Barin-Gould's dates. If we assume Mary to be Watson's first (and possibly only) wife, then we must also account for the cases Barin-Gould dated during Watson's supposed first marriage. In fact, were we to count the number of cases Watson's sets some few months after his marriage, I expect we would be quite

Perhaps the lion has evolved a distinct montane version, specifically adapted for success in this very different habitat from the lion's more typical savannah home. # Supporting this possibility is the apparent existence of comparable mystery cats in other montane ranges in East and Central Africa. Here they are referred to variously as the stararg (in Uganda), ikiniizi (in Rwanda), bung bung (Cameroon), and abasambo (Ethiopia). # WINGED CATS # The concept of domestic cats with wings would normally be confined to fantasy books and 'silly season' tabloid stories, were it not for the remarkable fact that such creatures are unquestionably real. As the world's leading investigator of winged cats, I have revealed and documented dozens of verified cases from around the world. One of the earliest, and still among the most famous, cases was that of a kitten from Wiveliscombe in Somerset, which was photographed in the Strand Magazine in November 1899, clearly revealing a pair of large fluffy wing-like exten</p>	<p>Educational Value = 1.20</p> <p>... company to build. Can you talk a little bit about that process and how it works? # Yeah, absolutely. To be honest, those outcomes are really well-defined, but they're constantly in flux. So I can tell you what we think are the most important things now, but they constantly change in terms of relative importance and relative confidence. # So insight of this idea of net-zero transition for us, there are sort of five key requirements that we're currently working on. One is that we need to remedy historical emissions. Another is that we need to reduce the emissions going into the future. A third is that we need to find a way of eliminating the sunk cost in the oil and gas industry and making it easy for that huge wealth of assets to move across. A fourth is that we need to kind of oil the work so the financial sector, is such that we see huge influxes of capital into the space. And a fifth is that we need to generate energy and create energy systems that are capable of holding renewable energy successfully. So under each of those, we</p>	<p>Educational Value = 1.98</p> <p>... synthetic supplements should never be a part of a healthy child's diet. # The variety of fruits is endless! Include all fruits such as apples, apricots, bananas, berries, grapes, melons, cherries, cucumber, figs, kiwis, mangoes, mulberries, nectarines, oranges, papayas, peaches, pears, pineapple, watermelon, etc. # Also include dried or freeze-dried fruits for treats. # Purchase fruits organically grown if possible. # All veggies such as tomatoes, bok choy, broccoli, cabbage, carrots, cauliflower, celery, collard greens, cucumber, eggplant, potatoes, pumpkin, scallions and onions, root vegetables, summer and winter squash, yams, etc. # Raw, lightly steamed or boiled, or sautéed with a small amount of unrefined, cold pressed oil or butter. # Purchase veggies organically grown if possible. # All legumes such as beans (e.g. azuki beans, chickpeas, black beans, pinto beans), peas, and lentils. # Legumes typically contain a more complete set of amino acids (protein building blocks) than many other plant foods. # To increase their digestibili</p>
<p>Required Expertise = -1.05</p> <p>...ften colonies of up to half a dozen squat urchin in shrimp of varying sizes will all share the same urchin. Beyond its circumtropical distribution and perfect camouflage, the squat urchin shrimp further demonstrates its successfulness by feeding upon the internal tissue of the very spines that grant it protection. This is a relatively benign form of parasitism that doesn't seem to bother the urchin. These shrimp will also feed opportunistically upon detritus that the urchin picks up as it moves along the sea floor. The squat urchin shrimp is a creature that has found a near perfect niche in a truly eye-sustaining, self-contained world of spines. # ZEDvit has just released the latest in their Dream Tank of the Quarter Series. Molecular methods can identify pathogens that culture-based methods miss. Most cases of neonatal sepsis globally are treated empirically per WHO guidelines with intravenous ampicillin and gentamicin, which may not</p>	<p>Writing Style = 0.31</p> <p>... wspapers and more also on television, the way young people watch and consume media has fundamentally changed," said Robin Koval, CEO and president of the Truth Initiative, a nonprofit tobacco control organization. "For instance, only about 5% of 18- to 29-year-old Americans often get news from reading print newspapers, according to a Pew Research Center survey conducted last year. "They're all watching YouTube and social media and all the many, many other video channels that exist that, frankly, weren't even around when the judge originally ruled," Koval said. "So this won't be the best vehicle to reach the youngest people who, of course, Big Tobacco sees as their replacement smokers." "The "corrective statements" serve as the end of "a particular battle that went on for way too long," she said, but the tobacco industry continues to oppose tax increases, opposes using graphic images as warnings and opposes banning the sale of menthol cigarettes; flavored tobacco is thought to be more appealing to younger smokers. "I'd like to sa</p>	<p>Writing Style = 1.03</p> <p>... tation for mental health problems of general hospital patients to multidisciplinary teams having different health professionals including psychiatrists and physicians required to work in a highly collaborative fashion.[22] Through such integration, C-L psychiatry provides a bridge between psychiatrists and non-psychiatrist clinicians, providing them a rare opportunity to share knowledge, undertake collaborative teaching and research, and provide comprehensive and well-rounded patient care. Specialized training in C-L psychiatry has been going on in several parts of the world, predominantly in the developed countries, for some years now.[22] But more recently, NIMHANS, Bengaluru has also started offering specialized C-L psychiatry fellowships to psychiatry graduates. Understandably, this will reduce the communication gap and provide psychiatric and non-psychiatric professionals more adeptness in each other's language. With the advent of specializations, some sub-specialties which border between psychiatry and other disciplines have</p>
<p>Facts & Trivia = -0.82</p> <p>... live and you can join online from home. Monte Sahaja is in a hilly rural area, and many areas are only accessible via stairs so unfortunately it is not easily accessible by wheelchair. Is Satsang suitable for someone with a mental health or psychiatric disorder? If you are currently receiving or have previously received any medical treatment or therapy for issues related to mental health, an environment of deep contemplation or introspection (such as a concentrated Satsang environment) may not be suitable for you. Please check with a medical or other mental health clinician whether being in such an environment is suitable for you at this time. When and why might Satsang not be suitable? Those experiencing psychiatric conditions, or other unusually strong emotional upheavals might not benefit from a concentrated Satsang environment. Occasionally, being in such an environment can adversely affect pre-existing mental health conditions. It may bring up latent traumatic imprints or deep-rooted tendencies in the body-mind, which</p>	<p>Facts & Trivia = 0.24</p> <p>... social event! With all this academic content, it's important to remember that PsyKo is also very much a social event! Workshops and lectures are separated by plenty of breaks to give you the chance to meet other students and grow your network! In tune with this, the last happening of the day will be a party hosted by PsyCh, with the aptly named music group Express Therapy providing the entertainment! If you haven't made any friends by Saturday evening, now is the time to hit the dance floor and meet people! The final day of the conference is less packed. Workshops on Mind-Body Therapy and Psychological flexibility take place in the morning, and the closing lecture at 13h00 marks the end of the congress. We're looking forward to meeting you there! Tomorrow we'll talk to Yara Delgado, the mastermind behind PsyKo21, to hear her thoughts on this year's congress. Stay tuned! For a detailed overview of the conference program, please consult the conference booklet. PsyKo2021booklet Download ALPS: The Psychedelic Renaissance Po</p>	<p>Facts & Trivia = 0.98</p> <p>... n for mortality (P-POSSUM). This study involved 153 consecutive patients aged 75 years and older who underwent elective gastric or colorectal surgery between July 2004 and June 2006. A retrospective analysis was performed on data collected prior to each surgery. The predicted mortality and morbidity risks were calculated using each of the scoring systems and were used to obtain the observed/predicted (O/E) mortality and morbidity ratios. New logistic regression equations for morbidity and mortality were then calculated using the scores from the POSSUM system and applied retrospectively. The O/E ratio for morbidity obtained from POSSUM score was 0.23. The O/E ratios for mortality from the POSSUM score and the P-POSSUM were 0.15 and 0.38, respectively. Utilizing the new equations using scores from the POSSUM, the O/E ratio increased to 0.8. Both the POSSUM and P-POSSUM over-predicted the morbidity and mortality in elective gastrointestinal surgery for malignant tumors in elderly patients. However, if a surgical unit makes appropriate c</p>	<p>Facts & Trivia = 1.75</p> <p>... ticipants fasted overnight and had a test breakfast smoothie with 205 kcal of either MCT oil, coconut oil, or vegetable oil (control) on three separate days. They found out that MCT oil showed significant increase in food intake compared to coconut and control oil. The control oil increased food intake compared to MCT and coconut oil. MCT oil also increased satiety for over 3 hours after breakfast compared to the other two oils. The results from this study also provide evidence to the fact that pure MCT oil and coconut oil are not the same. Even a reasonably old study from 1998 supports the theory that MCT reduces food intake by increasing the feeling of fullness for longer. A 2008 study compared the effectiveness of MCT oil and olive oil for weight loss. Forty-nine men and women (aged 19-50) were divided into two groups. One group consumed 18-24 g of MCT oil per day and the other group consumed the same amount of olive oil as part of a weight loss program for 16 weeks. They found out that consumption of MCT oil had a significant reduction</p>

... t of all about Silverman is the way in which he sees her Jewish identity as a hammer with which to pound Israel. # Obviously, I'm not disputing a comedian's right to express her opinions about political events in other countries, although I do find it curious when someone who does not seem to be part of the organized Jewish community suddenly has very specific opinions on Israeli politics. # Just before the 2015 Israeli elections, Silverman sent out a tweet appealing to Israelis to vote for the extreme-left Meretz Party. In 2017, she contribute d to a book called Save Israel. Stop Occupation, in which she wrote: "Of all people, Jews know the bitterness of being oppressed and not being in our own country. That's what makes the occupation all so ironic." # Stephen M. Flatow # What's ironic is that Silverman is complaining about an "occupation" that ended in 1955. I guess she wasn't paying attention that year. # When Israeli Prime Minister Yitzhak Rabin withdrew Israel's forces from the areas where 98 percent of the Palestinian Arabs live. I	... de East that relies on Saudi Arabia. # Overlooking Saudi Arabia's crimes to pressure Iran bears eerie resemblance to America's early backing of Saddam Hussein throughout the Iran-Iraq war. A more balanced approach to the region is needed. # Undercut Moderate Forces in Iran # Trump's Iran sanctions are likely to crush the Iranian middle class and private sector, unleashing economic desperation in the country and limiting prospects for vindicated moderation. # Iran's hardliners have been vindicated by Trump's decision to violate the JCPOA and snap back sanctions, and will benefit from sanctions that crush forces for moderation while leaving them relatively unscathed. # Trigger a Humanitarian Crisis in Iran # Sanctions on Iran under the Obama administration triggered shortages of key life-saving medicines and contributed to the impoverishment of ordinary Iranians by depressing the economy and increasing the cost of basic goods. Similar effects are already being felt from Trump's snapback. # The Trump administration has already targeted pr	... Offensive Began Many Months Ago # Clare M. Lopez # President Trump green-lighted the Turkish cross-border assault against the Kurdish Syrian Democratic Forces (SDF) after a phone call with Turkish President Recep Tayyip Erdogan on Sunday 6 October 2019. # The influence operation to prep him for that moment began many months ago. # Events in the Middle East have unfolded rapidly since Trump's decision to pull U.S. troops out of areas in northeastern Syria ahead of the coming Turkish invasion that began 9 October with a combined force of armored, mechanized and commando brigades, assorted special forces teams and over 6,000 Syrian National Army (SNA) fighters from various Turkish-backed Syrian rebel groups. Close to a week later, hundreds of Kurdish civilians are dead, thousands more are uprooted and fleeing, and Turkey's forces continue advancing ever deeper into Kurdish areas, even as Syrian troops head north to confront them. Turkish forces have even launched multiple artillery rounds in the direction of a U.S. Special Operations po	... t there has yet to be one collision, or even a near miss, among the high-powered superpower American, Allied, Russian and Syrian fighter bombers. # Russian and Syrian Air Force officers gave details of the carefully planned flight path to and from Khan Sheikhoun on April 4 directly. # In English, the deconfliction monitors aboard the AWACS plane, which was on patrol near the Turkish border, 60 miles or more to the north. # The Syrian target at Khan Sheikhoun, as shared with the Americans at Doha, was depicted as a two-story cinder-block building in the northern part of town. Russian intelligence, which is shared when necessary with Syria and the U.S. as part of their joint fight against jihadist groups, had established that a high-level meeting of jihadist leaders was to take place in the building, including representatives of Abrah al-Sham and the al-Qaida-affiliated group formerly known as Jabhat al-Nusra. The two groups had recently joined forces, and controlled the town and surrounding area. Russian intelligence depicted the cinde

... ill rise up and no longer support all of the clueless unthinking military adventures. Hence what so one view as the illogical funding of Al-Qaeda and terrorists to carry out the dirty work. # What will happen when these terrorist elements begin to realize that they have been merely disposable pawns for the US and that they have been killing their own brothers and sisters? Of course the US has not thought of that. The backlash when Al-Qaeda and all of the motley groups of terrorists realize they have been killing their brethren for their enemy will be monumental and Americans will finally see what real terrorism is all about. I believe that is a given. But that is okay for Washington too, they have all of the plans in place and this will allow the military industrial complex to expand and invade even more countries. What are a few American lives? # What about Israel? As I have said in the past, in reality the United States does not care about Israel. The mainstream that will occur if the US strikes Syria will be monumental and r	... the U.S. Capitol on December 21, 2022 in Washington, DC. In his first known trip outside of Ukraine since Russia invaded, Zelensky met with U.S. President Joe Biden and outlined Ukraine's request for continued military aid. (Photo by Chip Somodevilla/Getty Images) # In 2023 the west will need to decide how it wants to protect democracy in Ukraine because the winter could stretch deep into April and May of 2023. If the west does not step up to help Ukraine the constant rocket attacks could cripple the country. There is immense intellectual capital in Ukraine that needs to protect and nurture. Listen to my podcast about the rebuilding of Ukraine here. # Welcome to the new volatile labor markets - globally each of us needs a very astute sports agent. # Scott Boras is a hated man by sports franchise CEO's and owners in the USA. There are similar agents in soccer in Europe, like Jorge Mendes. They have something in common. Even if we fight over the idea that one sport is called football or soccer. They make incredibly high sums of no	... and Qatar was resolved in March 2001. The border with Oman also is not demarcated. # Saudi forces did not participate in the Six-Day (Arab-Israeli) War of June 1967, but the government later provided annual subsidies to Egypt, Jordan, and Syria to support their economies. During the 1973 Arab-Israeli war, Saudi Arabia participated in the Arab oil boycott of the United States and Netherlands. A member of the Organization of Petroleum Exporting Countries (OPEC), Saudi Arabia had joined other member countries in moderate oil price increases beginning in 1971. After the 1973 war, the price of oil rose substantially, dramatically increasing Saudi Arabia's wealth and political influence. # King Fahd suffered a stroke in November 1995. From 1997, Crown Prince Abdullah took on much of the day-to-day responsibilities of running the government. Upon King Fahd's death on August 1, 2005, Abdullah assumed the throne as King. Prince Sultan, Minister of Defense and Aviation, became Crown Prince and First Deputy Prime Minister. # The central institu	... e, but a second wave of wars began when the Go sacks allied with Russia and pushed deep into Lithuania in 1655. In the same year, Sweden piled on, capturing several of Poland's major cities. The Go sacks and the Russians treated the Jews far more brutally than the Swedes, but they were trouble to o. The successful Polish counterattack against Swedish forces was also disastrous for the Jews, who were accused of treacherously assisting them. "Hungreds, if not thousands, of Jews were killed, and a mass exodus began." # How many Jews were killed or uprooted during these years? Relying, like Chazan, on the research of Shaul Stampfer, Teller reports that of the 40,000 Jews in Ukraine, some 10,000 died between 1648 and 1654, in addition to an indeterminate number of others who were massacred in other parts of the Polish Lithuanian Commonwealth. Refugees who remained within the borders of the Commonwealth must have numbered at least 15,000, a number 10,000 seem to have migrated beyond the m. Contemporary but unreliable reports refer to 20

... s off in Subic Bay # From the Philippine Daily Inquirer (Oct 9, 2018): PH-US military drill kicks off in Subic Bay # Philippine Marine Corps officials lead the opening ceremony of the third edition of "Kamandag" or "Kaagapay ng mga Mandirigma ng Daag (Cooperation of Warriors of the Sea)" at the Subic Bay International Airport on Wednesday. Photo by Joanna Rose Aglibot # SUBIC BAY FREEPORT - A 10-day joint military training involving more than 1,500 Filipino and American troops officially began here on Wednesday. # The military drill was dubbed "Kamandag" or "Kaagapay ng mga Mandirigma ng Dagat (Cooperation of Warriors of the Sea)" in its third edition. # The training is a Philippine-led military training exercise between the Armed Forces of the Philippines and US Forces that will run until Oct. 18, according to Capt. Felix Serapio, director of the Marine Corps Public Affairs Office. # Maj. Gen. Ramiro Manuel Rey, chief of the Northern Luzon Command, led the opening ceremony of the exercise at the Subic Bay International Airport here on	... at. No. 1 was told, this was a training exercise for the Central Intelligence Agency, the CIA, and they wanted to know if I would be willing to participate. # I opened the conversation by saying: "According to your original charter from when the CIA was created in 1947, you're not supposed to be working directly within the US." Well, I got the em-haw. # It wasn't long after the meeting when I found out something else. I was stunned to learn that there are CIA operatives inside some state governments. I'm left to wonder why our Constitution is being violated. Source: Don't Start the Revolution, by Jesse Ventura, p. 90-94, Apr 1, 2008 # Bush administration knew 9/11 was coming # When it comes to the question of "what did they know and when did they know it," as the old Watergate phrase goes, my B.S. detector antenna goes sky-high. Consider these facts about the summer of 2001: # July 26: Attorney General Ashcroft stopped flying commercial airlines because of a threat assessment. # A ug. 6: Pres. Bush received a briefing titled: "Bin	... r a hundred years of bloody wars I finally realize this is the Jewish national home, too. We need a two-state solution. Can you imagine? ... But no one is ready to do it." # In the political imaginations of Israeli Jews and Palestinian Arabs, "Europe" continues to play an overwhelming role. Oz declares: "The Jews and the Arabs had the same oppressors. The Europeans were guilty of anti-Semitism and the Holocaust, and the Europeans were guilty of colonialism in the Middle East and, the exploitation of the Arabs. In Brecht's poems, the oppressor join hands and march together. But the two children of the same oppressive parent can often be the worst of enemies. The Palestinians look at me, the Israeli, as an extension of white, sophisticated, colonizing Europe, which returned to the Middle East to do the same old thing: dominate, humiliate, like European crusaders. The other side, the Israelis, see the Palestinians not as fellow-victims but as pogrom-makers, Cossacks, Nazis, oppressors in kaffiyehs and mustaches playing the same ancient g	... East, was made clear by Tillerson's response to Tuesday's events. The secretary of state denounced Assad for his "brutal, unabashed barbarism," before adding that Russia and Iran bore "moral responsibility" for the attack. # Tillerson's provocative remarks come on the heels of last week's comments from General Joseph Votel, chief of the US Central Command, who told a House Armed Services Committee hearing that Iran "poses the greatest long-term threat to security in this part of the world." # Since Trump took office, the war initiated by Obama in Syria and Iraq has been drastically intensified. Trump has given a free hand to commanders on the ground to launch air strikes and other attacks, while increasing the number of troops deployed on the ground and expanding their mandates to act closer to the front lines of fighting. The result has been a devastating rise in civilian casualties in both countries, with the death of hundreds of civilians in the Iraqi city of Mosul and hundreds more in air strikes in northern Syria. # Trump has

But it is better to add some space of free research for the scienti sts themselves, allowing them to study some fields where they feel there is hope of discovery. Useful results may come by indirect ways, and therefore r esearch must not be 100% planned. » *** Furthermor e we must beware that the planning proposals could cover censorship of some fields : groups may propo se discarding research in some fields not really b ecause they think money would be more useful elsew here, but because they are afraid this research co uld lead to unpleasant results. » *** Ferey underl ines how useful may be diversity among the scienti sts. But she omits an important parameter : the in tellectual training. When all the scientists in a field have the same training, conformity is much e asier to get. If for instances the sociological st udies are made by people of different background - psychological, biological, historical, economical</p>	<p>Writing Style = 1.48</p> <p>... ption of the continuity and importance of Plat onism, could imagine. » In this post I want to ref lect on my namesake's own remarks about translati on (in his preface) and on the formatting and meta-textual aspects of Johnson's translation (includin g his notes). I will also say a little about the c ontents of his volume. Let me begin by quoting fro m the very beginning of his Preface. » The English language, by reason of the poverty of its philosop hical vocabulary, is inadequate to fully express t he deep insights of the Platonic thinkers. Their b ooks are in a "sealed dialect" to the many, in any language, and to the mere verbal Greek scholar, as well as to those who are innocent of Greek they a re unintelligible. Chemistry, Biology, and the othe r natural "sciences" have technical vocabularies, and Philosophy, the Science of sciences, has a voc abulary peculiar to itself, and this must be maste red before one can apprehend philosophic concepti ons. Philology alone will not furnish a key to the thought of Plato and the Platonists. (p. I) » T. M</p>

... (s). The Protagonist (AJ) is likeable enough character. His interactions with other characters in the story is good. The one part that's hard to swallow is that he's an expert sniper and no one else can do what he does. Yes, I know the story has reasons for why he's a bad-ass. But most of the other spec. ops characters in the story somehow can't hold a candle to him (even though he's just a kid). I find it hard to believe. This series sort of strikes me as a young adult novel than it does an adult book. Short on justification for why some things are the way they are or perhaps a simplistic version. With a young hero that most of the adults are fawning over to hear his wisdom or praise his is amazing abilities. If you can get past those things, then you'll certainly enjoy the books and their storylines. # Rockbreaker # Where is the next book? # Don't start this on a weeknight or you will be going to work tired. Hard to stop listening. Very good story! # M. Lemley Wright # Entertaining new series. # I really enjoyed the story. The situ	... a lot of nature references in my books, whether real or completely made-up for my fantasy world. I like to mesh reality and make-believe. The natural world fascinates me and has always been my inspiration. So, there's bound to be some science-related themes in every book I write, whether it's weather and geography, human physiology, or microbiology. It's a running theme. # delved into self-publishing was because of the positive feedback I received from agents on my manuscript. When agents compliment your world-building, your writing, and the story, and tell you to touch base with them for future projects? It's eye-opening in a way that a friend's "This is great!" isn't. (Not that my friends aren't positively amazing and cherished for their encouragement. They are. But when an agent compliments your writing? It's a Big Deal.) That encouragement gave me the courage to take the leap. # Cliché as it sounds? From everywhere. But a lot of it comes from nature and the natural world since I'm a scientist at heart. # My very first book	...] # "No one ought to feel surprise at much remaining as yet unexplained in regard to the origin of species and varieties, if he makes due allowance for our profound ignorance in regard to the mutual relations of all the beings which live around us." Darwin, leading the last paragraphs of the end of the introduction to the Origin, page 7. # Posted by John F. Ptk in Absurdist, Unintentional, Bad Ideas, Blank and Empty Things; A History of 'Perm alink I Comments (0) TrackBack (0) # Tags: Darwin, Descent of Man, Evolution # The Sublime Antiquarian Art of Children, Part I # Among my favorite places in Washington, D.C.--a place where I lived for 29 years--are its cemeteries; in particular Rock Creek Cemetery, but more specifically, Congressional Cemetery. Congressional is a big place, tucked away, sort of, away in Southeast D.C.--that is if you can tuck away a 30-acre piece of land. Congressional is an odd place, filled with many interesting people; its filled with their actual remains, and also their memories. There are many folks wh	... y discovered laws of outer space are actually within us as well, and that a new mythology is implicit in that realization. But what is this new mythology? How can we recognize it? Campbell explores these questions in the concluding essay, "'The Way of Art,'" in which he demonstrates that metaphor is the language of art and argues that within the psyches of today's artists are the seeds of tomorrow's mythologies." (Back cover to the book 'The Inner Reaches of Outer Space: Metaphor as Myth and as Religion' by J. Campbell). # Strangely that same 'form' [in reference to 'eight' symbolism] when I aid in the 'horizontal' position represents mathematics 'infinite' symbol. Hence the link to 682). Both 'numbers' represented within the total 'whole', i.e., (19). The micro/macro within the collective. # [Nineteen represents; in part; the 'collective' effort. See A. Schimmel books]. # A world wide conspiracy over thousands of years? Or maybe, something more genuine? Sense or non-sense. A possibility or not? Fact or fiction? # 68 68 64 # eggs in ones

... ed situation in Middle East, observes Free and Fair Election Network in its Daily Factsheet. Following key observations of the House proceeding s during the fourth sitting of 18th session: Members' Participation The National Assembly met for 10 hours and 28 minutes; however, [...] National Assembly: Govt. Introduces Amendments for Services' Chief's Appointment and Extension on ISLAMABAD, January 3, 2020: The Minister for Defence introduced three bills in the National Assembly on Friday seeking to amend the procedures for appointment and extension of armed forces' chiefs and the Chairman Joint Chiefs of Staff Committee, observes Free and Fair Election Network in its Daily Factsheet. Following key observations of the House proceeding s [...] Missing Ministers Get Warning in National Assembly on ISLAMABAD, January 2, 2020: The Chair in National Assembly on Thursday issued warning to the government ministers, parliamentary secretaries and relevant government officials for ignoring the the House business and staying absent from the proc	... But James Troupis, a private attorney hired by Fitzgerald, argued Thursday that the move is legal, because the state Constitution allows each house to "compel the attendance of absent members," the Wisconsin State Journal reported. "In Indiana, most House Democrats skipped Thursday's floor sessions, extending their stay at an Urbana, Ill., hotel to a 10th day and preventing action on the bills because too few members are present. The fines would start being assessed on Monday and be deducted from the salaries or expense allowances of the absent members. Republican House Speaker Brian Bosma said he decided to seek the fines because the Democratic boycott had reached "the point of absurdity." "We've tried every other means other than conceding to a list of demands and this is one of the few items that we have as options," Bosma said. House Democrats calculate that the absence of the Democrats has cost more than \$250,000 in taxpayer money for the salaries and expenses of running the House during the walkout, which Bosma called "	... move could leave several million people uncoun ted and cause California, Texas and New Jersey to lose seats in the U.S. House of Representatives. House districts are based on a state's population count in the decennial national census. The challengers have said Trump's plan would dilute the political clout of states with larger numbers of ill egal immigrants, including heavily Democratic California, by undercounting their true populations and depriving them of House seats. If California loses House districts, that likely would mean Democrats lose House seats, benefiting Republicans. There are an estimated 11 million immigrants living in the United States illegally. Until now, the government's practice was to count all people regardless of their citizenship or immigration status. The U.S. Constitution requires the apportionment of House seats to be based upon the "whole number of persons in each state." The challengers have argued that Trump's policy violates both the Constitution and the Census Act, a federal law that outlines	... "I am hopeful they can deal with more than one issue at the same time." The group has already released an open letter to Congress and the White House. In it, they the group presses Congress to respect "the God-given dignity of every person" and establish a "path toward legal status and/or citizenship for those who qualify and wish to become permanent residents." "As evangelical leaders, we live every day with the reality that our immigration system doesn't reflect our commitment to the values of human dignity, family unity and respect for the rule of law that define us as Americans," the letter states. "Initiatives by both parties to advance common sense fixes to our immigration policies have stalled in years past." The group's launch last June, organizers have been fundraising and placing people in three states, Colorado, Florida and Texas, to lay the groundwork with local evangelical leaders and politicians. By making the se early investments, coalition leaders hope there will be a highly reactive group of evangelicals re

... Never in history have I seen such a group of unelectable & undeserving candidates, Democrats & Republicans, for US Presidential elections! I appreciated the Clinton Presidency (except for his sleazy behavior in the White House with Monica Lewinsky). I originally liked George W. Bush for not being as slick as the Democratic candidates and believed it was time for change. I could not believe America elected Bush a second term and let him do so much damage to the USA and the world. I voted for Obama, though he has been a big disappointment in the second term so far. Much that I dislike in any of the Republican candidates. I truly cannot like this woman, and would not trust her. I could still see her winning if the Republicans did not get their house in order. But with this non-stop display of being over-clever and actually doing more and more stupid things, Hillary may become Democrats' liability if they keep all their eggs in her basket. The Clintons got away with an unexplained murder (supposed suicide) of Vince Foster. They go	... ng to fend off Russian aggression. [...] The argument, "Why don't you just let him cheat in one more election? Why not let him cheat just one more time? Why not let him have foreign help just one more time? That is what that argument amounts to. [...] Ben Franklin said we have a republic, if we can keep it. The President and his men say you can't keep it and Americans should just get over it. Americans don't go to decide American elections any more, not by themselves, not without foreign help. For the Members of Congress, this is not a question of fact because the facts are not seriously contested; it is rather a question of duty. The President's oath of office appears to mean very little to him, but the articles put forward today give us a chance to show that we will defend the Constitution, and that our oath means something to us. "Boiling a dead, full transcript below. Transcript of Speaker Pelosi, Committee Chairs Announcing Articles of Impeachment at Washington, D.C. - Speaker Nancy Pel	... involving the two leaders, but Obama and Karza i did not appear in that room at the palace. Despite the U.S. urgings for more transparency in Karza i's government, the two presidents took no questions when they spoke briefly to journalists after th e official meetings. During the trip, the White House said, Karza i accepted an invitation from Obama to visit Washington on May 12. Karza i and U.S. officials have had a difficult and prickly relationship, with the U.S. chafing at widespread reports of rampant corruption in the Afghan leader's government, as well as at his tendency to embrace warlords accused of human rights violations and drug trafficking. For his part, Karza i has suggested th at U.S. officials don't appreciate the challenges in keeping a national government together in such a fractious country. Obama has promised to start withdrawing U.S. troops by July of next year - a promise that may only be fulfilled if the Afghan government can demonstrate greater competence in both the military and the civilian realms. White House	... existent) fraud, championing measures that make it harder to vote, tolerating-if not fomenting- passive Russian interference in the 2016 presidential election, encouraging mob violence at rallies, darkly hinting at violence if Democrats hold power, and constantly casting doubt on the legitimacy of elections unless he wins." 17. Both attack the judiciary and rule of law. "Hitler politicized a nd eventually destroyed the vaunted German justice system. Trump also seeks to turn the American justice system into his personal playground," "Like Hitler, Trump threatens the judicially enforced rule of law, bitterly attacking American judges who rule against him, slyly praising Andrew Jackson for defying the Supreme Court, and abusing the pardon power by pardoning an Arizona sheriff found guilty of criminal contempt of court for disobeying federal court orders to cease violating the Constitution." 18. Both glorify the military and demand loyalty oaths. "Like Hitler, Trump glorifies the military, staffing his administration with layers

... ery good at whatever she is called on, or wou ldn't, to do. She was an unethical member of the Watergate investigative staff, a less than distinguished attorney at the Rose Law firm, a US Senator of no consequence, and a Secretary of State with no accomplishments to speak of. As first lady she supported her husband's efforts to conceal the bimb o eruption by calling his later vindicated accusers a bunch of liars. She voted for the Iraq war wh en, based on her husband's knowledge of the truth, she should have known better. After Benghazi, she failed to acknowledge the Al Qaeda planned attack when she knew the whole video story was nonsense. Her personal email system while SOS shows, at best, a stunning lack of judgment, and, at worst, an intent to conceal a pay for play scheme funded through the Clinton Foundation. Without her husband leading the way, she would likely be an attorney with a big firm, making good money as a back room researcher. She will almost certainly be our next President, thanks mostly to her husband and the conc	... him. Unlike every other major GOP figure in m lifetime, he has not caved in to media-generated waves of criticism, but rather turned his opponent s' fury against them, using the (borrowed) expression "fake news," often supplementing it with the even more inflammatory expression, "enemy of the people." And it has worked. [...] The media's hysteria has firmly established the unfair bullies in the minds of a plurality, if not outright majority of Americans. Like Godzilla drawing power from the hi tension electric lines he crossed, the mainstream media is energizing Trump's support. Left Says Dial Down Rhetoric As They Get More Hateful. The left - Democrats and media - have predicted th e fall of Donald Trump as they tried to take him down from before he was even inaugurated. Everything was a bombshell that would finish him. The media encourage violation of the law. - The liberal media are pushing for a quiet coup to get President Trump removed from office. Right after President Trump made a few admittedly goofy comments in his	... aw, including via incorporation into other measures, in 2017. Keep in mind that it takes a law to repeal a law. Very few bills ever become law. View Enacted Bills " Those bills were: S. 430: Intermediate-Range Nuclear Forces (INF) Treaty ... Compare to all Senate Sophomores (38th percentile); Senate Republicans (33rd percentile); All Senators (49th percentile). The legislator must be the primary sponsor of the bill or joint resolution th at was enacted or the primary sponsor of a bill or joint resolution for which at least about one third of its text was incorporated into another bill or joint resolution that was enacted as law, as determined by an automated analysis. While a legislator may lay claim to authoring other bills that become law, these cases are difficult for us to track quantitatively. We also exclude bills where the sponsor's original intent is not in the final bill. Most bills and resolutions languish in committee without any action. Cotton introduced 1 bill in 2017 that got past committee and to the floor for co	... d to address the immediate refugee and humanitarian issues on our border with compassion and generosity, not with the mean-spirited, "punish the victim" approach that has characterized recent efforts. A "Neighbor to Neighbor" program that effected ratification reform with helping to end the need for Central Americans to flee their home countries would ultimately pay for itself in increased economic activity and tax revenues, as well as reduced costs of processing and imprisoning refugees and families. It would surely be far less expensive than our decades-long investment of billions of dollars and thousands of human casualties - military and civilian - in the Middle East, with a potential outcome far more tangibly beneficial to America's national interests. President Trump Donald John TrumpDONN's Cameroon clashes with Trump's immigration head over president's tweet LA Times editoria l board labels Trump "Bigot-in-Chief" Trump complains of "fake polls" after surveys show him trailing multiple Democratic candidates MORE's treatment

... ce minister. of contention to be pushed into a nother position. is this a good thing? It clears u ncertainty for the... could mean that he will ask the president to take simultaneous steps to reduce tensions. the new york city district attorney's office says it is opening a criminal investigation into accusations of as a glove use my new york attorney general eric schneiderman. four women have accused the wall street watchdog of violence in the article. he says he strongly contest the claims at what will resign at the end of business today. republican leaders have sounded the alarm over today's west virginia senate primary. they are worried about a search by the former coexecutive, don blankenship. he launched a racially tinged attack on the wife of mitch mcconnell. president trump tweeted that blankenship cannot win the election against democratic senator joe manchin. global news 24 hours a day, powered by journalists and analysts in 120 countries. vomnie: thank you. coming up, the u.s. dollar rally continues before president trump's ir	... ing to The Star Online. The president has been spouting erroneous statements on everything fro m rally crowd sizes to pre-existing health conditions as strategists predict a potential blue wave at the polls this November. Generally, Democrats are expected to flip 23 seats to regain control of the House, while Republicans are predicted to maintain a majority in the Senate. This week alone, Trump falsely told The Wall Street Journal that his administration's unpopular trade tariffs on steel and aluminum don't actually exist while also taking the lead in crafting the unsubstantiated claim that a migrant caravan heading to the U.S. is full of "unknown Middle Easterners" and that Democrats are to blame. He's also professed that Republicans will pass a new tax cut before the midterms even though Congress has already adjourned until after Election Day. Here are some of the biggest lies t hat Trump is spreading ahead of the midterms: In a series of tweets on Monday morning, Trump declared that "criminals and unknown Middle Easterners a	... tack, fueled by allegiance to ISIL; make no mistake - this was first and foremost a hate crime. Mateen's hatred of gays was well known, even to his father. "He had hatred deep inside him," said the elder Mateen. For Donald Trump, Sunday's mass shooting in Florida was a moment to redouble his call for tougher action against terrorism and to take credit for "being right" about the threat. For Hillary Clinton, it was a time to reiterate her call for keeping "weapons of war" off America's streets. And then later Clinton proclaimed, "For now, we can say for certain that we need to redouble our efforts to defend our country from threats at home and abroad." It seems like this disaster was an opportunity to reinforce political ideologies. But in both cases - it was "us versus them" whoever th em may be. Of the statements from Montana's congressional delegation, none mentioned the shootings happened at a gay bar or that it was a hate crime. All three mentioned terrorism however. I don't wish to discuss Trump's misdirected xenophobic blan	... far as the American ruling elite are concerned . The trouble is, however, that despite the massive campaign to discredit Trump his poll support remains stubbornly close to Clinton's. The latter has been tainted with too many scandals involving allegations of sleazy dealings with Wall Street, so-called pay-for-play favors while she was former Secretary of State, and her penchant for inciting overseas wars for regime change using jihadist terrorist foot-soldiers. As one headline from McClint ch News only days ago put it: "Majority of voters think Clinton acted illegally, new poll finds". Trump is right: The US presidential election is "rigged". Despite handwringing condemnations by pundits, it seems obvious that the system is heavily stacked against any candidate who does not conform with the interests of the establishment. The massive media-orchestrated campaign against Trump is testimony to that. But such is popular disgust wit h Clinton, her sleaze-ball husband Bill and the Washington establishment that her victory is far fro

... o look at and remember all the commandments of the Lord, to do them, not to follow[er] after your own heart and your own eyes, which you are inclined to where after. 40 So you shall remember and do all my commandments, and be holy to your God. 41 I am the Lord your God, who brought you out of the land of Egypt to be your God: I am the Lord your God. d. * Korah's Rebellion # 16 Now Korah the son of Izhar, son of Kohath, son of Levi, and Dathan and Abiram the sons of Eliab, and On the son of Peleth sons of Reuben, took them. 2 And they rose up before Moses, with a number of the people of Israel, 250 chiefs of the congregation, chosen from the assembly, well-known men. 3 They assembled themselves together against Moses and against Aaron and said to them, "You have gone too far! For in all the congregation are holy, every one of them, and the Lord is among them. Why then do you exalt yourselves above the assembly of the Lord?" 4 When Moses heard it, he fell on his face, 5 and he said to Korah and all his company, "In the morning the Lord will	... ure before God; but he had indeed said, Thou knowest that I am not wicked, my righteousness I hold fast, and on like, on which Elihu might ground this charge. It was true that Job was a perfect an an upright man and not such a one as his friends had represented him; but he ought not to have insisted so much upon it, as if God had therefore done him wrong in afflicting him. Yet, it should seem, Elihu did not deal fairly in charging Job with saying that he was clean and innocent from all transgression, when he only pleaded that he was upright and innocent from the great transgression. But those that speak passionately and unwarily must thank themselves if they be misunderstood; they should have taken more care. 2. He had represented God as severe in marking what he did amiss and taking all advantages against him (v. 18, 11), as if he sought opportunity to pick quarrels with him. He findeth occasions against me, which supposes seeking the m. To this purport Job had spoken, ch. 14:16, 17, Dost thou not watch over my sin? He counteth me fa	... from the outside come the attacks to the Pope and the Church, but the sufferings of the Church come right from the inside of the Church, by the sins committed inside the Church itself. "We knew this is already, but today we see this in the most horrifying way: that the greatest persecution against the Church doesn't come from its enemies outside, but from the sins within. And that the Church has therefore a great need to re-learn penance, to accept purification, to learn forgiveness but also the necessity for justice. Forgiveness doesn't substitute for justice. "we must always remember that the powers of good are present and that in the end Our Lord is stronger than the devil and that Our Lady is our guarantee." - Fatima Crusader, Issue #9 5, p. 3-4 http://archive.fatima.org/crusader/cr95/cr95g3.pdf # In 2011 Fr. Gabriel Amorth was interviewed by José María Zavala. During the interview, Fr. Amorth relates that he does not believe the consecration of the world by Pope John Paul II in 1984 was sufficient to satisfy the requirements of t	... our Shalom, the wholeness of the peace that I offer, in the place which has just destroyed your land, your temple, your monarchy (that divinely sanctioned form of government). Yes, you have lost a lot that you hold sacred, everything that has been central to your identity as a people." (Even their language changed during the exile; the only books in the Old Testament which are not originally in Hebrew, were written during this period.) Furthermore, a series of prophets - Isaiah, Jeremiah, Micah, Ezekiel, and others - make very clear that the reason for these losses is due to their misplaced worship of idols, their misuse of the land through its unfair distribution, their oppression of the needy and mistreatment of the alien. So the people of Israel were stripped of all their prior sense of position and status, all the external trappings of their identity and security. Jeremiah even tells them in Ch. 42 that any attempt to hold onto their land, or even flee to Egypt, would be an act of disobedience to God. As a nation, they were called

... at the prophets had said of Himself as well as to His own statements. Cf. Bk. III. vii. 49. or how shall He come to an end, being Himself the End of all things, so that in that End we have an abiding place without end? The Divine Generation is not an event occurring in the course of time, and within its limits, and therefore before it time is not, and in it time has no place. # 109. Again, their aimless and futile question finds no loophole for entry, even when directed upon the creation itself #282428 On the analogy of which, indeed, Arianus endeavored to conceive of the Nature and Activities of God, say, indeed, temporal existences appear, in certain cases, to admit of no division of time. For instance, light generates radiance, but we can neither conceive that the radiance begins to exist after the light, nor that the light is in existence before the radiance, for where there is a light, #292429 Or "a shining body" - Lumen not just as in other places of this passage. St. Ambrose probably was unaware that "radiance" or "effulgence"	... of the Latin tradition" was a matter of emotion, of sentimentality and had no relationship whatsoever to the integrity of the Holy Faith. Ratzinger/Benedict XVI said the following in Summorum Pontificum and in his accompanying Explanatory Letter # In some regions, however, not a few of the faithful continued to be attached with such love and affection to the earlier liturgical forms which had deeply shaped their culture and spirit, that in 1984 Pope John Paul II, concerned for their pastoral care, through the special Indult Quattuor Abhinc Annos issued by the Congregation for Divine Worship, granted the faculty of using the Roman Missal published in 1962 by Blessed John XXIII. Again in 1988, John Paul II, with the Motu Proprio Ecclesia Dei, exhorted bishops to make broad and generous use of this faculty on behalf of all the faithful who sought it. (Joseph Alois Ratzinger/Benedict XVI Summorum Pontificum, July 7, 2007) # It is true that there have been exaggerations and at times social aspects unduly linked to the attitude of the	... astery of the Great Reversal" and "the Sign of the Sovereign." The Bab soon after began to chat, in the presence of His host and his companions, the homily with which He had prefaced His commentary on the Surh. Those words of power confounded His hearers with wonder. They seemed as if bewitched by the magic of His voice. Instinctively they started to their feet and, together with the Imam-Jum'ah, reverently kissed the hem of His garment. Mulla Muhammad-Taqi-i-Harati, an eminent mujtahid, broke out into a sudden expression of exultation and no praise. "Peerless and unique," he exclaimed, "these are the words which have streamed from this pen, to be able to reveal, within so short a time and in so legible a writing, so great a number of verses as to equal a fourth, nay a third, of the Qur'an, is in itself an achievement such as no mortal, without the intervention of God, could hope to perform. Neither the clapping of the moon nor the quickening of the pebbles of the sea can compare with so mighty an act." # [1 Qur'an, 103.] # As the Bab	... ary for psychokinetic life. # The way of 'initiation' became hidden until the stage of 'revelation'. # The Hemitheandric Epoch # The Guides did not withdraw responsibility but increased it. They presented to men the picture of men like themselves in appearance but nevertheless superhuman, godlike # They were not gods, or divine, but were destined to achieve individuality. We give them the name Hemitheandros: half-god, half-man. In Egypt, the Hemitheandros was almost identified with the Sun-God Re. # In the regions influenced by the Aryans, he was the Hero who associates with higher powers. In the Great Mother tradition, he was the son of the Great Mother. # The Hemitheandros were believed to have discovered the secrets of immortality, and could enable others to enjoy it. # Generally, he was not a priest; although sacramental in character. The Nile Flood depended on his actions. He took over the fertility cult that belonged to an earlier epoch and transformed it into an act of service or kinship that assured the return of the seasons.

I do not think they mean it to be rude or irreverent, I think they really are clueless. # I forgot to post part 2 of the column, which is also excellent: http://www.anchornews.org/columns/putting_into_deep_melloctober_15_2019.php # stpeticr says: # Just a mild tangent... I find it instructive that the writer refers instinctively to "the communion line". # Evidently he hasn't been adequately instructed that it's not a "line" but a festal procession. # The kid might be forgiven for mistaking the Communion procession for a bus queue where playing with her Nintendo is a perfectly acceptable way to pass the time. # Dave N. says: # I'm with those who just sort of hold their breath at occasions where lots of non-Catholics show up: weddings, baptisms, Christmas, Easter... and confimations. # Reminds me of one confirmation mass I went to where there was	... succumbs to the advice of useful idiots like Biologos and those who've signed the Clergy Letter Project, America will follow Europe into apostasy. # Yes, I am familiar with SC, which is what YECers do all the time, especially with the situation in Europe. Or with equating rock and roll and a wild youth with "Darwinism." A reverse of that would be that as YECism increased, the Church would increase, and yet, we see that in the U.S., as YECers increase, the Church is actually decreasing, but that would mean that you guys would have to be wrong. Oh, and you guys would have to accept actual facts... such as that young people are leaving because YECers is simply, stupid, and given that God has given us human wisdom and reason, to ask us to deny God's gifts is in effect creating a paradox that many cannot ever come and remain in reality. # Also, SC is generally what your 'science' is built upon, so not to mention your take on theology as relating to what you think Christ and others said/were saying. # BY the way, along with SC, you guys are g	... oah did upon the Egyptians; and the people feared Jehovah, and believed Jehovah, and his servant Moses (Exodus 14:31). # And Israel saw the great strong hand of God, what He did to the Egyptians. They feared God and believed in His memra and in His servant Moses. # Jonathan ben Uzziel also says in regard to Exodus 14:31 that Israel believed in the memra of God, although only the words "feared Jehovah" and "believed Jehovah" appear in the Scripture itself. He translates this portion almost the same as Onkeles does, word for word, including "the memra of God." # And it came to pass, when the ark set forward, that Moses said, Rise up, Jehovah (Yehovah), and let thine enemies be scattered; and do not let them that hate thee flee before thee. And when it rested, he said, Return, O Jehovah (Yehovah), unto the many thousands of Israel (Numbers 10:3-5, 36). # When they took the ark to move they waited till Moses prayed, and he asked for mercy from God and said, Reveal through thy memra the strength of God's anger, that the enemies of thy people m	... y were building still presumed white supremacy and sought to build social relations with colonized peoples based on racism and economic exploitation. There was a self-justifying narrative that was held at least by liberal supporters of the British Empire that Christianity and "civilization" were the gifts the British were bringing to benighted peoples and lands throughout their empire, and that while there were major inequities and other injustices involved in their colonial projects, the long term goal was multi-racial enlightened Christian and capitalist societies under benign British hegemony. At least, that was their moral justification narrative. To the Afrikaners, that vision was morally repugnant, rampant with ungodly race-mixing and crass wealth-seeking. # Flag of the Union of South Africa from 1928 - 1994 # Ultimately, a white-dominated parliamentary semi-democracy emerged in 1910 - the Union of South Africa - under British rule. By the mid-20th century, the National Party, which had become the political voice of the Afrika

Finally, NELF explained that amendment of their complaint, in order to seek refuge for their claims under an issue of law left undecided in Donovan I, should not be allowed because it would be futile. # In its June 10, 2014 decision, the Court upheld summary judgment, chastising the plaintiffs for trying to alter their appeal to encompass the issue left undecided in Donovan I. # Glovsky v. Roche Bros. Supermarkets, Inc. # Defending the Right of Private Property Owners to Prohibit Political Activity on their Premises # In this case, the plaintiff, Steven M. Glovsky, an attorney, while seeking to run for election to the Massachusetts Governor's Council in 2012, sought permission to solicit nominating signatures at a Roche Brother's supermarket situated on a private 5-acre lot in Westwood, Massachusetts. The store, which has a policy against such solicitations, denied him permission. Glovsky later brought this pro se suit, alleging that Roche Brothers had violated his constitutional rights. H	... lled the constitutionality of the preference given to financial creditors over operational creditors, citing the fundamental right to equality under Article 14 of the Constitution. The Supreme Court dismissed the Article 14 argument, stating it had there was a difference in the relative importance of financial creditors because repayment of debt allows the capital to be re-injected into the economy and is vital for economic growth. # The preference given to financial creditors is troubling, given the judicial system's dismal record on enforcing contracts. Operational creditors, while not direct lenders of money to the company, provide goods on credit and these contractual arrangements can often be more useful to a business than bank debt. But enforcing these unsecured contracts in Indian courts is a long and hard process which often leaves operational creditors without remedy. It is time for the judicial system to step up and expedite the enforcement of contracts. Similar to the time-bound insolvency resolution in the IBC, all con

... take Sign in with twitter Sign in with google # They did not appear in court; witnesses for the prosecution of the Valta Hizb ut-Tahrir group all allegedly fear for their lives # April 26, 2019 14:54 # 260 # On Friday, April 26, the interrogation of witnesses for the prosecution in the Valta group of the "Hizb ut-Tahrir case" once again broke down at the North Caucasian District Military Court in Rostov-on-Don. # During the meeting it became clear that "the prosecution witnesses did not appear in court. The reasons for the failure to appear before the court are unknown. Secret prosecution witnesses - Mekhmetov, Starovoy and Ibragimov, whose interrogation along with other witnesses was scheduled for today's meeting, also did not appear in court," the Crimean Solidarity activists report. # According to the prosecutor, all the "prosecution witnesses fear for their lives, since the defendant allegedly could be a threat to them." # For example, the witness Ibragimov is an employee of the Center for Countering Extremism. Previously, he als	... n issue an order regarding whether plaintiffs may proceed-that is, whether the sealed document establishes that plaintiffs were subject to electronic surveillance not authorized by FISA" (the Foreign Intelligence Surveillance Act-see 1978). (Krawets 1/5/2009) # January 10, 2009: Newsweek Readers Call NSA Whistleblower a "Hero" who "Protected" the "People" against Bush and Cheney # Newsweek publishes a range of responses to its article about Justice Department whistleblower Thomas Tamm (see December 22, 2008), who alerted the New York Times to the Bush administration's illegal domestic wiretapping program "Stellar Wind" (see Spring 2004 and December 15, 2005). Most are extremely supportive of Tamm; Newsweek writes, "Nearly all labeled Tamm a hero." One reader wonders why "few in the Justice Department were as troubled as Tamm about the illegality of the secret domestic wiretapping program or had the courage of his convictions." Another notes, "Whistle-blowers like him are heroes because they are protecting "We the people." # Milwaukee	... filing (defined as using a process of differentiation, obfuscation, and subordination to target a people in Japan; it does not have to rely on phenotypic "looks") is that for "national security reasons" the next step is to target and snoop on all foreign residents in Japan. Because they might be terrorists. The National Police Agency et al. have already been justifying the targeting of NJ as terrorists (not to mention as criminals, "illegal overstayers", holders of "foreign DNA", and carriers of contagious diseases). And Japan's Supreme Court has now effectively given the green light to that too. The noose further tightens around NJ residents in Japan. # JOM: On July 23, 2016 the Japan Center for Michigan Universities (JOMU) in Hikone welcomed Junko Hayashi, Japan's first female Muslim attorney, to speak about Islam and the issues faced by Muslims in Japan. In a recent court battle, Mrs. Hayashi represented Japanese Muslims that were being observed by the Japanese government for no reason other than the fact that they were Muslims. T	... y in a lawsuit may make a motion to the court requesting that the adverse party in the proceeding undergoes a physical or mental medical examination. On the court may grant this request where the evidence obtained from such an examination would be relevant to an issue in the trial. Due to the nature of sexual assault cases, such examinations would be relevant the vast majority of the time. # As with any civil lawsuit, once all the evidence has been presented to the court by both parties and the trial has concluded, the judge will determine which party they will enter a judgement in favour of. If a judgement is entered for the defendant this means the court was not convinced that the allegations made by the plaintiff likely occurred. In this case the defendant will not be required to pay damages to the plaintiff for the alleged injuries they suffered. Should the court decide for the plaintiff, they will award either all of part of the damages requested by the plaintiff and order the defendant pay these damages. The court will also award

It mounts to the printhead cartridge casing 184 via screw holes 268 and 270. The lid molding also has side mounting holes 276. As discussed above, the screw holes 270 and 276 allow a certain amount of longitudinal travel between the assembly 190 and the rest of the cartridge 100 to tolerate some relative movement from CTE mismatch. Link from the pressure regulators is fed to the lid inlet 272 via the resilient connectors 294. At the base of each lid inlet 272 is a channel inlet 274 in fluid communication with respective channels 280 in the channel molding 266 (best shown in the section view of FIG. 2). Each channel 280 runs substantially the full length of the channel molding 266 in order to feed the printhead 600 with one of the five ink colors (CMY & IR). At the bottom of each channel 280 is a series of ink apertures 284 that feed ink through to the ink conduits 278 from</p>	<p>Writing Style = 0.16</p> <p>... 6:00 PM Temple Theatre Park City # Saturday, February 2nd 6:30 PM Redstone Cinema 1 Park City # Alright, so this one does have a little bit of hype surrounding it. I feel like I have been hearing about the Zac Efron/Fred Bundy movie for at least a year. While there hasn't been much chatter about the film overall, I do know that a lot of people are excited to see Efron take on this role because it is unlike anything he has ever done so far in his career. I feel like that if Extremely Wicked, Shockingly Evil and Vile ends up being really great that this film could really boost Zac Efron's career. Outside of his performance in The Greatest Showman back in 2017, I feel like Efron hasn't really done a lot to wow the audience. He seemed to be stuck taking on roles that were comedic versions of himself and after a while, it just stopped being entertaining. This dramatic and dark turn could be just what the doctor ordered. # Extremely Wicked, Shockingly Evil and Vile is part of the Premieres section and will premiere at the Eccles theatre on</p>	<p>Writing Style = 1.08</p> <p>... ll of it appropriate or even apt. Sanjay Suri's love making scenes with Tannishtha Chatterjee show him copulating violently, with his pyjama on. # Chauranga makes an engrossing watch, although one wishes there was more to its story. # The film has been shot well and manages to highlight crucial issues. Even though it is director Bikas Ranjan Mishra's debut film, he has done an impressive job. While the film does make a great attempt, the story leaves a lot to be expected from and drags on in parts. Chauranga attempts to expose the inequity and injustice in society and will stir-up its audience. # Chauranga is certainly not your regular popcorn flick, with several scenes that will make the popcorn in your stomach toss and turn. But if you are an admirer of realistic cinema, this can be your movie of the weekend. # There's no denying that the film is unflinching, unafraid to show Dalit village life as the series of compromises it often is. Had the performances been stronger, the accents more convincing, and the ideas more novel, Chauran</p>	<p>Writing Style = 1.87</p> <p>... le Lies, a rebooted Twin Peaks, and the upcoming Star Wars film The Last Jedi - Dern has indeed forged one of the more unusual careers of her generation. It's hard to think of another actress who moves so fluidly between the indie circuit and the blockbuster, the voice of Zen-like sanity and the mascara-streaked hot mess, and, of course, the waking world and the Lynchian dreamscape. In that 31-year-old Times profile, it is quite clear that the author had not yet seen Dern's next film, because he refers to it as simply, "Blue Velvet," a suspense film scheduled to be released in September." (Anyone who'd gotten a glimpse of Lumberton would have ... a few more colorful words to say about the experience.) # Dern is now the lead actress that David Lynch has worked with most frequently; this month's Twin Peaks reboot is their fourth collaboration. Their mutual admiration and understanding run deep. "I love using my body as an actor and I love the physicality of characters but it's David who specifically has made me leap into a void of tur</p>

A monochromatic palette provides a little hope for the Czechoslovak resistance, and reminds cinegoers of the gruesome outcome they will ultimately face. # Image courtesy of variety.com # Despite the slow-burning storyline, Anthropoid's action scenes are fantastic. The final scene in the Orthodox Cathedral, which lasted six hours in reality, is perhaps the real pull for cinema-goers. The numerous deaths suffered by the Nazis only point to the inevitability of death hanging over the resistance fighters. The audience are left with conflicting emotions: sad with the knowledge of their certain failure, yet proud of their sacrifice and bravery. When Uncle Hajsky says to Kubis 'You're the bravest man I've ever met', an utmost since rity is conveyed. # Anthropoid is not a film that aims to sanitise history. Though harrowing to watch, director Sean Ellis did not shy away from illustrating inhumanity, particularly of the Gestapo's interrogation methods. Despite claims from some vi</p>
<p>Educational Value = -1.61</p> <p>... in Threapleton (in 2001) # Redroofs Theatre School # Grammy Award for Best Spoken Word Album for Children # Relationship short Statistics of Kate Winslet # What is Kate Winslet marital status? (married, single, in relation or divorce): # How many children does Kate Winslet have? (name): # Is Kate Winslet having any relationship affair?: # Yes3 affair # Is Kate Winslet lesbian? # 3 affair # Marriage # Children # Kate Elizabeth Winslet is an actress, singer. She is known best for her acting in the movie Titanic. She has won a Grammy Award, a nomination Academy Award, three Golden Globe Awards and an Emmy Award. For her services to acting, she was awarded the CBE by Queen Elizabeth II, on November 2, 2012. She received 1995 Film Actress of the Year award presented by Variety Club of Great Britain. # Kate Winslet Personal Life # Kate Winslet is a married woman. Firstly, she tied the knot to Jim Threapleton in 1998 in a private ceremony. The couple shares a child, Mia Honey Threapleton born on 12th October 2000. But the relationship did not la</p>	<p>Educational Value = -0.82</p> <p>... was gratified. # As I drove away, the theme of Suspiria played on my car's CD player, a perfect sound cue to end Movies At Dog Farm III. I spent most of the hour long drive home chewing on ways to set up that fundraiser we had discussed, and I began to think of all the other cinematic obscurities I still wanted to share. It occurred to me that my usual mode of movie consumption - home alone on the couch watching the movies unfold on a regular old television - is lacking. There's simply no substitute for enjoying a movie on the big screen in the company of an appreciative audience. # I don't really fancy myself a critic, and I tend only to write here about the movies I love. I spend a little too much time watching these flicks, and I rely on the opportunity to share the best of them with friends both old and new. Nothing can convey the satisfaction of hearing a group of otherwise normal individuals enthusiastically sharing their best dramatic renditions of movie quotes like, "You will drink the black sperm of my vengeance!" Presenting</p>	<p>Educational Value = -0.00</p> <p>... asks and others within the score are much more likely to include integrated electronic sound design elements. This combination of percussion and electronics is often described as a techno sound. # Gone are the rough edges of the 1960s sleazy brass sound, which has evolved into a very clean "wah" sound which cuts through the action tracks in a very Bond way # Tomorrow Never Dies is the 18th main Bond film and David Arnold's first, and therefore his first attempt to establish what was to become the modern Bond sound. The film has a good song written by Sheryl Crow and Mitchell Froom, and the score hits the ground running with all the elements listed above fully in place. Particularly noticeable is the new style of action track. Although David Arnold's action tracks can seem "generic" at times (like those of many contemporary composers), he succeeds in "Bondifying" them with brief flashes of jazzy brass or hints of the Bond theme. So in this way Arnold keeps a balance between the sounds typical of today and the long tradition of Bond fil</p>	<p>Educational Value = 0.92</p> <p>... you don't want to talk about them. So by creating this claustrophobic wall feeling, I could make the obstacle surer and powerful. Rather than talking about the occupation, I wanted you to see and feel it. # Rail: Do you consider Omar a political film? # Abu-Assad: For sure it's a political movie. # Why? Because it's a political voice and I have a political point of view. We are telling the story from the Palestinian side. It's condemning the occupation. But you don't need to make a movie in order to condemn the occupation. The movie is not about that. Every human being should condemn every occupation, not just the Palestinian occupation. The film is about love, trust, friendship. The place of political discussion is somewhere else-you can do it on a sofa with your friends. In a movie it's boring. # Rail: There has been a trend in recent films about the Arab-Israeli conflict to cover several characters on both sides of the conflict. Omar is the opposite of this. It's named after its protagonist, whom it follows very closely for the en</p>
<p>Required Expertise = -1.52</p> <p>... who plays a young doctor, and Danny Glover, who has a supporting role. However, direction was pretty solid and there are some good moments. Grade: C+ # The 10th Victim (1965) This was really an interesting watch. A film I had heard pretty much nothing about, but that ended up being pretty cool, despite many flaws. Set in a near future where random people are pitted one against the other in a game of hunter/victim (kind of like the Purge, but more contained), the film follows a "hunter" (Ursula Andress) and a "victim" (Marcello Mastroianni), as they play a game of cat-and-mouse. There are so many cool elements that we've seen in other films (a bit of Running Man, a bit of Hunger Games, even some John Wick). Mastroianni is cool-as-ice in his role, and Andress plays the deadly female role pretty well. The film kinda hits a patch in the middle as the inevitable romance between them unfolds, but I thought the last act was pretty solid. I would've finished it 5-10 minutes earlier, but it was good anyway. Grade: B+ # The Addams Family (2019)</p>	<p>Required Expertise = -0.80</p> <p>... method Actor asked the S to remove her cap, so that he can stare at her, to DRINK HER IMAGE (my own words) and understand WHY his character would love her so much. This is pretty much what happened. # (S removes her cap) # Method Actor: Yes, I can see your face better now. I can understand why my character the hero loves your character the heroine, you being so obviously HOT and all. # (S smiles awkwardly) # Method Actor: So, what kind of relationship do we have? # (S stares, unsure how to answer the question, I was sitting next to Method Actor, so I answered immediately) # Me: Just a brief and fleeting one: the heroine never loved the hero, he was just a fling, they went out for two dates, he's too pathetic, so she ignored him since then. But the hero's an emo private eye, so he never ceased to love her, and was unable to let her go. # Method Actor: (Looks at me) And you are... who? # Method Actor: # Me: The producer. # Method Actor: Right. So, it's just a brief relationship. Did they have SEX? # (S stares) # Method Actor: Oh, right. Wa</p>	<p>Required Expertise = -0.12</p> <p>... ause it was literally the first song that I had on my playlist when I was writing the script. I would just listen to it and I just felt like because the movie is self-aware and ironic, and it kind of understands what it is-I really love that song because of its politics and importance." # Snyder may acknowledge the political context (more off-screen than on), but I still don't think the sequence works in that regard. Vanderhorst is a mercenary of war and who has spent the whole film killing zombies. Now a nuclear bomb saved him from being trapped in a city overrun by zombies, while also making him a rich man. His eagerness to reach Mexico City and enjoy his newfound wealth does not suggest some enlightened epiphany by either the character or the film about the danger of militaristic annihilation. Rather it accompanies just another glib "twist" to a horror movie ending where at least one character thinks he's safe and then-surprise-he's not. You know, like Snyder's Dawn of the Dead and pretty much every zombie movie going back to Romer</p>	<p>Required Expertise = 0.70</p> <p>... f-governing entity. The nationalist Kuomintang (KMT), who fled to the island after their defeat by the communists in 1949, imposed martial law until 1987, ruling with an iron fist for nearly 40 years. Hou's film A City of Sadness (1989) was the first to tackle, albeit obliquely, Taiwan's own Tiananmen, the 28 February 1947 massacre, in which the KMT violently suppressed anti-government protests, kicking-starting a campaign of White Terror that killed up to 30,000 civilians that year alone. The massacre, commemorated every year on Peace Memorial Day, lends impetus to Taiwan's independence movement. # For Hou, it is the experiences of ordinary people swept up in history's grand narrative that give his stories their focus. The island's ongoing crisis of existence pervades his films in recurring motifs: railways, empty platforms, people waiting for someone to arrive - or something to happen. # On 16 January, Taiwan holds a presidential election in which voters look likely to elect the leader of the opposition Democratic Progressive Party, wh</p>

Part I (1) covered general properties of ammonia the current	... 6. pp. 27823-27831. « @article{86c0c2074c6426 3a74746e3fc184829, « title = "An induced proximity model for NF-κB activation in the Nod1/RICK and RI P signaling pathways", « abstract = "Nod1 is an Ap af-1-like molecule composed of a caspase-recruite n domain (CARD), nucleotide-binding domain, and l ucine-rich repeats that associates with the CARD- containing kinase RICK and activates nuclear facto r κB (NF-κB). We show that self-association of No d1 mediates proximity of RICK and the interaction of RICK with the V subunit of the IκB kinase (IKK γ). Similarly, the RICK-related kinase RIP associ ated via its intermediate region with IKKγ. A mut ant form of IKKγ deficient in binding to IKKα and IKKβ inhibited NF-κB activation induced by RICK o r RIP. Enhanced oligomerization of RICK or RIP as well as of IKKγ, IKKα, or IKKβ was sufficient for induction of NF-κB activation. Thus, the proximit y of RICK, RIP, and IKK complexes may play an im portant role for NF-κB activation during Nod1 oligo merization or trimerization of the tumor necrosis	... specific protein-binding interactions leading to low backgrounds in immunoprecipitation. Still, RIPA buffer is very compatible with a myriad of ap plications, including reporter assays, protein ass ays, immunoassays and protein purification. When p rotein quantitation is desired, RIPA buffer is the lysis buffer of choice due to its compatibility with the BCA Protein Assay, although it can denature kinases [5], and can disrupt protein-protein inter actions in immunoprecipitation/pull down assays [6]. « Urea buffer is another versatile and efficient cell and tissue lysing buffer whose typical compo sition include: TRIS base 40 mM, Urea 7 M, Thio urea 2 M, NP-40 or CHAPS 4%, DTT 10 mM. Urea is used at concentrations ranging from 5 to 9 M, often wit h thiourea at concentrations up to 2 M. The additi ve thiourea can dramatically enhance the solubilit y of a wide range of proteins - nuclear, membrane, cytosolic, and including even tubulin that is high ly prone to aggregation, in urea buffer [1, 3, 4]. As in RIPA buffer, different detergents and buffer	... lled micro-environments and information theo ry to quantitatively characterize communication motif s. « Project acronym DISENTANGLE « Project Un tangling the Bacterial Chromosome: Condensin's Role in Sister Chromosome Separation and its Mechanisms « Researcher (PI) Stephan Gruber « Summary A prereq uisite for chromosome segregation in all living org anisms is the topological unlinking of sister DNA molecules, called DNA decatenation. Decatenation i s performed by DNA topoisomerases that work by tra nsiently breaking strand(s) in one DNA double heli x and passing another double helix through the tem porarily created gate. How DNA topoisomerases man age to recognize linkages between sister DNA molecu les and how they promote decatenation of sister ch romatids (but not catenation) is still largely unk nown. The driving hypothesis of this project is th at condensin promotes chromosome decatenation by guiding the unlinking activity of DNA topoisomerase s. Condensin is a member of the family of SMC (Str uctural Maintenance of Chromosomes) protein comple

The valve asymmetries were relat ed to the ones observed in drnl-2 "nature" gynocia s and fruits (in total, in between 40 and 20% of t hem presenting defects, respectively, Figures 1E.F). As observed in those gynocia and fruits, the d efects observed in drnl-2 developing gynocia, do not appear to be 100% penetrant, and also vary in severity from pistil to pistil. Examples of altere d growth were present from early gynocium develop mental stages. In Figure 2D, a doughnut-shaped, po ssibly stage 8 young drnl-2 gynocium can be obser ved, presenting a roundish central opening. In con trast, stage 8 (according to Smyth et al., 1990) W I gynocia normally have an oval shape, present a bowtie shaped central opening, and the valve regio n can be clearly identified (Figure 2C). Examples of valve asymmetrical growth in stage 9 and stage 10 drnl-2 are presented in Figures 2E, F. The image in Figure 2F possibly corresponds to the "one valve	... od prognosis. Although it is more aggressive t han papillary cancer, it does not spread to the ly mph nodes but may metastasize to the lungs and bon e. « Medullary cancer (193) develops from the t hyroid's C cells and is more aggressive, harder to treat, and may spread to the lymph nodes or other organs. Blood tests typically show an elevated car cinoembryonic antigen level. « There are three typ es of medullary cancer: sporadic, familial, and mu ltiple endocrine neoplasia, type II (MEN II), an i nherited form with possible tumors in other endocr ine glands, such as adrenal or parathyroid. There are two subtypes, MEN Type IIA (258.02) and MEN Ty pe IIB (258.03). According to coding directives, u se additional codes to identify malignancies (such as thyroid cancer, 193) and other conditions asso ciated with MEN Type II, along with a code from sub category 258.0 (AHA Coding Clinic for ICD-9-CM, 20 07, fourth quarter, pages 70-72). « - Anaplastic c ancer (193) is very aggressive with a poor prognos is. It can spread quickly to the lymph nodes and t	... nd probably result in gangrenous mastitis. So these leukocytes are beneficial by destroying bact eria; however, leukocytes are also detrimental bec ause high numbers of them are associated with de creased milk production and poor milk quality. « To understand this relationship, we need to review th e anatomy of the udder and how milk is produced. J ust as nutrients are transported from the bloodst ream into mammary tissues to be converted into milk , leukocytes are also transported into milk as a surveillance mechanism to look for bacteria. In the typical uninfected mammary quarter, the leukocyte (or somatic cell) numbers remain less than 200,000 /ul. Now, keep in mind that each mammary quarter i s composed of millions of microscopic alveoli. Eac h alveolus, which is drawn out of proportion in th e figure below, is a three-dimensional sphere com posed of a layer of milk-producing cells that sur rounds a lumen or collecting space, which drains mi lk to the gland and teat cisterns before exiting t hrough the teat duct during milking. « In order fo

(20,21) The well-known historian Abu al-Faraj al-Isfahani has written in this regard: Mu'awiyah wish ed to take the pledge of allegiance from the people for his son Yazid. In spite of this, Imam al-Hasan stood in his way and he would not allow this to take place. Due to this reason, he had the Imam poisoned. © In conclusion, it must be said that when Imam al-Hasan ('a) was martyred and this news reached Mu'awiyah, he expressed great happiness and he and his officials went prostrated in their happiness. News of the martyrdom of the Imam ('a) also reached Ibn 'Abbas, who happened to also be in Syria. Ibn 'Abbas went to see Mu'awiyah and when he arrived at the court, Mu'awiyah said to him: "Oh Ibn 'Abbas, I have heard that Hasan ibn 'Ali has passed away". Ibn 'Abbas said to him(22): "We belong to Allah and to Him we are ever returning". He then repeated this verse several times (in expressing his grief and sorrow). © Ibn 'Abbas then said: I heard that when news of this was given to you, you expre</p>	<p>Facts & Trivia = 1.00</p> <p>... ble 1 (Moradbak et al. 2016). © Table 1. Conditions for Producing Unbleached Bamboo ASAM Pulp © NaOH, sodium hydroxide; Na2SO3, sodium sulfite; AQ, anthraquinone; EDTA, ethylene diamine tetraacetic acid; L/W, liquor to wood ratio; Temp, temperature © Disintegrating and beating © The unbleached bamboo ASAM pulp was beaten according to TAPPI T 20 © sp-96 (1997). Briefly, 24 g of oven-dried (o.d.) unbleached bamboo ASAM pulp was weighed and soaked in 2 L of distilled water for 4 h. The pulp was then disintegrated with a British disintegrator (DSG © 2000, Reged, Brazil) for 75,000 revolutions. The pulp was then beaten for 10,000 revolutions. The freeness of unbleached bamboo ASAM pulp was determined in accordance with TAPPI T 227 © m-99 (1999). © Handsheet formation © Prior to handsheet formation, the unbleached pulps were disintegrated in a British disintegrator for 3,000 revolutions. Handsheet s were formed in a sheet machine in accordance with the TAPPI T 205-sp-95 (1995) to make sheets with a basis weight of 60 g/m2. These handsheets were</p>	<p>Facts & Trivia = 1.81</p> <p>... because the trial was allegedly conducted during times of low pest presence; therefore, on 19 June 2001, it ordered a repetition of the field trials. The GEAC field trials were to be monitored by the Indian Council of Agricultural Research (ICAR) (Gohen and Paarlberg, 2004; Jayaraman, 2000; 2001; Raghuram, 2002). On 25 March 2002, the GEAC conditionally approved the commercialization of four Monsanto hybrids: MON 51 (Dollgard 1), MECH 12, MECH 162 and MEH 184 - for a 3 year period from April 2002 - March 2005 (Qaim et al. 2006; Raghuram, 2002; Jayaraman and Bouchie, 2004; Jayaraman, 2002; S tone, 2007c; Herring, 2005). Because the perceived fear of the seeds' susceptibility to leaf curl, the Committee declined permission to commercialize these seeds in North India. Subsequently, the GEAC approved one more hybrid in 2004 and 16 more in 2006 using event MON 51 and event 15995 for MBE (Gravure et al. 2008). © Another facet of the chronology was Monsanto's shrewd business move vis-à-vis accusations of preferential treatment by the reg</p>

<p>Writing Style = -1.17</p> <p>... sed her brand, spanning new album based on her fictional alter ego, Roman. The album has evolved into a very successful album - as it has debuted on the Billboard chart. But the quality lacks. Seriously. I have never been so angry in my life. I was surprised, confused and vex when I actually listened to this album. On paper, the album sounds like it could be amazing. Nicki stated that she didn't want this album to be based around sex or violence; which is fair enough. But, I'm going to be honest. Sex and violence is what made Nicki, Roman and Martha famous in the first place. It's like taking the Yankee hat away from Jay Z- what's the point? The album almost has two sides. There is a hip-hop themed ("Roman Holiday", "Come on a cone", "I Am Your Leader", "Beez in the Trap", "HDV Lane", "Roman Reloaded" and "Champion") and a pop, all star attempt (the other 11 tracks). Oh, I forgot, there was this one track where she tried to merge her Trinidadian roots with pop, creating "Gunshot" - Yeah, having Beezie Man on a uptempo song really</p>	<p>Writing Style = -0.09</p> <p>... m Chats with Prin, and all things creatively calm for musicians, writers, and educators. # New Media Music by Prin # by Prin Dumas on November 4, 2020 November 4, 2020 # Meditation in 096 - 5 songwriting Demo # During Covid quarantine, I've had to sharpen skills at home to help me be self-sufficient in my music, songwriting, creative projects, and all that fun stuff. One skill has been a hobby in the past - production. I've usually arranged and produced my work, and then paid a professional producer to take an audio to a polished, quality level. Well, now that producer has to be me until further notice, and I've been exploring soundscapes and rough demos. I'm using GarageBand, which is a great beginner DAW and allows me to work off of my iPad easily. I wrote Meditation in 096 with a few "structure" ideas in place to help me do it. As a meditation melody, I chose the key of G major on the throat chakra. I chose tempo 96, because I wanted to include some spiritual numerology ideas about mirroring and reflection. As far as sound</p>	<p>Writing Style = 0.82</p> <p>... ple. For years to come expect bands from all over Medway to long for their music to be introduced as "The Preservation Society Presents." # Kids Unique debut single "Seymour Evil" is out now on digital download. # Vol 1 of the singles vinyl club is out now featuring Theatre Royal and Kids Unique # Volume 2 features Dartford's Dead Lovers and Margate's Pantomime Villains. Both can be bought exclusively through the website: www.thepreservationsoctetpresents.com. # A Medway Vision 4 - Blues Music adventures # You probably think you know what blues music sounds like. You've probably seen lots of bands in pubs with a blues-based sound. You know their sort of thing, tribute acts; white men with a love of the blues singing about what it's like to be a poor black man in 1930's America. You're absolutely right. It sounds good but it's not REAL blues, music of genuine pain, anguish and hardship. Happily, real blues does still exist. And not just with that Detroit genius Jack White. It's right here in Medway too. And this being Medway, it's rather</p>	<p>Writing Style = 1.64</p> <p>... er - think raucous recording sessions, armies of female 'companions', lakes of booze and iconic slots at Donington (Download in new money) - may have been a whole barrel of chaotic fun, but those times also came with personnel shuffles and management chaos. Even Wonder Days, the band's remarkable comeback album in 2015, was no walk in the park, with Matthews conquering a life-threatening illness during the recording process. # Through it all, Thunder survived - which leads us to Rip It Up, their eleventh studio album. It's a record with big boots to fill, as Wonder Days raised the bar significantly for its creators when it came to creating a follow-up. Fortunately, Rip It Up steps up to the challenge with utter confidence, bringing 11 songs that cover a wide range of sounds and emotions to the rock territory of 2017. # Rip It Up is certainly not Thunder by numbers; it was a real challenge to make, "reflects Morley, who composed the songs and produced the album during the spring and summer of 2016 at Rockfield Studios in Wales. "Eve</p>
<p>Facts & Trivia = -1.35</p> <p>... provide power and momentum as well as the signature piano, continuing the epic feel Coldplay have been striving for recently. It also stretches Rihanna vocally, both technically and emotionally - a bonus to hear considering she normally settles for lazy-sexy. The production may have a glossy sheen but it's a successful collision of two opposing music worlds. # Ultimately Princess of China is a decent pop track that should satiate the appetites of both sets of fans. Perhaps there is hope for "My Only Kyoto" after all? # NB. As below, the only 10 videos available are of shoddy quality - I'm assuming this isn't representative of the final mix) # The Adam Street Singers - Rock On @ The Last Theatre # As an extra special one-off, the lovely Vicki Hill has written a "Wizzle" review of the Adam Street Singers. Being a member of the choir, my review would of course be more than a little biased, but Vicki writes of her experience and enjoyment as an audience member. So without further ado... here goes.... # The Adam Street Singers - Rock On # A S</p>	<p>Facts & Trivia = -0.56</p> <p>... Kudu Records material of the time - which might have been an inspiration for these guys! The album was recorded on the Atlanta scene of the late 70s, with lead guitar from Gary Ruffin - and titles include "Get Up & Get Down", "Summer Love", "Randy's Mom", "Simple Song", and "Journey Through the Night". CD # Also available Journey Through the Night ... LP 14.99 # Disco Space Funk Band - Journey Through the Night ... LP # Baby Grand/Everland (Australia), 1978. New Copy (reissue)... \$14.99 # A sweet little record that's way better than you might ever guess from the title - almost more of a Jazz-Funk effort overall, with excellent work on guitar, trumpet, saxes, and keyboards! There's vocals on the album, but maybe more in a backup sort of way - and although the cuts could work on a dancefloor, they've often got the mix of jazz and groove that you'd find in some of the funkier Kudu Records material of the time - which might have been an inspiration for these guys! The album was recorded on the Atlanta scene of the late 70s, with lead guitar</p>	<p>Facts & Trivia = 0.14</p> <p>... rollout, instead opting to release the album suddenly because of her intuition; she stated that her gut feeling told her "if you make something you love, you should just put it out into the world". Would you tell me to go straight to hell? Slept next to her, but was what I did to you [55] The album does not completely avoid plush synths and programmed beats characteristic of Swift's pop music, but instead dials them down to a nearly invisible texture,[52] delivering an electro-acoustic soundscape. You heard the rumors from Inez. "Mad Woman" is a tense sequel to "The Last Great American Dynast", and is noted as a scathing version of "The Man" (2019). Confidential (1997), Pan's Labyrinth (2006), Jane Eyre (2011), Marriage Story (2019),[13] and The Last Dance (2020),[14] and read more books than she ever did, books that "dealt with times past, a world that doesn't exist anymore," such as Rebecca (1938) by Daphne du Maurier. Most times, but at this time it was true Wikis. [206]. Credits are adapted from Pitchfork[19] and the album's Liner n</p>	<p>Facts & Trivia = 1.04</p> <p>... Klatu's second album, entitled Hope, was released in '71 and did little to dispel any rumors (though, being a high-concept prog rock album released during the Noah's Flood of high-concept prog rock albums released in the mid-70's, sales had started to stagnate). By the release of Sir Army Suit, the band's third album, the rumor was effectively killed. The band (and their label) included actual photos of the band in their promotional material for the first time, which finally gave the band faces but unfortunately was also the nail in the coffin of Klatu's mainstream success. They did carry on for a few more years, however, releasing two further albums before taking off to their home planet (of Toronto) and leaving us with a mostly staple - if not somewhat puzzling - body of work. # The band broke up in the early eighties, with Dee Long going to work for EMI for a brief time (and eventually to meet Paul McCartney, once) before finally moving to producing animation and working on music in his spare time (he even has a Bandcamp!). Te</p>
<p>Educational Value = -1.97</p> <p>... One fan said, "Tell Kendrick to drop them. To which Q obliged. # Aye @kendricklamar drop them. https://t.co/8Uv9r6Lis # Another asked, "You're dropping another album right Q?" Which he sarcastically responded with, "Naw ima full time twitch streamer. Wats rap?" # Naw ima full time twitch streamer. Wats rap? https://t.co/8B8qHqR # Fed up, one user responded to this tweet with a video of him on stage and a caption that read, "com on dawd like do you miss performing." # Shortly after, Schoolboy Q tweeted back, "My last show in d states befo COVID. Yea ima put music out." # My last show in d states befo COVID [📺📺📺📺] Yea ima put music out. https://t.co/3039wCH # Q would further confirm this sentiment in a response to another frustrated Twitter user saying, "Damn, ok ima come back." <p>Writing Style = -0.96</p> <p>... of time. I think Alicia Keys will be known widely after she retires. She went to school to specifically study music, and didn't just pop out of the internet. I'm not a big fan of either (call me crazy, but I like listening to instrumental music generally), but I have listened to Elvis in the past on my own. That being said, I prefer Elvis. Today's music stars are a different question. I'm not sure that many of them will be remembered, due to the fact of so many people being negative and positive about them. For example, the Beatles and Elvis don't have many haters (at least, that I can think of on the top of my head) but many stars today, like Bieber or Miley, are disliked and made fun of. They may be remembered negatively, or be barely remembered at all. I can picture someone talking to their grandchildren (which would be one of us kids when older) trying to tell our children which music artists we loved/hated but not being able to remember their name. I think many will be lost in the flow of new music. I have never liked E</p>	<p>Writing Style = 0.20</p> <p>... ion arrangements vary in complexity—some employ groove-based vamps fixed to a key, or even a single chord. Others can feature odd or shifting time signatures with elaborate chord progressions, typically, these arrangements, whether simple or complex, will feature extended improvised sections that can vary in length. As with jazz, fusion often employs brass and woodwind instruments such as trumpet and saxophone as melody and soloing instruments, the rhythm section typically consists of electric bass, electric guitar, electric piano/synthesizer and drums. As with traditional jazz improvisation, fusion instrumentalists generally require a level of technical proficiency. The term jazz-rock is often used as a synonym for jazz fusion as well as for music performed by late 1960s, experimentation continued in the 1980s and 2000s. Fusion albums, even those that are made by the group or artist: Rather than being a musical style, fusion can be viewed as a musical tradition or approach. Afro-Cuban jazz, one of the earliest forms of Latin jazz, is a fu</p>	<p>Writing Style = 1.18</p> <p>... was here where Carl Perkins tried on his "Blue Suede Shoes" and where Johnny Cash first proved he could "Walk the Line." In 1950, Sam Phillips opened what he first called The Memphis Recording Service with a mission to record "anything, anywhere, anytime." His passion was to record the rhythm and blues music he heard on nearby Beale Street being performed by black musicians who had little chance of getting their music on record elsewhere. It was on Beale Street, Memphis's entertainment section and the hub of the South's black community, where the sounds of blues and country were blending together to make a new sound. Phillips wanted to capture the excitement of this new music and make it available to those outside of Memphis and to the world. "I knew this music wasn't going to be available in a pure sense, forever," Phillips said. His studio's goal was to capture that pure raw energy on record and share it with the world. And that he did. Radio stations across the South in the early 1950s played mostly country music and Grand Ole Op</p>	<p>Writing Style = 2.03</p> <p>... by Robert Louis Stevenson. Jacopo da Bologna's 14th Century madrigal Non al su' amante Feature d the story of the Goddess Diana bathing in a mountain stream and being observed by a passing hunter - what beautiful singing and playing lines, here! Especially telling was the blend of lyrical voice and excitable recorder figurations. The story didn't appear to have a happy ending, judging by the melancholia that seemed to grip the piece over its last minute or so's duration! A happier, more energetic outing for all concerned was provided by an anonymous 14th Century French ballad, "Constanza", a dancing, tintinnulating expression of joy for voice and instrument that makes one wish one could be a time-traveller! This was a great concert for home-grown music, as next was Helen Fisher's setting of Lauris Edmond's poem I name this place, one of the verses from a collection "Scenes from a Small City". As written the occasion for which the piece was befitted (the wedding of friends) the music has a renaissance-like feel, a ritualistic el</p>

This show comprises works from two series that developed more or less simultaneously. One group is Concentric Squares, which has been ongoing for several years, and paintings from this set have been shown numerous times in various venues recently. The other group, Horizontal Stripes, is smaller, with just six altogether. They have not previously been shown. Both groups use only a range of grays and metallic hues, what I have been calling an industrial palette, to distinguish the colors from spectrum or natural hues. They all are hard-edged using straight lines and multiple layers of paint to give the surface an opaque effect that keeps the eye of the viewer on the surface instead of penetrating into an illusionist depth. The squares are classical in their symmetry and are made up of a series of mathematical relationships and proportions that are determined before the painting is begun. The paintings are conceived as a series of concentric forces compressing toward the center, or con</p>	<p>Facts & Trivia = 0.50</p> <p>... d to be announced) will be offered as a 7 p.m. Saturday evening event in the Fiester Auditorium at Mariposa County High School, and a Sunday matinee at 2 p.m. at a location in or near Yosemite National Park. But fiscal assistance is needed. A young audience member learns the art of conducting via observation at a 2019 concert in the Alhambra's Great Lounge (photo by Cheryl Kellogg Petretti). The newly-renamed orchestra sporting the acronym "MYSO" (or My Symphony Orchestra) is now an independent non-profit organization partnered with the 50 (C)3 Collaborative Arts and Culture Foundation. The OAF, an exclusive fine arts fiscal partner, was founded in 2010 in Portland, OR, and relocated to Mariposa a few years ago. As a publicly-funded entity, MYSO requests support from those who realize the intrinsic and fiscal value to this region made by the 21-year-old orchestra; all donations to the MYSO are tax-deductible. George Parker, a audience member. The Free Theatre acted, and probably still does, as a laboratory for some of the most creative minds in New Zealand with artistic consequences far beyond the theatre and time of production. The Free Theatre has continued to engage in a dialogue, at an international level, between space, narrative and body that has allowed local students to overcome traditional barriers of intellectual isolation preparing graduates for careers both in New Zealand and on the world stage. This has been made possible by the sacrifice and commitment of its founders and supporters who over the last 25 years have not only delivered an excellent contemporary theatre to Christchurch but have influenced more than one generation of New Zealand artists, filmmakers and thinkers. Lawrence Wallen, Designer, Media/Material, Head of School, School of Design, University of Technology Sydney Flashback #8 Oscar Wilde's SALOME In 1994, Falkenberg continued his fruitful collaboration with visual art</p>

Bob's fusion makes the Heritage/Jazz music interface natural and appealing. But as much as the crossover is natural to him, can Bob in the long term bring about a sustainable, marketable marriage between the two genres? If he can succeed in that regard, then it would do miracles for our Lucian music and we can well end up with a genre of music more powerful, more sustainable than any of the existing genres of Caribbean Music. And that is why this year's "paradigm-shift" in the Jazz festival is most welcomed platform. DRAYTONS TWO WERE THE SPOUGE KINGS In conclusion, I claim that St. Lucians are not cultural strangers to Jazz. I further claim that Jazz is in our blood and it must be true that the same African slaves who brought Jazz to America also brought it (or at least a form of it) to the Caribbean! Only that, we perhaps never had the res</p>	<p>Educational Value = 1.29</p> <p>... trumpet in fifth grade, then started guitar and percussion in high school in Montgomery County, Pa., where he grew up. He enjoyed the high school band, jazz band, and chorus, and especially enjoyed jamming with friends. "Toward the end of high school, I started to experience music as a powerful force for me as an individual, almost like a healing thing for me," he said. "It gave me power." After two years at Penn State, officially studying science and engineering but unofficially playing guitar and drums every day and jamming with friends, Mitnick decided to pursue his future in music. "Once the illusion of following an engineering and science career faded, music was what remained," he said. He auditioned for the University of the Arts in Philadelphia, where his father was an architecture professor, and on his second try, was accepted. "Once I got there, my life changed dramatically," Mitnick recalled. "I cut all my hair off and got very serious. I realized that it's one thing to play music with your friends at a party, but</p>

Hamelin finished of the Allegro con brio movement of Piano Concerto No. 1 with some very animated hand gestures that reminded me of the piano player in a carnival shooting gallery. The part of Tchaikovsky's Symphony No. 2 with the Chinese gong made me laugh allowed because it was so delightfully unexpected (although I should have noted that a gong on the stage would eventually be used). It reminded me of a George Plimpton's story where he participates with the New York Philharmonic Orchestra. He is given the gong because he can't mess it up, but hits it so enthusiastically that even the conductor notices. I looked it up and the piece Plimpton played gong on was indeed Tchaikovsky's Symphony No. 2. I need to take advantage of the 40 - 320 program again within the next three-and-half years. Atlantic Riband evokes the struggle and ultimate victory of ocean-crossing immigrants to America in an orchestral showpiece of power and splendor. American Rhapsody is a lyrical romance for violin and orchestra, and Divinum Mysterium a single-movement viola concerto rich in expressive tapestry. Concerto Grosso shows Fuchs's sheer energy, and Discover the Wild is an orchestral evocation of lyricalism and color. Gustav Holst's youthful enthusiasm for Wagner is reflected in his excellent Walt Whitman overture written in 1899. Shortly afterwards he composed the Cotswolds Symphony which embraces hints of contemporary British folk music but is dominated by the slow movement, a profound elegy for the utopian socialist William Morris is. Though completed at college, A Winter Idyll shows real orchestral assurance. Indra is an accomplished tone poem revealing Holst's interest in the legends of India, whilst the glittering and evocative Japanese Suite was written in response to a request from a Japanese dancer appearing in London.</p>
